Dalhousie University.

INTRODUCTION.

Historical Sketch.

Dalhousie College was founded in 1818 by the Right Honourable George Ramsay, ninth Earl of Dalhousie, "for the education of youth in the higher branches of science and literature."

The original endowment was derived from funds collected at the port of Castine, at that time a part of the Commonwealth of Massachusetts, now of Maine, during its occupation in 1814 by Sir John Sherbrooke, then Lieutenant-Governor of Nova Scotia. In a letter to Lord Bathurst, dated December 14th, 1817, Lord Dalhousie, with the unanimous consent of the Council, proposed that £9,750 of these funds be devoted to the "founding of a College or Academy on the same plan and principle as that in Edinburgh," "open to all occupations and sects of religion, restricted to such branches only as are applicable to our present state, and having the power to expand with the growth and improvement of our society," and that this College be established in Halifax, "the seat of the legislature, of the courts of justice, of the military and the mercantile society." On the 6th of February, 1818, Lord Bathurst wrote expressing the Prince Regent's "entire approval of the application of the funds in question in the foundation of a Seminary in Halifax for the higher classes of learning." The building was begun in 1819, and on the 22nd of May in the year 1820 the corner stone was laid by the Earl of Dalhousie. On the 13th of January, 1821, an "Act to incorporate the Governors of Dalhousie College at Halifax" became law. The original Board consisted of the Governor-General of British North America, the Lieutenant-Governor of Nova Scotia, the Bishop, the Chief-Justice, the President of the Council, the Treasurer of the Province, the Speaker of the House of Assembly, and the President of the College.

After unsuccessful efforts in 1822-4 and 1829-30 on the part of both the British Government and the Board of Governors to effect a union with King's College, at that time the only other existing in the Province, Dalhousie College went into operation in 1838, with the Rev. Thomas McCulloch, D. D., as President.

In 1841 an Act was passed conferring university powers upon the College, and vesting the appointment of the Governors in the Governor and Council. Two years later President McCulloch died, and in 1845 the College was closed, the Governors considering it "advisable to allow the funds of the institution to accumulate." From 1849 to 1859 the College funds were employed to support a High School. Toward the end of this period, in 1856, the Arts department of Gorham College, Liverpool, supported by the Congregationalists, was transferred to Dalhousie, "with a view to the furtherance of the establishment of a Provincial University," and for a short time an attempt was made to conduct the institution as a University under the Act of 1841.

Dalhousie University.

The history of Dalhousie College as an institution realizing the purpose of its Founder may be dated from 1863. In that year the College was reorganized under an Act which empowered the Board of Governors to grant to any body of Christians, or any individual, or number of individuals, the privilege of nominating a representative to the Board, and a Professor, for every chair in the College supported by them to the extent of twelve hundred dollars a year. In consequence of this provision, the Presbyterian Church of Nova Scotia closed its academies at Truro and Halifax, and undertook the support of two chairs; and the Church of Scotland in Nova Scotia, having no institution of its own, endowed one chair—the Chair of Mathematics. Thus strengthened, the College opened in the Autumn in 1863 with a staff of six professors, the Rev. James Ross, D. D., being Principal. At the death of the incumbents of the two chairs supported by it, the Presbyterian Church withdrew its support.

In 1879 Mr. George Munro, of New York, endowed the Chair of Physics, and in rapid succession Chairs of History and Political Economy, English Literature, Law and Metaphysics. He also supported Tutorials in Classics and Mathematics, and for ten years provided liberal exhibitions and bursaries. His manifold gifts, aggregating about \$350,000, were at that time unparalleled in Canada.

In 1882 Mr. Alexander McLeod, of Halifax, left the residue of his estate, about \$45,000, to endow the three chairs now known as the McLeod Chairs of Classics, of Modern Languages, and of Chemistry.

The purchase of the old College building by the City and the generous gift of \$20,000 by Sir William Young, for over forty years Chairman of the Board of Governors, led to the erection of a new building on Carleton St., the corner stone of which was laid by Sir William on the 27th of April, 1887. The gifts of Sir William Young to the College subsequent to its reorganization exceeded \$65,000.

In 1890 Mr. John P. Mott, of Halifax, left a bequest of \$10,000 to the College.

In 1902 the University received a bequest of \$2,000 from the late Professor Charles Macdonald for a library endowment fund. In the same year the Alumni began a movement to collect funds for the erection of a library building in memory of Professor Macdonald, and obtained contributions of \$25,000 for the purpose. The erection of this building was not begun until February, 1914, being delayed until a new site for the University should be secured. The corner stone was laid by the Rev. Dr. Allan Pollok on April 29th. In the same year the late Professor Johnson left a number of his books and a bequest of \$1,000 to the library. In 1917 the Library received a further endowment of \$1,000, the gift of President A. Ross Hill, of Missouri University, in memory of his late wife, née Agnes Baxter, B. A., '91.

In 1912 a canvass for funds to pay for the purchase of the Studley estate, which had been lately acquired as a new site for the University, and to erect the necessary new buildings and

increase the endowment, brought in new subscriptions of about \$400,000. The new home of the University contains more than 40 acres and is beautifully situated on a partly wooded eminence overlooking the North West Arm. The corner stone of the first of the new buildings, the Science Building, was laid by H. R. H. the Duke of Connaught, on Aug. 18th, 1912. Mr. Andrew Carnegie gave \$40,000 toward the erection of this building on condition that the University set aside a like amount for maintenance. The Science Building and the Macdonald Memorial Library were opened for occupancy in the fall of 1915, and the work of the Faculty of Arts and Science is now carried on in these buildings.

The late Lieut. George W. Stairs, B. A., '99, who fell at Langemarck, bequeathed the sum of \$5,000 to the University.

By the will of Mr. Joseph Matheson, of Lower L'Ardoise, who died in 1915, the University received a legacy of \$15,000.

In 1916 Mr. John Macnah, a life-long friend to the University, died leaving two-thirds of the residue of his estate to the Board of Governors, a portion or all of it at their discretion to be devoted to the extension and maintenance of the Library. The amount of this bequest was about \$30,000.

In 1917 Mr. G. S. Campbell, Chairman of the Board of Governors, and Mrs. Campbell, gave \$25,000 to found a series of valuable scholarships to commemorate their only son, George H. Campbell, B. A., '15, who enlisted for overseas service during his senior year, and was killed while on duty at the front.

In 1918 Senator William Dennis and Mrs. Dennis founded the Eric Dennis Chair of Government and Political Science in memory of their son Eric who gave his life for his country at the taking of Vimy Ridge. They handed over to the University the sum of \$30,000, the interest on which was to be devoted to the payment of the salary of the occupant of the new chair and to the provision of scholarships and a gold medal in connection with the department.

In 1919, the one hundredth anniversary of the founding of the University was celebrated, having been delayed for a year by the war. As a memorial of this event a canvass was made during 1920, for a fund for endowment and buildings, to be called the Centennial Fund. This campaign resulted in subscriptions for general purposes to the amount of \$439,000, and also the following amounts to be used for the specific purposes mentioned:—

Senator and Mrs. Dennis donated \$40,000 to be added to their previous gift, bringing the foundation of the Dennis Chair to \$100,000.

W. A. Black, Esq., of Halifax, contributed \$60,000 to endow a Chair of Commerce with special reference to seaborne commerce.

Mrs. E. B. Eddy, of Ottawa, made to the University a gift of \$300,000 to erect a Women's Building to serve as a residence and centre for the general interests of the women students. This was the largest single gift which the University had ever received. It was made in memory of Mr. and Mrs. Shireff, of Chatham, N. B., the parents of Mrs. Eddy, and the building is to be called Shireff Hall.

Dalhousie University.

The Rockefeller Foundation and the Carnegie Corporation, both of New York, contributed \$300,000 each to the University for the furtherance of medical education. Their magnificent gifts make possible a medical centre of the first rank in the Maritime Provinces.

The British Empire Steel Corporation made a promise of a contribution of \$250,000 for the encouragement of scientific research to stimulate the development of the mineral and other natural resources of the Province.

A fund of £4000 sterling, to be known as the "James Gordon MacGregor Memorial Fund," was provided by the New Glasgow relatives of the late Prof. MacGregor. The object of the fund is to provide a Fellowship in Physics.

The Faculty of Medicine was organized in 1868; merged into the Halifax Medical College in 1875; and re-organized as an examining faculty in 1882. In 1911 the University purchased the property of the Halifax Medical College, and undertook the provision of instruction in all the subjects of the medical curriculum. After the removal of the Faculty of Arts and Science to Stanley in Sept., 1915, the Medical School was removed to the Ferer Building, and the old Halifax Medical College vacated.

In 1914 Dr. D. A. Campbell and Mrs. Campbell endowed the Dr. G. J. Campbell Memorial Chair of Anatomy, in memory of their late son, a distinguished alumnus of this University.

The Faculty of Science was organized in 1877, and re-organized in 1891. In 1902 the School of Mines was established. An appeal for funds for the support of this department was made, and subscriptions were received to the amount of about \$60,000. In 1905 the Faculty was divided, the department of Pure Science uniting with the Faculty of Arts to form the Faculty of Arts and Science, and the department of Applied Science becoming the Faculty of Engineering. On the opening of the Nova Scotia Technical College in 1909, the Faculty of Engineering was discontinued.

The Faculty of Law was established in 1883.

The Faculty of Dentistry was organized in 1908, in affiliation with the Maritime Dental College, which, under the auspices of the Dental Association of the Province, provided instruction in the professional dental subjects. In 1912 the Dental College discontinued its work, and instruction in all subjects of the curriculum is now carried on by the Faculty of Dentistry.

In 1911 the Pharmaceutical Society of Nova Scotia received the co-operation of the University in establishing the Nova Scotia College of Pharmacy. The University placed rooms at its disposal and arranged with some of the members of the scientific staff to give some of the instruction. In 1917 the Pharmaceutical Society of New Brunswick joined in the undertaking and the name was changed to the Maritime College of Pharmacy. The University offers the degree of Phm. B. to candidates fulfilling the necessary requirements.

Constitution.

The Board of Governors is the supreme governing body of the University. Appointments to it are made by the Governor-

Degrees and Courses.

in-Council on the nomination of the Board, or on the nomination, with the approval of the Board, of any body of Christians, or of any individual, or number of individuals, supporting a chair in the College. Any such body or individual is entitled to one representative Governor for each chair so supported. The Board has granted to the Alumni Association the privilege of proposing the names of three members of the Board. An Alumni Representative Governor, must resign at the end of three years; he may be appointed to succeed himself; but he cannot hold office for more than six years continuously. On similar conditions, the Alumnae Association, have the selection of one member of the Board. The Governors have the management of the funds and property of the College; the power of appointing the President, Professors, and other officials, and of determining their duties and salaries; and the general oversight of the work of the University.

The Senate consists of the President and Professors. To this body are intrusted, by statute, the internal regulations of the University, subject to the approval of the Governors. All degrees are conferred by the Senate.

The Faculties consist of the members of the teaching staff in each of the four main domains of study in which courses can be pursued at the University, namely, Arts and Science, Law, Medicine, and Dentistry. To them are intrusted by the Senate, subject to its approval, the supervision of the teaching, the preparation of regulations governing courses of study, and the recommendation of suitable candidates for prizes, scholarships, diplomas, and degrees.

Degrees and Courses.

The Senate confers the degrees in course of Bachelor and Master of Arts, Bachelor and Master of Science, Bachelor of Music, Bachelor of Pharmacy, Bachelor of Laws, Doctor of Medicine and Master of Surgery, and Doctor of Dental Surgery. A course in Music for the diploma of Licentiate of Music is also prescribed.

The degree of Doctor of Laws may be conferred *honoris causa* in recognition of eminent literary, scientific, professional, or public services.

The various Faculties of the University provide the instruction required in the courses leading to the above degrees, except in Music and in Pharmacy. In Music instruction is provided in the literary and scientific subjects required, and the University recognizes as qualifying for a degree the instruction in professional subjects given by the Halifax Conservatory of Music or other approved institutions. In Pharmacy the University provides instruction in pure science, and requires the teaching in professional subjects of the Maritime College of Pharmacy, or other approved institutions.

Engineering Courses.—Courses in Engineering are offered in the Faculty of Arts and Science. These courses extend over two or three years and correspond to the work prescribed by the Nova Scotia Technical College for the first two years of four-year courses in Civil, Mechanical, Electrical and Mining Engineering.

Public Health Nursing Course.—In February, 1920, a course of six months duration was instituted for graduate nurses

Dalhousie University.

intending to take up the work of Public Health Nursing. A certificate of proficiency will be issued to those completing the course satisfactorily.

Affiliated Courses.—By a proper selection of elective subjects in his course, a candidate may reduce by one year the time required for the degree of Bachelor of Arts and a professional degree in Law. Similarly a candidate for the degree of Bachelor of Arts or Bachelor of Science may reduce by two years the time required for the combined degrees in Arts or Science and Medicine.

A candidate for the degree of Bachelor of Arts or Bachelor of Science may shorten by two years a subsequent course for a degree in Engineering.

Privileges.—The usual privileges of exemption from the Preliminary Examination granted to graduates of recognized universities by the learned professions in Canada and Great Britain are extended to this University.

The University of Oxford exempts from Responsions an undergraduate in Arts of this University who has passed in the subjects (including Greek) of the second or a higher year. A Bachelor of Arts with Honours is further exempted from four terms of residence. The Trustees of the Rhodes Scholarships exempt from the qualifying examination candidates who are exempted from Responsions by the University of Oxford.

Of the seven courses required by the University of Edinburgh for the degree of B. Sc. in Pure Science, three may be taken in this University; and of the seven courses required for the B. Sc. in Engineering, two may be taken in this University, subject to certain conditions.

The University of London exempts Bachelors of this University from the Preliminary Examination leading to the LL. B. degree of that University.

Graduates in law of this University are admitted to the Bar of Nova Scotia without further examination.

The degree in Medicine from this University is recognized as entitling to the privileges usually granted to graduates in Medicine of Canadian Universities. Graduates of this University in Medicine and Surgery who hold the License of the Provincial Medical Board may, on application, be placed on the Colonial List of the British Medical Register.

Affiliated Institutions.

The Presbyterian College, Halifax.

Principal......Rev. Claresce Mackinnon, M. A., D. D., LL. D.

The classes and examinations in Hebrew I, Gaelic and New Testament Greek I, conducted at this College are recognized as qualifying for the degree in Arts at the University. Arrangements have been made whereby students may reduce to six years the time required to take the degree of B. A. from the University and complete the divinity course at the Presbyterian College.

Equipment.

The Prince of Wales College.

Principal......S. N. Robertson, M. A., LL. D.
Students holding High Honour Diplomas of Prince of Wales College, of Charlottetown, P. E. I., are admitted to the Third Year of the B. A. Course in Dalhousie, those holding Honour Diplomas to the Second, those holding Certificates or First Class Licenses to the First Year.

Halifax Conservatory of Music.

Director......Mr. Harry Dean.
The University recognizes the teaching of the Conservatory as part of the qualifications required for the degree of Bachelor of Music and for the Diploma of Licentiate of Music.

The Maritime College of Pharmacy.

Secretary......Mr. G. A. Burbidge.
The University recognizes the teaching of the Maritime College of Pharmacy as part of the qualifications required for the degree of Bachelor of Pharmacy.

Halifax Ladies' College.

Principal......Miss F. E. Blackwood, B. A.
Students who have completed the regular course and received the Matriculation Diploma are admitted to the Arts course without further examination.

Convent of the Sacred Heart.

Mother Superior......Madame Conwell.
Students who have completed the regular course and received the Diploma are admitted to the Arts course without further examination.

Mount Saint Vincents Academy.

Mother Superior......Mother Berchmans.
Arrangements have been made whereby students from this institution may receive Advanced Standing in work of the First and Second Years for work done at the Academy, and instruction in separate classes in the work of the Third and Fourth Years.

Equipment.

Libraries.

The University possesses a University Library, the Macdonald Memorial Library, open to all registered students, and the separate Law, Medical and Dental Libraries for the students and instructors in those Faculties.

The University Library was instituted in 1887, as the result of an appeal made by the Rev. George M. Grant, at Convocation. Until 1888 the number of volumes did not exceed 3,000; today there are 20,000 volumes and 3,000 pamphlets, selected primarily to meet the needs of students in the Faculty of Arts and Science.

The University Library contains the *MacKenzie Collection* of works on Mathematical and Physical Science, which was presented to the College by the relatives of the late Professor J. J. MacKen-

size; the *Robert Morrow Collection* of works on Northern Antiquities and Languages, presented by Mrs. Robert Morrow; the *Sets Collection* of Philosophical works, purchased with the proceeds of a course of public lectures on Psychology given by Professor James Sets; the *DeMille Memorial*, presented by Professor MacMechan from the proceeds of two courses of Lectures on Shakespeare; the *Lovense Library*, presented by the daughters of the Late Professor George Lawson, LL. D., the *McCallum Collection*, from the Library of the late Rev. W. McCulloch, D. D.; the *Edwin F. Robins Memorial Collection* of Philosophical books; the *Madenfield Collection*, presented by the son of the late Professor Charles Macdonald, M. A.; the *DeMille Collection* presented by Mrs. J. DeMille; the *Honeyman Collections*, presented by the family of the late Emily Harrington, M. A.; the *Fraser Collection*, presented by the family of the late A. H. E. Fraser, LL. B.; the *J. J. Stewart Collection* (1200 volumes and pamphlets on local history, and a valuable collection of coins), presented by the family of the late J. J. Stewart, Esq.; the *Forrest Collection*, presented by the Rev. Dr. Forrest; also the *Class Memorial Collection*, presented by the graduating classes of 1894 and some subsequent years.

When the Law Faculty was organized in 1885 it received a number of very generous contributions for a Library. Today the Law Library contains more than 8,000 volumes, including all the law reports which a student will find it necessary to consult.

The Medical Library received its real start by the gift of some books and an Endowment of £1,000 from the late Dr. Copswell. It is open on certain conditions to any practitioner in the Province as well as to medical students.

Besides the Libraries in the University, students may use, subject to certain conditions, the following libraries: The Science Library (61,000 volumes and pamphlets), the Legislative Library (24,000 volumes), the Citizens' Free Library (33,000 volumes), the Library of the Presbyterian Theological College (11,000 volumes), and the Nova Scotia Barristers' Society Library (18,000 volumes).

The Museum.

The Museum consists chiefly of the *Thomas McCulloch*, the *Patterson*, and the *Honeyman Collections*.

The *Thomas McCulloch Collection*, presented by the late Rev. William McCulloch, D. D., of Truro, contains a large and valuable collection of birds, especially native species of the Maritime Provinces, besides many mineral, rock and fossil specimens, shells of recent molluscs, Indian implements, etc. The fossil specimens include a collection of European cretaceous fossils and of carboniferous fossils, chiefly Nova Scotian. The collection of birds is supplemented by the valuable collection made by Col. T. J. Egan, of Halifax, containing thirty cases of native birds.

The *Patterson Collection* of Indian antiquities was made by the late Rev. George Patterson, D. D., LL. D., F. R. S. C., and presented by him to the University. It contains 250 specimens,

Laboratories.

catalogued and conveniently arranged for reference, including about 250 specimens relating to the aborigines of Nova Scotia.

The *Honeyman Collection* consists of the extensive geological collection made by the Rev. David Honeyman, D. C. L., F. S. A., for some years Professor of Geology in Dalhousie College, and was presented by Dr. Honeyman's relatives.

The Honeyman collection and the portion of the McCulloch collection illustrating Geology and Mineralogy are placed in the Geological Laboratory.

The Zoological section of the Museum was catalogued by the late Dr. Andrew Hallday, Lecturer in Zoology from 1899 to 1903.

The collections of the Provincial Museum, illustrating the Geology, Mineralogy and Zoology of the Province, may be conveniently used by students.

Laboratories.

The new Science Building is designed to be ultimately a chemical laboratory only, but for a number of years it will be divided between the departments of chemistry and physics. For a short time it will house also the departments of Geology and Engineering. Each department during this earliest stage of utilization of the building will have the following accommodation, respectively:

The *Chemical Laboratory* contains two lecture rooms accommodating respectively 175 and 60 students, a laboratory for general chemistry provided with lockers for 120 students, and a laboratory for qualitative analytical chemistry for 72 students. There are in addition special laboratories for quantitative analysis, organic chemistry, physical chemistry, a Professor's study, two private laboratories, two rooms for research, balance rooms, departmental library, a room for work involving the use of hydrogen sulphide, and a photographic dark room.

The *Physical Laboratory* contains a lecture room to seat 120 students, a general laboratory to accommodate 40 students, an advanced laboratory for 10 students, a Professor's study, two private laboratories, two rooms for research, departmental library, a photometric room, a dark room and a storage battery room. In the basement are a work-shop and dynamo room, and a room for the seismograph.

The *Geological Laboratory* contains a Professor's study, and a general laboratory for 50 students.

The *Engineering Laboratory* contains a Professor's study and a lecture room to seat 60 students, and a Drafting room accommodating 50 students.

The *Biological Laboratory* is in the Forrest Building on Carlton St., and accommodates about 60 students doing simultaneous work.

The space in the Forrest Building previously occupied by the Arts and Science departments is now utilized for the laboratory, museum and library accommodation of the Medical and Dental Schools.

ADMISSION.

Women are admitted to classes on the same conditions as men.

No person under sixteen years of age is admitted to any class except by special action of the Senate.

Students are classified as Graduate Students, Undergraduates, Matriculants and Special Students.

Graduate Students are students who hold a Bachelor's degree in Arts or Science and are pursuing a course in Arts or Science for a Master's degree.

Undergraduates are students who have completed Matriculation and are candidates for a Bachelor's degree in Arts or Science or a degree in a professional course. They are admitted to all classes of the first year of their course, except in Law. For details of the extra requirement of a year in Arts before admission to the course in Law see p. 15.

Matriculants are students looking forward to a degree who have not completed Matriculation, but have sufficient subjects of Matriculation to their credit to enable them to have the classes which they may attend and pass recognized as qualifying for that degree. The requirements in the various faculties are as follows:—In the faculty of Arts and Science a Matriculant is one who has passed in English and in at least three other Matriculation subjects. In the faculty of Medicine a Matriculant is one who has six Matriculation subjects to his credit including English, Physics, Chemistry and the two mathematical subjects, and has made at least 30% in Latin. The regulations concerning the classes which a Matriculant may attend will be found under the requirements of each Faculty.

Special Students are all not included in one of the preceding groups. The classes attended by a Special Student are not recognized as qualifying for a degree.

Persons of good moral character may be admitted to certain classes as Special students without formal examination, provided they are deemed qualified by the Committee on Admission to profit by the work of the class or classes selected. A person seeking admission as a Special student, if under nineteen years of age, must submit evidence, such as a certificate from

the school last attended, that he has a satisfactory knowledge of English and that his other acquirements and habits of study are such as should qualify him to profit by the work of the class or classes he wishes to enter.

Matriculation.

All candidates for a degree must satisfy the requirements for Matriculation, either by passing the Matriculation examinations of this University or by presenting certificates acceptable as equivalents.

The Matriculation examinations will be held at the University, and at such other places as the Senate may appoint, on Sept. 28th to Oct. 1st, 1921. For the time-table of the examinations see the University Almanac.

No fee is charged for a matriculation examination except to students who have entered on their second year of attendance. (See foot-note to p. 55).

Candidates for the Matriculation examinations must make application on a form to be obtained from the University Office.

The last day for receiving applications for the examinations held at the University for the session of 1921-22 is Tuesday, Sept. 27th, 1921. Applications for examination at an outside centre should be made one month earlier.

The Matriculation examinations are held in the following subjects, one paper in each:

English	Geometry	French
British History	Trigonometry	German
Ancient History	Latin	Physics
Algebra	Greek	Chemistry.

Subjects Required for each degree.

The subjects of matriculation common to all degrees are—

- (1) English,
- (2) History, (For Medicine and Dentistry this must be British History),
- (3) Algebra,
- (4) Geometry.

The remaining subjects are—

For the B. A., Phil. B. and LL. B. degrees
 (5) Physics or Chemistry, (6) Latin or Greek, (7) another foreign language, (8) an elective.

For the B. Sc. and B. Mus. degrees

- (5) Physics or Chemistry, (6) French, (7) German, (8) an elective.

For the B. Com. degree

- (5) Physics or Chemistry, (6) and (7) two foreign languages, (8) an elective.

For the M. D., C. M. degree

- (5) Physics, (6) Chemistry, (7) Latin, (8) another foreign language.

For the D. D. S. degree

- (5) Physics, (6) Chemistry, (7) Latin.

For the requirements for the Engineering Course see p. 39.

Requirements in each Subject.

The requirements in each of the subjects specified above are as follows:

English.—Language: Grammar, analysis, parsing. Composition: An essay on one of several set subjects to be selected from:—Macaulay; Warren Hastings; Samuel Johnson; Shakespeare; Merchant of Venice; Julius Caesar; Longfellow; Evangeline; Scott; The Lady of the Lake; Stevenson; Kidnapped.

Questions on the interpretation of a passage not specified, to test general intelligence.

Note.—The essential part of this examination is the essay. Legible writing, correct spelling and punctuation will be considered indispensable. Skill shown in sentence and paragraph construction will be awarded high marks. Not more than two of the works named need be read. They should be read primarily for the story, and need not be studied minutely, as a choice is allowed among at least six themes selected from the works named.

British History.—General outlines, as in Ontario High School History of England; or Tout: History of England, from the earliest times to the death of Queen Victoria; or Ransome: Short History of England.

Ancient History.—General outlines, as in Webster: Ancient History; or Myers: A short History of Ancient Times.

Algebra.—Equations of the first and second degrees, indices, ratio and proportion, theory of quadratic equations, arithmetic and geometric progressions, permutations and combinations, as discussed in any high school algebra.

Geometry.—The straight line, triangles, quadrilaterals and pentagons in their relation to circles, including the subject matter of the first four books of Euclid, as discussed in any high school of geometry.

Trigonometry.—Up to and including formulas relating to the sum and difference of two angles, the solution of equations and of right-angled triangles, as in any elementary trigonometry.

Latin.—The paper will contain, (1) passages for translation from prescribed books with questions arising out of those books;

(2) easy passages for translation from books not prescribed; (3) questions on grammar, accidence and elementary syntax; (4) translation of easy sentences from English into Latin.

The books prescribed are: Caesar: Gallic War, Book V, (in 1922 Book I) and Vergil: Aeneid, Book I.

Greek.—As under Latin.

The book required is Xenophon: Anabasis, Book I.

French.—Berthoin: Specimens of Modern French Prose (Macmillan), omitting IV, VI, IX, X; Ontario High School French Grammar, to the end of Lesson LXXXIII; questions in grammar as in Fraser and Squier's French Grammar, to the end of section 344, with exercises; easy sight translation from French into English and from English into French.

German.—Buchheim: Modern German Reader, Part I; grammar questions limited to accidence and easy rules of syntax; easy sight translation from German into English and from English into German.

Chemistry.—Thermometer; barometer; gas laws, and correction of volumes of gases for changes of pressure and temperature; specific gravity. The following elements and their simplest compounds: oxygen, hydrogen, chlorine and the halogens, sulphur, nitrogen, phosphorus, carbon, silicon, the principal metals. Fundamental laws. Meaning of formulae and equations. The extent of knowledge expected is such as may be gained from Evans' "Elementary Chemistry for High Schools," or other text-book of similar grade, accompanied by a laboratory course of not less than seventy hours. Each candidate for examination must present a record of his laboratory work, neatly and legibly written, and duly certified to be the candidate's work by the teacher with whom the work was done.

Physics.—The candidate should have received instruction consisting of at least ninety hours of recitation and sixty hours of laboratory work. Such text-books as The Ontario High School Physics and Laboratory Manual, Gage's Introduction to Physics, Science, and Maths and Twiss' Physics will indicate the grade of instruction required. The candidate is expected to perform at least thirty experiments distributed over the various parts of the subject, and to keep in a note-book a neat and orderly record of the same, described in his own words. This note-book, bearing the certification of the instructor, must be presented for inspection along with the certificate or diploma submitted. (See below).

For 1921-22 the laboratory requirement in Chemistry and Physics will not be insisted upon.

Instead of the authors and books in languages given above, a candidate, if he so desires, may be examined on others recognized as equivalents (except in the case of candidates for the Entrance Scholarships); but application for this privilege must be made at least two weeks in advance.

Candidates who pass in four or more subjects, but not in all, on any one occasion, will be given credit for

such subjects; and may complete their Matriculation by passing the remaining subjects on any subsequent occasions.

Certificates Exempting from Examination.

Candidates who hold one or more of the following diplomas, licenses or certificates will be exempted from the above examination in such of the above subjects as were included in the examination by which such diploma, license or certificate was obtained, provided a sufficiently high standard was reached, and provided that this standard was reached in four or more of the subjects required for Matriculation.

- (a) Certificates of Matriculation Examinations taken at recognized Universities;
- (b) High School Certificates of Grades XI or XII of Nova Scotia, and, in the case of History and Science, of Grade X;
- (c) Honour Diplomas, or Certificates entitling to a First Class Licence, as issued by Prince of Wales College, or a First Class Licence issued by the Education Department of Prince Edward Island;
- (d) Grammar School or Superior (except in Latin), or First Class Licences of New Brunswick;
- (e) Equivalent Licenses or Certificates issued by Education Departments of other Provinces;
- (f) Diploma of the Associate Grade as issued by the Education Department of Newfoundland;
- (g) The Preliminary Examination Certificate of the Nova Scotia Barristers' Society; and similar Certificates of the Bar Societies of other Provinces and Colonies with equivalent standards;
- (h) Certificates similar to the above issued by University or other official examining bodies, when found adequate.

If a candidate gets credit for at least four of the eight subjects of Matriculation, either at the Matriculation examinations or on a single certificate, he may complete Matriculation either by examination, or by certificate, or both.

Candidates holding certificates which they wish to offer for exemption as above should forward them for appraisal, as early as possible.

Special Matriculation Regulations for each Faculty.

Faculty of Arts and Science and Faculty of Law.—A certificate of grade XI standard (or of grade X for History and Science) issued by the Education De-

Special Matriculation Regulations.

partment of Nova Scotia is treated as follows: Marks obtained in other than Matriculation subjects are not considered. The mark in a Matriculation subject is not considered unless it is at least 50 per cent. Subject to these restrictions the certificate will be accepted for the Matriculation subjects it covers in which the average of the marks obtained is at least 60 per cent., provided this average is reached in at least four subjects.

A minimum mark of 40 per cent in a subject made in an examination for a certificate of grade XII standard will exempt from Matriculation in that subject. When such subject is divided in this certificate examination into two or more parts the average mark for such parts is taken as the mark to be considered.

In order to be admitted to a course in the Faculty of Arts and Science, a candidate must have credit for Matriculation in English and in at least three other subjects.

In order to be admitted to the course in Law, a candidate must have completed Arts Matriculation, and must also present a satisfactory certificate of having attended and passed, at some degree-granting College or University recognized by the Senate for the purpose, at least five regular classes of the course for the degree of Bachelor of Arts, of which English, Mathematics, Latin and another foreign language shall be four.

Faculty of Medicine.—Certificates of grades X, XI and XII are treated as in the Arts and Science Faculty.

In order to be admitted to the course in the Faculty of Medicine a candidate must have credit for at least six subjects, including English, Physics, Chemistry and the two Mathematical papers, and have made at least 30 per cent. in Latin. Matriculation must be complete before admission is granted to the Second year.

A person entering upon the study of Medicine for the purpose of qualifying himself to practise in the Province of Nova Scotia must also satisfy the Preliminary Requirements of the Provincial Medical Board, and have his name entered in the Medical Students' Register kept by the Board. These Preliminary Requirements are practically identical with the Matriculation of the University, but intending

students are advised to apply for information to the Registrar of the Board, Dr. W. H. Hattie, Halifax, N. S.

Faculty of Dentistry.—Certificates of grades X, XI and XII are treated as in the Arts and Science Faculty.

In order to be admitted to the study of Dentistry, a student must have complete Matriculation.

Admission to Advanced Standing.

Admission of Non-Collegiate Students.

Students who hold a High School certificate of Grade XII of the Province of Nova Scotia, or certain certificates of similar grade from other provinces, may obtain credit for certain classes of the first year, and so shorten by a year the time required to complete a course for an Arts or Science degree. For the regulations concerning exemptions see under Faculty of Arts and Science, p. 27. See also the terms of affiliation with Prince of Wales College, p. 7.

Students are admitted to advanced standing in any other Faculty only in accordance with the regulations for admission *ad eundem statum* below.

Admission ad Eundem Statum.

Students from other Universities desiring to enter classes in this University may, on producing satisfactory certificates, be admitted *ad eundem statum* in this University, if they are found qualified to enter the classes proper to their years. But if their previous studies have not corresponded to those they would have taken in this University for the course on which they propose to enter, they may be required to take additional classes. In no case, however, shall a candidate admitted to advanced standing be admitted to a degree in course in this University until he has attended and passed in at least five classes.

Persons seeking admission *ad eundem statum*, must, in making application, submit certificates of good character and standing, with duly certified statements of their Matriculation, and of the classes attended and

passed, with the grades attained; also calendars of the institution from which they have come of such dates as to show the courses which they have followed.

Admission ad Eundem Gradum.

A graduate of a University approved by the Senate, who has received his degree in course, may be admitted *ad eundem gradum* in this University on producing satisfactory evidence of good character and academic standing, and on payment of the required fee, provided the applicant is pursuing a course of study or research in this University, or is associated with the academic work of the University.

UNIVERSITY REGULATIONS.

Registration.

All students of the University are required to enter their names in the Register annually, agreeing to obey all the regulations of the University already made or to be made, and to pay the required fees and deposits, before entering any class or taking any examination. After registration and payment of fees a student is given a certificate, on presentation of which to the professors and lecturers whose classes he is entitled to attend, his name is entered on the class register.

Residence.

All students are required to report their place of residence to the University Office on or before October 21st.

The plans have been drawn for a residence for women students, the first unit of which will cost about \$300,000, but it will not be erected in time for occupancy during the session of 1921-22. In the meantime, the University has purchased the Marlborough House, at 121 South Park Street, which will accommodate twenty-five women students. Applications for rooms may be made through the President's Office.

The University purchased in 1920 the Birchdale Hotel property on the North West Arm, and has turned

it into a residence for men students. It will accommodate about 120. Application for accommodation may be made through the President's Office.

Pine Hill Presbyterian College dormitories are usually available for students of Dalhousie University to the extent of the accommodation not needed by Pine Hill College for its Divinity students. For information and reservations application should be made to the Principal, Pine Hill College, Halifax, N. S.

The Secretary of the University Y. M. C. A. will arrange to have some one meet at the train any student coming to Halifax for the first time, if notified in advance of the time of arrival. He can be addressed after September 15th in care of the University.

Church Attendance.

All students not residing with parents or guardians are required to report to the President on or before Oct. 15th the churches which they intend to make their places of worship during the session. Intimation will be made to the various clergymen of the city of the names and addresses of the students who have chosen their respective places of worship.

Discipline.

The Senate may use all means deemed necessary for maintaining discipline. It is the duty of the Dean of the University to see that order is maintained within the buildings and on the premises of the University. Every professor or officer of the University is required to report to the Dean cases of improper conduct that may come under his notice. Students conducting themselves in an unbecoming manner on or beyond the premises of the University during the session, may be fined, suspended, or expelled from the University. Since the formation of the Council of the Students in 1912, that body holds an investigation and reports its finding to the Senate for action, and may recommend penalties to be inflicted.

Irregularity of attendance, except for approved reasons, or neglect of or unsatisfactory progress in

studies shall be regarded as sufficient cause for dismissal from one or more classes, or, in extreme cases, from the University.

University Library.

The library is open during the session on every week-day, except Saturday, from 9 a. m. till 5 p. m., and on Saturday till 1 p. m.

Books, other than those on the reserved lists, may be taken out by instructors or students and kept for two weeks. They must then be returned to the library. Books on the reserved lists may be taken out immediately before the closing of the library on any day, and must be returned when it opens on the following day.

Not more than two books may be borrowed at one time by a student not in an Honour course, nor more than four by a student taking Honours.

Students are allowed the privilege of borrowing books from the library for the summer. Students using this privilege are required to make a deposit with the University office. This deposit is returned when the books are replaced in the library.

Caution Deposit.

Each male student on registration is required to deposit two dollars as caution money to cover damage done to furniture, apparatus, etc. This amount, less deductions (if any), will be returned at the close of the session. There shall be no deduction from the Caution Fund for damages which have been charged to or assumed by individuals.

Laboratory Deposits.

A student taking a class involving laboratory work is required to make a deposit of two to five dollars, depending upon the class taken, on entering the class. This amount, or what remains of it after deducting any charges which may have been incurred for breakage or materials used, is returned to the student at the end of the session.

Fee for Support of Student Organizations.

At the request of the student body, as expressed by a ballot taken on the question and presented through The Council of the Students, a fee of \$5.00 will be collected on registration from each student who takes more than one class. This fee entitles the student to the privileges of any or all of the following student organizations: Dalhousie Amateur Athletic Club, Dalhousie Skating Club, Dalhousie Young Women's Christian Association, Delta Gamma, Dalhousie Dramatic Club, Sodales, and to a copy of the Dalhousie Gazette. A student taking only one class and desiring to take part in one or more of the above organizations must pay the fee of \$5.00.

Students Loan Fund.

A Students Loan Fund has been started by the gift of \$1000 for the purpose from the Chronicle Publishing Co., Limited, of Halifax. It is hoped that other donations will be made to increase the fund for this desirable purpose.

An application for a loan will be considered only from a student of Undergraduate standing who has attended the University for at least one year, has the approval of the Dean or corresponding university officer of his Faculty as to general academic standing, and is of good standing among his fellow students. The loan to any student shall not exceed \$100 in any one year, nor \$300 in total amount. Loans shall not bear interest until the beneficiary, or the class of which he was a member, has graduated; and it shall be repayable within five years from this graduation date. For further information apply to the President.

Academic Costume.

Undergraduates, Matriculants and Special students attending more than one class are entitled to wear gowns at lectures and all meetings of the University. The forms prescribed are the Oxford undergraduate gowns of black stuff with sleeves, and the black tunic with tassel.

Graduates of the University shall be entitled to wear gowns and hoods of black stuff. The distinctive

Conferring of Degrees

part of the costume is the lining of the hood which for the various degrees is as follows:

- B. A.—White silk bordered with white fur.
- M. A.—Crimson silk.
- B. Sc.—White silk bordered with scarlet silk.
- M. Sc.—Scarlet silk.
- B. E.—White silk bordered with dark green silk.
- B. Mus.—White silk bordered with lavender silk.
- Phm. B.—White silk bordered with dark blue silk.
- LL. B.—White silk bordered with gold coloured silk.
- M. D., C.—Scarlet silk bordered with white silk.
- D. D. S.—Scarlet silk bordered with gold coloured silk.
- LL. D.—Purple silk.

Doctors of Laws shall be entitled to wear gowns and hoods of black silk.

Conferring of Degrees.

Successful candidates for degrees are required to appear at Convocation in the proper academic costume to have the degrees conferred upon them.

By special permission of the Senate degrees may be conferred in *absentia*. (For fee see p. 57).

Faculty of Arts and Science

General University Regulations.

University regulations applicable to the students of all Faculties and relating to registration, residence, church attendance, discipline, etc., will be found on pp. 17-21.

Academic Year.

The Academic Year consists of one session of about thirty two weeks duration. The session of 1921-22 will begin on Wednesday, September 28th, 1921, and end on Thursday, May 11th, 1922.

Degrees and Courses.

Courses are prescribed leading to the degrees of Bachelor of Arts (B. A.), Master of Arts (M. A.), Bachelor of Science (B. Sc.), Master of Science (M. Sc.), Bachelor of Music (B. Mus.), Bachelor of Pharmacy (Phm. B.), and Bachelor of Commerce (B. Com.), and to the Diploma of Licentiate of Music (L. Mus.). A course in Engineering, extending over two or three years, is prescribed for students who look forward to subsequently completing a course in Civil, Mechanical, Electrical or Mining Engineering at the Nova Scotia Technical College, or other technical institution.

The courses for the degrees of Bachelor of Arts and of Science extend over four years. Candidates for these degrees may either follow the corresponding Ordinary course, or, if they have obtained a sufficiently high standing in the work of the first two years, may in their third year enter upon a course leading to the degree of Bachelor of Arts or of Science with Honours.

The degree of Bachelor of Arts or of Science with Distinction is awarded to a student who obtains a sufficiently high standing in the classes of the Ordinary course.

The degree of Master of Arts or of Science is given for the successful completion of an approved course of graduate work extending over at least one year.

The course of study for the Diploma of Licentiate of Music extends over two years, and that for the degree of Bachelor of Music over three years.

The degree of Bachelor of Pharmacy is awarded for the successful completion of a course extending over two years.

Ordinary Course for Bachelor of Arts.

The Ordinary course of study prescribed for the degree of Bachelor of Arts consists of the following twenty classes:

- (i) Two classes in either Latin or Greek.
- (ii) Two classes in one, not already chosen, of the following languages: Latin, Greek, French, German.
- (iii) Two classes in English.
- (iv) History I, Philosophy I, Mathematics I.
- (v) One class in either Physics or Chemistry.
- (vi) One class in Physics, or Chemistry, or Biology I, or Geology I.
- (vii) Latin 3, or Greek 3, or French 3, or German 3, or Economics I, or Government I, or Political Science I.
- (viii) Eight other classes, selected from the following list:

Latin,	History,	Mechanics,
Greek,	Economics,	Physics,
Biblical Literature,	Government,	Chemistry,
French,	Political Science,	Geology,
German,	Philosophy,	Biology,
English,	Mathematics,	Physiology.

For details of subjects studied in the above classes see Courses of Instruction, p. 58, *et seq.*

Choice of Elective Classes.

Latin 1, Greek 1, French 1 and German 1 are not recognized as part of a course for a degree unless the corresponding second class is subsequently taken.

An advanced or Honour class may be taken as an elective by students who are not in an Honour course, if approved by the Faculty.

Lists of the elective classes chosen by students must be submitted for approval not later than Wednesday, October 12th, 1921.

Affiliated Courses.

An undergraduate looking forward to the study of Divinity, Law, Medicine or Engineering may offer one of the following groups in place of three of the eight electives required above:-

- A. For Divinity.—Hebrew, New Testament Greek.
- B. For Law.—Constitutional History, Contracts, Torts, Crimes.
- C. For Medicine.—Practical Anatomy (first year), Histology, Embryology.

D. For Engineering.—Drawing 1, Drawing 2, Graphical Statics, Kinematics of Machines.

Graduates who have passed in the classes of group B may complete a subsequent Law course in this University in two years.

Students registered as undergraduates in Medicine, whose course in Arts has included Physics 1, Chemistry 1A, Biology 1B, and the subjects of group C, may complete a subsequent course in Medicine at this University in four years; and if their Arts course has also included Chemistry 3 and 4, Anatomy 1, Physiology 1 and 3, and they have taken Practical Anatomy (second year), Biochemistry, Bacteriology and Practical Materia Medica as additional classes, they may complete a subsequent course in Medicine in three years.

An undergraduate who elects group D, and also includes in his Arts course the other classes common to it and the course in Engineering, and who takes Surveying, Drawing 3, and Materials of Construction as extra classes, may complete the subsequent work for a degree in Engineering in two years.

Order of Classes.

The classes of a course may be taken in any order, subject to the regulations regarding admission to classes (page 45). The following schedule in which the classes are arranged in years shows the order recommended for undergraduates; but students who intend to take one of the Affiliated Courses, or to enter an Honour Course, should consult the Registrar early in their course about the right order of classes for the purpose.

Affiliated Courses.

25

First Year.

1. Latin 1, or Greek 1.
2. One, not already chosen, of Latin 1, Greek 1, French 1, German 1.
3. English 1.
4. Mathematics 1.
5. Chemistry 1 or 1A, or History 1.

Second Year.

1. The language chosen as class 1 in the first year.
2. The language chosen as class 2 in the first year.
3. English 2.
4. Philosophy 1, or History 1.
5. A class in one of the following—Mathematics, Mechanics, Physics, Chemistry, Economics, Government, Political Science.

Third and Fourth Years.

2.—10. The remaining required classes and elective classes from the subjects specified on page 23.

Ordinary Course for Bachelor of Science.

The Ordinary course of study prescribed for the degree of Bachelor of Science consists of the following twenty-one classes:

- (i) Two in each of the following: English, French, German.
- (ii) One in each of the following: Mathematics, Physics, Chemistry, Drawing.
- (iii) Eleven classes, so selected from the following groups that at least one class shall be chosen from each group, and not more than four from groups II and III taken together:
 - I. Mathematics, Mechanics, Physics, Chemistry, Geology, Biology, Physiology.
 - II. Philosophy, History, Economics, Government, Political Science.

III. English, French, German, Latin, Greek.

The details of subjects studied in the above classes will be found under Courses of Instruction, p. 58, *et seq.*

In choosing their elective classes students should have regard to the restrictions stated under Choice of Elective Classes in the course for the degree of Bachelor of Arts (page 23).

Lists of the elective classes chosen must be submitted for approval not later than Wednesday, October 12th, 1921.

Affiliated Courses.

An undergraduate looking forward to the study of Engineering may offer the classes of Group A below instead of four of the electives required from group I above:

A. For Engineering.—Drawing 2 and 3, Surveying, Graphical Statics, Kinematics of Machines, Materials of Construction.

An undergraduate who elects group A and also includes in his Science course the other classes common to it and the course in Engineering, may complete the subsequent work for a degree in Engineering in two years.

An undergraduate looking forward to the study of Medicine may offer the subjects in group B below for three in group I above:

B. For Medicine.—Practical Anatomy (first year), Histology, Embryology.

Students registered as undergraduates in Medicine whose course in Science has included Physics 1, Chemistry 1A, Biology 1, and the subjects of group B, may complete a subsequent course in Medicine at this University in four years; and if their Science course has also included Chemistry 3 and 4, Anatomy 1, Physiology 1 and 3, and they have taken Practical Anatomy (second year), Biochemistry, Bacteriology and Practical Materia Medica as additional classes, they may complete a subsequent course in Medicine in three years.

Order of Classes.

The classes of a course may be taken in any order, subject to the regulations regarding Admission

Admission to Advanced Standing.

to Classes (page 43). The following schedule in which the classes are arranged in years shows the order recommended for undergraduates; but students who intend to take one of the Affiliated Courses, or to enter an Honour Course, should consult the Registrar early in their course about the right order of classes for the purpose.

First Year.

1. French 1.
2. German 1.
3. English 1.
4. Mathematics 1.
5. Physics, or Chemistry 1A.
6. Drawing 1.

Second Year.

1. French 2.
2. German 2.
3. English 2.
4. Physics, or Chemistry 1A.
5. A class in one of the following:—Mathematics, Chemistry, Geology, Biology.

Third and Fourth Years.

1. A class from Group III.
- 2—10. Nine classes, selected in accordance with the requirements stated above (p. 24).

Admission to Advanced Standing.

Students may enter the University on Advanced Standing, that is, be given credit for certain classes of the first year, and thus have the opportunity of completing a course for a degree in Arts or Science in three years, as follows:—

A student entitled to Matriculant or Undergraduate standing in Arts or Science, who presents one of the certificates specified below, will be given credit after completing a subsequent class in the same subject, or, in the case of Mathematics 1, a Science class, for such

classes in the following list, not exceeding five in number, as the certificate warrants:

Latin 1, Greek 1, French 1, German 1, English 1. Mathematics 1.

A candidate will be allowed Supplementary examinations in the subjects required to complete five classes, provided the certificate shows a mark of at least 80 per cent in such subjects and the candidate has credit for the corresponding Matriculation subjects. No credit shall be given for certificates obtained subsequent to registration in the University for the first time. The certificates to which these provisions apply are the following.

- (a) High School Certificate of Grade XII of Nova Scotia;
- (b) Honours Diploma, as issued by the Prince of Wales College, P. E. I.;
- (c) Grammar School License of New Brunswick;
- (d) Diploma of the Senior Associate Grade, as issued by the Education Department of Newfoundland;
- (e) Equivalent Certificates issued by Education Departments of other Provinces.

The above privilege of taking Supplementary examinations on certain subjects of the first year, granted to the holders of specified certificates, may be granted also to other candidates who in the opinion of the Committee on Admission have equivalent qualifications.

Degree of Bachelor with Distinction.

The degree of Bachelor of Arts or of Science with Distinction will be conferred on undergraduates for special excellence shown in the classes of the Ordinary course. The award of such degree is based upon the Class Distinctions (page 47) gained by candidates; and not only are the number and grade of such Distinctions considered, but also the extent and character of the work by which they have been gained. Distinctions gained in recognized classes of other Faculties of the University are taken into consideration, but not those gained in other colleges, though such classes may be recognized for the degree.

Candidates for Distinction are advised to consult the Faculty with respect to the selection of classes.

*The standard required is 80 per cent. in each subject. For Mathematics an aggregate of 120 is required in the three subjects of algebra, geometry and trigonometry.

Degree of Bachelor with Honour.*

Degree of Bachelor with Honours.

An undergraduate who has passed in at least nine classes of the Ordinary Arts or Science course with sufficient credit is allowed to restrict his attention during his third and fourth years to a more limited range of subjects than that prescribed for the Ordinary course, by entering an Honour course.

A candidate for admission to an Honour Course must obtain the permission of the Faculty, which will in ordinary circumstances be granted only to students who have attained a high standing in the classes preliminary to the Honour course selected (see statement of Honour courses below); and the candidate should, accordingly, plan his course so as to take these preliminary classes during his first two years.

Before graduation he must have passed in the following classes: (a) Two in each of two foreign languages, of which, in Arts, Latin or Greek must be one. (b) Two in English. (c) One in Mathematics. (d) One in Physics or Chemistry.

In all cases the number of classes required for the degree shall not be less than twenty.

Honour courses are provided in the following departments:—(i) Classics, (ii) Latin and English, (iii) Greek and English, (iv) English and English History, (v) History, Economics and Politics, (vi) Philosophy, (vii) Mathematics, (viii) Physics, (ix) Chemistry, (x) Geology and Geological Chemistry. Undergraduates in Arts may enter any of these courses for which they are eligible. Undergraduates in Science may enter any of the last five courses for which they are eligible.

An undergraduate who enters upon an Honour course in any of the above departments must take the advanced classes in the department chosen and certain other classes specified below in the requirements for the individual courses, and is required to make satisfactory progress in these classes. He may select the remaining classes of his course, if he is an undergraduate in Arts, from any of the subjects of the Ordinary course in Arts, and if an undergraduate in Science, from any of the subjects of the Ordinary course in Science, the choice in each case being subject to the approval of the Faculty.

The examinations in the subjects of an Honour course are held at the end of the last year of the course.

A candidate for Honours may defer his examination in the subjects of his course until a year after he has passed the examinations in the Ordinary subjects of the fourth year; in which case, however, such candidate shall not be entitled to his degree until he has passed the examination of such Honour course.

Successful candidates will be declared to have obtained their degrees with Honours, with High Honours, or with High Honours and a Medal.

Honour Courses.

I. Classics.

Preliminary Classes.—Latin 1 and 2, and Greek 1 and 2.

Candidates taking the Honour Course in Classics are required to take Latin 3, 4, 5 and 6 and Greek 3, 4, 5 and 6 in their third and fourth years, and sufficient elective classes to complete the total of twenty classes required for a degree. The special Honour examinations will be on the following subjects; but the standard of attainment shown in Latin 3 and 4 and Greek 3 and 4 will be considered in the final award.

Latin.

A. Candidates will be required to have a critical knowledge of the following works, in addition to those prescribed in the ordinary course:

Plautus: *Capitoli, Miles Gloriosus*. Terence: *Adelphi, Phormio, Vergili Georgics*, I, IV. Horace: *Epidi*, I, II; *Ars Poetica*. Juvenal: *Satires*, I, VII, VIII, XIV. Cicero: *De Oratore*, I; *Philippic*, I, II.; *Pro Cluentio*. Livy: XXI, XXII. Tacitus: *Anals*, I, II; *Agricola*. Pliny: *Letters*, Bks. I-III.

B. Composition.—Translation from English into Latin prose.

C. Literature.—A general knowledge of the history of Latin literature with a more minute knowledge of the lives and writings of the authors prescribed. (Mackail: *Latin Literature*. Cruttwell: *History of Roman Literature*).

D. Translation at Sight.—Passages from Latin books not prescribed will be set.

Honour Courses.

Greek.

A. Aeschylus: *Eumenides, Prometheus Vinctus*. Sophocles: *Ajax, Oedipus Rex*. Aristophanes: *Frogs, Knights*. Homer: *Odyssey*, V-VIII. Thucydides, II, III. Plato: *Republic*, I-IV. Demosthenes: *De Carentia*. Aristotle: *Poetics*.

B. Composition.—Translation from English into Greek prose.

C. Literature.—A general knowledge of the history of Greek literature, with a more minute knowledge of the lives and writings of the authors prescribed (Jebb: *Primer of Greek Literature*; Homer: Mahaffy: *History of Greek Literature*. Haigh: *Attic Theatre*).

D. Translation at Sight.—Passages from Greek books not prescribed will be set.

II. Latin and English.

Preliminary Classes.—Latin 1 and 2, and English 1 and 2. Prospective candidates are strongly recommended to come to two classes in German.

Candidates taking the Honour Course in Latin and English are required to take Latin 3, 4, 5 and 6 and English 3, 4, 5, 6 and 7 in their third and fourth years, and sufficient elective classes to complete the total of twenty classes required for a degree. The special Honour examinations will be on the following subjects; but the standard of attainment shown in Latin 3 and 4 and English 3, 4 and 5 will be considered in the final award.

Latin.

The Latin subjects prescribed for the Honour course in classics.

English.

The historical development of the language and literature to the year 1300. Bright: *Anglo-Saxon Reader*. Sievers: *O. E. Grammar* (trans., by Cook), Pt. II. Morris: *Specimens of Early English*, I. Emerson: *History of the English Language*. Sight reading of Old English.

History of the Elizabethan and Early Stuart Literature.—Sidney: *Apology for Poetry*. Hooker: *Ecclesiastical Polity*, Book I. Bacon: *Advancement of Learning, Essays*.

Marlowe: *Tamburlaine, Edward II, The Jew of Malta*. Greene: *Friar Bacon and Friar Bungay*. Jonson: *The Alchemist, Every Man in His Humor*. Beaumont and Fletcher: *Philes*, *The Knight of the Burning Peale*. Massinger: *A New Way to Pay Old Debts*. Webster: *The Duchess of Malfi*. Shakespere: *Titus*.

Andromache, Romeo and Juliet, Julius Caesar, Hamlet, Othello, Lear, Macbeth, Antony and Cleopatra, Coriolanus, Timon, The Two Noble Kinsmen.

Books recommended: Sidney, Cook's edition (Ginn & Co.). Hooker, Church (Clarendon Press). *Admiral, Admetus*, Wright (Cle. Press). Essex, Wright (T. T. Sowerby). *History of Literature*; Ten Best, Sopwith; Brooke (Clarendon Press). "Mermaid," "Temple Dramatic," "Sister Letters," and other editions of Elizabethan works.

III. Greek and English.

For the requirements in this course read "Greek" for "Latin" in the above course.

IV. English and History.

Preliminary Classes.—English 1 and 2 and History 1. Prospective candidates must arrange to take these classes during their first two years if they desire to complete the work for a degree in four years.

Candidates taking the Honour Course in English and History are required to take English 3, 4, 5, 6 and 7, and History 2, 3 and 4, and any special Honour class in History offered, in their third and fourth years, and sufficient elective classes to complete the total of twenty classes required for a degree. The special Honour examinations will be set on the following subjects; but the standard of attainment shown in English 3, 4 and 5 and History 2, 3 and 4 will be considered in the final award.

English.

The English subjects prescribed for the Honour course in Latin and English.

History.

The History subjects prescribed for the Honour course in History, Economics and Politics. (See below).

V. History, Economics and Politics.

Candidates desiring to take the Honour course in History and Economics and to complete the work for a degree in four years must take History 1 and Economics 1 in their first two years. They are required to take a minimum of four additional courses in History and four in Economics, including History 2, 3 and 4 and Economics 2 and 3, if these are offered, and any special Honour classes in History and Economics offered, in their third and fourth years; and in addition to the

required classes they must have taken during their course sufficient elective classes to complete the total of twenty classes required for a degree. The special Honour examinations will be set on the following subjects; but the standard of attainment shown in History 2, 3 and 4 and Economics 2 and 3 will be considered in the final award.

Preliminary Classes.—History 1 and Economics 1.

History.

A. British History under the Tudors and Stuarts.—Innes: *England under the Tudors*. Trevelyan: *England under the Stuarts*. Gardiner: *Oliver Cromwell*. Lodge: *Political History of England*. Prothero: *States and Constitutional Documents*. Gardiner: *Constitutional Documents of the Puritan Revolution*.

B. European History in the Sixteenth and Seventeenth Centuries.—Johnston: *Europe in the Sixteenth Century*. Wake-man: *Ascent of France*. Kitchin: *History of France*. Simond: *Italian Republics*. Fletcher: *Gustavus Adolphus*. Gardiner: *Thirty Years War*. Lodge: *Rochefoucauld*. Cambridge Modern History.

C. The Crusades.—Archer and Kingsford: *The Crusades*. Stevenson: *The Crusaders in the East*. Lane-Poole: *Soldia*. Archer: *The Crusade of Richard I*. Von Sybel: *History and Literature of the Crusaders*.

D. History of Canada since 1763.—Canada and Its Provinces (selected portions). Bourinot: *Canada under British Rule*. Murray: *Canadian Constitutional Development*. Short and Doughty: *Canadian Constitutional Documents*.

Economics.

A. Problems of Production.—Marshall: *Principles of Economics*. Jenks: *The Trust Problem*. MacGregor: *Industrial Combination*. Fay: *Cooperation at Home and Abroad*. Price: *Co-operation and Co-partnership*. Shadwell: *Industrial Efficiency*. Jones: *Economic Crisis*.

B. Money and Banking.—Jevons: *Money*. Scott: *Money and Banking*. Nicholson: *Money and Monetary Problems*. Walker: *Money*. Bagehot: *Lombard Street*. Conant: *Modern Banks of Issue*. Clare: *A. B. C. of the Foreign Exchanges*.

C. Taxation and Public Finance.—Bastable: *Public Finance*. Seligman: *Essays in Taxation*. Jones: *Nature and First Principles of Taxation*. Ashley: *Modern Tariff History*. Nicholson: *Principles of Political Economy*, Vol. III.

D. Labour.—Webbe: *Industrial Democracy and Problems of Industry*. Hobhouse: *The Labour Movement*. Estey: *Syndicalism*. Cole: *The World of Labour*. Jevons: *The State in relation to Labour*.

Similar Honour courses in History and Politics, and in Economics and Politics will be offered, the syllabus of the work in Politics will be announced later.

VI. Philosophy.

Preliminary Class. — Philosophy I.

Candidates taking the Honour course in Philosophy are required to take Philosophy 2, 3, 4, 5, 6, 7 and 8 and any special Honour classes in Philosophy offered, in their third and fourth years, and sufficient elective classes to complete the total of twenty classes required for a degree. The special Honour examinations will be set on the following subjects; but the standard of attainment shown in Philosophy 2, 3, 4, 5, 6, 7 and 8, will be considered in the final award.

A. *Logic*.—Welters: *Manual of Logic* (2 vols.). Mill: *System of Logic*. Venn: *Empirical Logic*. Bradley: *Principles of Logic*.

B. *Psychology*.—Stout: *Manual of Psychology*. James: *Principles of Psychology*. McDougall: *Social Psychology*.

C. *Metaphysics*.—Taylor: *Elements of Metaphysics*. Bradley: *Appearance and Reality*.

D. *Ethics*.—Mackenzie: *Manual of Ethics*. Moore: *Principles of Ethic*. Sidgwick: *Methods of Ethics, and History of Ethics*. Green: *Prolegomena to Ethics*. Rashdall: *Theory of Good and Evil*.

E. *History of Modern Philosophy*.—Locke: *Essay on the Human Understanding*, I, II, V. Berkeley: *Principles of Human Knowledge*, *New Theory of Vision*, *Dialogues between Hylas and Philonous*. Hume: *Inquiry into Human Nature*. Kant: *Critique of Pure Reason*, to the end of the Transcendental Dialectic.

F. *History of Greek Philosophy*.—Burnet: *Early Greek Philosophy*. Adam: *Religious Teachers of Greece*. Plato: *Republic*, I-III, V, VI, VII. Aristotle: *Ethics*, I-III, VII, X.

VII. Mathematics.

Preliminary Classes.—Mathematics 1, 2, 3 and 4, and Physics 1, or 2 and 3.

Undergraduates taking the Honour course in Mathematics are recommended to take German and Physics 1 or 2 and 3 in their first and second years. They are required, if they wish to complete the work for a degree in four years, to take in their third and fourth years four advanced classes in Mathematics, Mechanics 2, and Physics, 4, 5, 7 and 10. The standard of attainment shown in the examinations in Physics 4 and 5 will be considered in the final award.

Honour Courses.

The special Honour examinations will be set on the following subjects:—

Pure Mathematics.

Any four of the following:—

- (a) Infinitesimal Calculus; (b) Plane and Solid Analytic Geometry; (c) Differential Equations; (d) Algebra (Determinants, Theory of Equations, Quantities, Invariants, Series, Functions of a real variable); (e) Projective Geometry.

Applied Mathematics.

Problems in Mathematical Physics given in Physics 7 or appointed for private reading. The solution of these problems involves the use of Analytical Geometry, Calculus, Differential Equations and Vector Analysis.

VIII. Physics.

Preliminary Classes.—Mathematics 1, 2, 3 and 4, and Physics 2 and 3.

Undergraduates taking the Honour course in Physics are recommended to take German, and Physics 2 in their first year, and Physics 3 and Chemistry 2, in their second year. They are required, if they wish to complete the work for a degree in four years, to take in their third year one advanced class in Mathematics, Physics 4 or 5, and Mechanics 2, and in their fourth year one advanced class in Mathematics, Physics 5 or 4, and Physics 7 and 11. The standard of attainment shown in the examinations in Physics 4 and 5 will be considered in the final award.

Those who aim at High Honours will be expected either to prepare a thesis embodying the results of a short original investigation, or to exhibit a high standard of excellence in the more mathematical parts of the course.

The special Honour examinations will be set on the following subjects:—

Mathematics.

Analytical Geometry and Calculus as in Mathematics 3 and 4, and any two of the advanced courses in Pure Mathematics.

Physics.

The entire subject-matter of Physics 2, 3, 4, 5, 7, 11, and Mechanics 2. Several papers will be set, and no one will

cover merely the work of a single class, but the papers will be arranged to test (1) the student's general knowledge of the more elementary parts of the subject, (2) his grasp of the more advanced parts of the subject which have been taken up in lectures, and (3) his ability to work up some part of the subject without the aid of lectures.

IX. Chemistry.

Preliminary Classes.—Chemistry 1A and 2, Physics 1, Mathematics 1, 2, 3 and 4. Two classes in German are recommended.

In order to complete this course in four years it is necessary to take Mathematics 1, 2, 3, 4, Physics 1, Chemistry 1A and Chemistry 2, in the first and second years; and Physics 4, 5, and 10, Chemistry 5, 6, 7 and 8, in the third and fourth years.

Candidates for High Honours will be expected either to prepare a thesis embodying the results of a short original investigation, or to show special attainments in some branch of laboratory work, as special branches of analysis, or the preparation of organic compounds. The standard of attainment shown in Physics 4 and 5 (Distinction courses), Physics 10, and Chemistry 5, 6, 7 and 8 will be considered in the final award.

The special Honour examinations will be set on the following subjects:

A. Inorganic and Physical Chemistry.—Mellor: *Modern Inorganic Chemistry*, Ostwald: *Principles of Inorganic Chemistry*, Bigelow: *Theoretical and Physical Chemistry*, Jones: *Elements of Physical Chemistry*. Selected portions of E. Blasé's Text-book of Electro-Chemistry, and of Text-books of Physical Chemistry, edited by Sir William Ramsay. The requirements in Physical Chemistry are in large part covered by the class-work of Chemistry 6.

B. Organic Chemistry.—Berthelot: *Organic Chemistry*, Lachman: *Spirit of Organic Chemistry*, Stewart: *Recent Advances in Organic Chemistry*, Cohen: *Organic Chemistry* (selected chapters).

C. History of Chemical Theory.—The development of chemical theory as treated in Chemistry 5 with the prescribed supplementary reading. Candidates are required to have a thorough knowledge of the following memoirs:—Graham: *Researches on the Arseniates, Phosphates, and Modifications of Phosphoric Acid* (Alembic Club Reprints, No. 10), Liebig and Woehler: *Über das Radikal der Benzoesäure* (Ostwald's Klassiker, No. 22); Liebig: *Über die Constitution der organischen Säuren* (Ostwald's Klassiker, No. 26).

D. Laboratory Methods.—The principles and methods of analysis and of the preparation of inorganic and organic substances, as in Chemistry 7 and 8, including Distinction work.

X. Geology and Geological Chemistry.

Preliminary Classes.—Geology 1, Physics 1, Chemistry 1A and 2, and Biology 2 and 3.

Prospective candidates are recommended to take German.

The special Honour examinations will be set on the following subjects:—

(a) General Geology; (b) Mineralogy; (c) Petrography; (d) Economic Geology; (e) Geological Chemistry.

Master of Arts and Master of Science.

A candidate for the degree of Master of Arts or Master of Science must hold the corresponding Bachelor's degree from a College or University recognized by the Senate for the purpose, and have held it for at least one year, and be of good character and standing. The course of study for the degree shall be confined to one subject, or two closely related subjects, and must be submitted to, and receive the approval of, the Faculty of Arts and Science at the beginning of candidacy. The course shall consist of work in advance of that given in the ordinary undergraduate classes; but some of the more advanced undergraduate classes may be a part of it, provided these have not been part of the work of the candidate for the Bachelor's degree. The course shall comprise work amounting to not less than that of five classes, and designed to occupy the candidate's time for not less than forty hours per week for a session, class attendance and time spent on preparation being included. The work may be done wholly or in part by private reading by graduates of Dalhousie University, for whom attendance at the University is not necessary; all other candidates must be in residence.

The course of study for the Master's degree shall be arranged for each candidate by the department chiefly concerned, due consideration being taken of the candidate's preparation, needs and aims. In case of de-

sufficient preparation for what the department regards as proper graduate work, prerequisite undergraduate classes may be prescribed, but such classes shall not count as part of the work for the degree.

An essay or thesis may be required of the candidate. When required, it shall be regarded as forming one-fifth of the full course of study, and should occupy one-fifth of the candidate's time for the session. This restriction, however, shall not apply to the departments of Physical Science. Theses must be sent to the Secretary of the Faculty on or before the first of March.

An undergraduate who, at the beginning of a session, has fewer than five classes to complete in order to obtain the Bachelor's degree, may be permitted, with the approval of the Faculty, to take not more than two advanced classes with a view to including such class or classes in a subsequent course for the Master's degree.

A candidate for a Master's degree must complete the entire work of his course before being admitted to any examinations for the degree, and the time over which such examinations may extend shall not exceed a fortnight. The pass mark shall be fifty per cent. in each subject. Examinations shall be held ordinarily at the time of the Spring examinations; but in special circumstances, they may be held in the Autumn. Candidates must give one month's notice to the Secretary of the Faculty of their intention to appear for examination, and the fee must accompany the notice.

Uniform Course for all Branches of Engineering.

This course is intended for students who look forward to taking a degree in Civil, Electrical, Mechanical or Mining Engineering. It covers the first two years of a course for such a degree, and corresponds to the requirements prescribed for admission to the courses for a degree in Engineering in the Nova Scotia Technical College, or to entrance into the third year of other engineering institutions. A Diploma is given for successful completion of the Course.

The minimum work of the course is so arranged that it can be covered in two years, but students are advised (unless they already have grade XII standing in Eng-

lish, Algebra, Geometry and Trigonometry) that it is preferable that they should give three years to the course, taking extra classes in English, Geology and Chemistry, and thus lay a better foundation for an engineering career.

The minimum necessary and essential preliminary requirements in order to enter upon the course in Engineering are:—Matriculation in (a) English, (b) Algebra, (c) Geometry, and (d) Physics or Chemistry; but before a student will be admitted to the Nova Scotia Technical College, or third year of any other institution in which he is to take the final two years of his course, he must have matriculation in (e) History and Geography, (f) French or German, and (g) Latin. French 1 or German 1 (or 50 per cent. in the corresponding grade XII examination) may be substituted for matriculation Latin.

First Year.—English 1, Mathematics 1 and 2, Physics 2, Chemistry 1A, Drawing 1 and 2.

Second Year.—Mathematics 3 and 4, Physics 3, Mechanics 2, 3, 4 and 5, Surveying, Drawing 3.

For details of the work in the classes see p. 58 *et seq.*

The schedules of courses for students who enter with grade XII standing in English and Mathematics and for those with grade XI standing who are willing to give three years to the course may be had on application.

Degree of Bachelor of Commerce.

The course of study prescribed for the degree of Bachelor of Commerce may be completed in four years. The whole course has not yet been determined but a tentative outline for the first two years is as follows:

First Year.—French 1 or German 1 or Spanish 1, English 1, Mathematics 1, Economics 1, Economic Geography, Accounting 1.

Second Year.—French 2, or German 2 or Spanish 2, English 2, History 7, Accounting 2, Biology 1, or Chemistry 1A or Physics 1, Marketing, and Business Organization.

Further details of this course will be obtainable on application to the office of the University.

Degree of Bachelor of Music.

The course for the degree of Bachelor of Music may be completed in three years. Candidates for the degree may be students of the pianoforte, or organ, or violin, or voice. Candidates are required to pass the examinations in the subjects of the course, to submit the prescribed compositions, and to satisfy the examiners of their proficiency as musical performers by passing the prescribed practical tests. In addition, before proceeding to the examinations of the final year they must have completed Matriculation and must have satisfied the department of Modern Languages that they have a good reading knowledge of French and German.* The examinations in theory are the same for candidates in all branches of music.

Examinations.

The examinations are arranged in three groups or years. The examinations in any one group may be taken in a single year, and a candidate must have passed in all the subjects of a given group or year before proceeding to the examinations of the following one. The papers shall be set in accordance with the following schedule:

First Year.

1. Harmony in not more than four parts.
2. Analysis of Harmony.
3. Strict Counterpoint in two and three parts.
4. History of Music from the beginning of the Christian era down to 1750.
5. English 1.

Second Year.

1. Harmony in not more than five parts.
2. Strict Counterpoint in three and four parts.
3. Double Counterpoint in the octave in two parts.
4. Canon and Imitation in two parts.
5. Fugue as far as subject and answer.
6. History of music since 1750.
7. English 2.

Third Year.

1. Strict and Free Counterpoint in not more than five parts.
2. All forms of Double, Triple and Quadruple Counterpoint; Canon and Imitation in two, three and four parts.

*To meet this requirement candidates are advised to read carefully six hundred pages of French and four hundred pages of German, of a varied character, in addition to the amount of reading required for Matriculation.

Degree of Bachelor of Music.

41

3. Strict and Free Fugue in not more than five parts.
4. Analysis of Form.
5. Acoustics, in its relation to the Theory of Music.
6. Orchestration.
7. Analysis of a Full Orchestral Score.

The University provides instruction in English, Acoustics, French and German. Instruction in the professional subjects may be obtained at the Halifax Conservatory of Music, or other institution recognized for this purpose by the Senate.

Candidates for examination must make application in accordance with the Regulations for Courses in Music (See p. 42).

Practical Tests.

The Practical Tests are held only at the time of the corresponding examinations, and an application for examinations is considered as an application for the practical tests also. The practical tests of each of the three years are those given in detail in the calendar of the Halifax Conservatory of Music. A certificate of having passed the practical tests of the first year in an approved institution may be accepted, but those of the second and third years must be taken at this University.

Compositions.

Candidates shall compose the following exercises, which are to be submitted at or before the final examinations for the degree:—

- (a) A solo song with pianoforte accompaniment.
- (b) A four-part vocal composition.
- (c) An instrumental composition (other than a dance) for pianoforte, organ, or other stringed or wind instruments, with pianoforte accompaniment.

Diploma of Licentiate of Music.

The Diploma of Licentiate of Music in Pianoforte, or Organ, or Violin, or Voice will be granted candidates who complete two years of the course for the degree of Bachelor of Music by passing the examinations and practical tests of the first and second years.

General Regulations for Courses in Music.

Candidates for any examination must have passed Matriculation in English (see p. 12).

Candidates who present certificates from a recognized institution of having attended approved courses of instruction in the subjects of the first year; and of having passed examinations on them accepted as equivalent to those of this University, and of having satisfied the corresponding practical tests set by that institution, may be exempted from the examinations and practical tests in the subjects of the first year. The examinations and practical tests of the second and third years must be taken at this University.

Candidates who hold the Diploma of Licentiate of Music of this University are exempted from the examinations and practical tests of the first and second years of the course for the degree of Bachelor of Music.

The regular examinations are held in April, or at such other times as the Faculty of Arts and Science may appoint. Supplementary and Special examinations are held in September and January only. (See University Almanac.)

Candidates for any examination must make application to the Secretary of the Faculty of Arts and Science not later than March 26th, the application being accompanied by the proper fee (see p. 56), and by certificates of having attended approved courses of instruction in the professional subjects of the examinations and of having satisfactorily completed the work of such courses.

Degree of Bachelor of Pharmacy.

The degree of Bachelor of Pharmacy will be conferred upon candidates who have fulfilled the conditions and passed the examinations outlined below.

Candidates for the degree must have completed Matriculation. (pp. 11-13.).

Every candidate must submit evidence to satisfy the Faculty that he has served as assistant to a duly registered druggist for not less than four years (not being engaged in any other business), during at least two years of which period he has been employed in dispensing prescriptions; and that he has complied with all the requirements prescribed from time to time

for admission to examination qualifying for Registration by the Province in which he is resident.

Every candidate must present certificates showing that in all those subjects of the course prescribed for the degree in which instruction is not offered in this University, he has attended full courses of lectures and laboratory work at a College of Pharmacy recognized for this purpose by the Senate. The University provides courses in Physics, Chemistry, Botany, Bacteriology and Materia Medica, which must be attended by the candidate. Instruction in the other subjects of the course may be obtained at the Maritime College of Pharmacy, which is affiliated with the University, or at another recognized institution.

Course for Degree.

The classes of the prescribed course are shown in the following schedule, in which the time devoted to lecture and laboratory work respectively is stated in equivalent hours per week for a year; but the course extends over two years. The classes in Physics, Chemistry and Botany will be found described under Courses of Instruction of the Faculty of Arts and Science (p. 58 *et seq.*); the classes in Bacteriology and Materia Medica, in the Faculty of Medicine; and the remaining classes, in the Calendar of the Maritime College of Pharmacy.

Examinations.

The examinations will be held in April. Applications accompanied by the proper certificates and fees (see p. 57) must be made to the Secretary of the Faculty

of Arts and Science at least one month before the date of examination.

The papers shall be set in accordance with the following schedule:

1. Theoretical and Practical Physics.
2. Theoretical and Practical Chemistry.
3. Botany, including Pharmacognosy.
4. Theoretical and Practical Bacteriology.
5. Materia Medica.
6. Theory and Practice of Pharmacy, including Pharmaceutical Materia Medica, Prescriptions and Dispensing.

Other Pharmacy Courses.

The Maritime College of Pharmacy, with the co-operation of some members of the staff of the University, offers two other courses in Pharmacy, a Short Course for Pharmacy Clerks, and a Qualifying Course required of those who desire to become Registered Pharmacists. These courses are carried on in the University buildings, and the students are subject to University regulations and discipline.

The Short Course for Pharmacy Clerks will begin Thursday, Aug. 25th, 1921, and continue until September 29th, and is intended to prepare the student for the Certified Clerks' Examination of the Pharmaceutical Society. It is expected that students will have a general education at least equal to that of Grade IX. Attendance on this course will be of special value to those who intend to take the Qualifying Course later.

The Qualifying Course begins on Monday, Sept. 26th, 1921, and ends with the University session. The courses in Chemistry, Botany and Microscopy, Materia Medica, Pharmacy, Prescriptions and Dispensing and Economics, are designed to prepare the student to pass the final licensing examinations of the N. S. Pharmaceutical Society. It is necessary that students shall have a good general education, preferably equal to that of Grade XI.

For the calendar of the Maritime College of Pharmacy, and for all information, address G. A. Burbidge, Secretary, 135 Hollis St., Halifax, N. S.

General Faculty Regulations.

Admission to Classes.

1. Candidates for a degree must pass the Matriculation examinations (pp. 11-14). Only those classes which a student attends as an Undergraduate or Matriculant are recognized as qualifying for a degree in Arts or Science. In order to be a Matriculant in this Faculty the student must have passed Matriculation in English and at least three other subjects of Matriculation.

2. A Matriculant pursuing a course for a degree in Arts or Science and wishing to finish this course in four years should complete his Matriculation before entering the classes proper to the "second year" of his course. Thereafter until Matriculation is completed such student shall not be permitted to attend more than four classes in any one year.

3. A Matriculant deficient in more than one subject of Matriculation shall not be admitted to more than four classes of a course for a degree.

4. A Matriculant deficient in one of the required foreign languages, whose preparation in this language has not covered any considerable part of the work prescribed for Matriculation, shall not be admitted to more than three undergraduate classes; and, if deficient to a similar extent in the two required foreign languages, he shall not be admitted to more than two undergraduate classes. The Committee on Admission may, however, at their discretion, waive this regulation in the case of a student whose standing in the other subjects of Matriculation is high.

5. Classes are to be taken in the order of their advancement; and the class or classes specified under Courses of Instruction (p. 58 *et seq.*) as preliminary or pre-requisite to a given class must be taken before such class. No undergraduate or matriculant shall be admitted to a class until he has passed the preliminary class or classes or other preliminary qualifications required.

*For the purpose of this regulation five classes shall be regarded as constituting a year.

6. Five classes shall be regarded as constituting a normal year's work for a student in good standing. Students seeking admission to six classes must make written application to the Committee on Studies, furnishing reasons in support of their application. No student who has failed in any class of his course in the preceding year of his attendance shall be admitted to more than five classes.

7. Students shall not be permitted to continue during the second term in more than two of the classes in which they have failed at the preceding Christmas examinations.

Attendance.

All students are required to attend the classes of their prescribed course regularly and punctually. Attendance is recorded in each class immediately before the work of the class is begun, and the record is not amended in case of students entering thereafter unless satisfactory reasons are assigned. A student's attendance on a given class is not under ordinary circumstances regarded as regular unless he has attended at least nine-tenths of the lectures or other meetings of the class.

A student whose attendance on any class is irregular will be excluded from the examinations in that class, and his attendance will not be recognized as qualifying for a degree.

Class-work.

In order that their class-work may be recognized as qualifying for a degree or diploma, candidates must not only comply with attendance regulations, but must also conform to the following requirements:-

1. They must appear at all examinations, prepare such essays, exercises, reports, etc., as may be prescribed, and, in case of a class involving field or laboratory work, complete such work satisfactorily. Failure to meet these requirements in any class may involve loss of credit for attendance in such class.

2. They must secure positions on the Pass list. In determining this list both the standing attained in prescribed class exercises and in field or laboratory work and that in the various examinations are taken into

consideration. A candidate who fails to obtain a mark of at least 20 per cent on the work of the session in any class shall lose credit for attendance in such class.

3. A candidate taking an Affiliated course must, in the case of classes taken in another Faculty, conform to the regulations of such Faculty and must secure a position on the pass list in accordance with such regulations.

Examinations.

Sessional and Class Examinations.

In all classes other than purely laboratory classes, two examinations, at least, are held,—the Christmas examination, immediately before the Christmas vacation, and the Spring examination, after the close of lectures in the Spring. Other examinations in any class may be held at dates appointed by the instructor. The papers set at the Spring examination in any subject cover the work of the whole session in that subject, and not merely the work of the Second term, and at least 25 per cent. of the questions shall be set on the ground covered before Christmas.

Ordinary and Distinction Class Lists.

The names of candidates successful in the ordinary examinations are arranged in the published lists in three divisions, Passed, Second Class and First Class (candidates who attain a standard considerably above that required for First Class will be indicated as having obtained a High First Class). Names are arranged in order of merit in each class. In some classes additional work, consisting of private reading, essays, reports, field or laboratory work, is prescribed for students who aim at Class Distinction. In such classes extra examinations are held in this additional work at the end of the session, and the award of distinction is based upon the ordinary and the additional work of the class.

Class Distinctions are of two grades,—First and Second Class; but candidates who attain a standing considerably above that required for First Class will be indicated as having obtained a High First Class.

Names are arranged in the lists in order of merit in each grade.

Supplementary and Special Examinations.

A student who fails to secure a position on the Pass List in a class, but who has otherwise fulfilled the requirements in class work stated on page 47, shall be allowed the Supplementary examination in such class at the beginning of the next session of his attendance, on the day appointed in the University Almanac. A student who fails to appear at or to pass the Supplementary examination can only get credit for that class by passing a "Special" examination therein.

Supplementary or Special examinations in any class shall in all cases cover the whole work of the session in that class, and not merely the work of the First or Second term.

Supplementary Examinations are held in September only.

Special Examinations are held

- (a) During the Supplementary Examinations.
- (b) During the first week of lectures in January.

No award of Class Distinction is made on the results of a Supplementary or Special examination.

A student wishing to appear as a candidate at a Supplementary or Special examination, shall be required to give notice of his intention to the Secretary of the Committee on Studies and Attendance on or before the date set for such notice in the University Almanac, the fee (see p. 57) to be remitted with the notice.

Prizes and Scholarships.

The Senate reserves to itself the right of withholding Medals, Prizes and Scholarships, in cases in which sufficient merit is not shown.

Halifax City Free Scholarships.

The University offers each year to the Halifax Academy, to Illofield High School and to St. Patrick's High School for Girls, a scholarship exempting the holder from tuition fees to a maximum amount of \$80 per year. These scholarships are tenable for four years, conditional upon the scholar pursuing a course in Arts or Science leading to a degree, and reaching the grade of Distinction in at least two classes in each year.

*Students who have failed to pass in any class should carefully note that any examinations taken subsequent to the Supplementary examination, held in September, for the new session of their attendance is a Special examination, and required to pass a Special Examination is considerably higher than that required for other examinations.

Prizes and Scholarships.

Candidates must have completed Matriculation, and reached a grade of scholarship represented by an average of 65 with no mark less than 50 on papers written in Grade XI examinations on Matriculation subjects, or the mark of Distinction on papers written in the Matriculation examinations, and must satisfy the Committee of Selection that they are deserving of financial assistance.

The University has the following funds available for scholarships to be awarded to candidates standing highest in the Matriculation and First Year Sessional Examinations:

*Red C.A.C.
May, May, May*
The Sir William Young Fund.—This fund was left by Sir William Young for the purpose of endowing scholarships, and amounts to \$4000.

The Mackenzie Bursary Fund.—Mrs. Harriet Mackenzie Morrison, of Stormont, Scotland, daughter of Rev. Kenneth Mackenzie, of Pitlochry, Co., bequeathed £1000 to the University in 1887 to be used as a Bursary Fund.

The University or Professors' Scholarships Fund.—The University has set aside funds sufficient to produce an income of \$460 per year for scholarships to take the place of those offered in the earlier days by individual professors who received their class fees as part of their salaries.

The George H. Campbell Memorial Scholarships Fund.—In 1917 Mr. and Mrs. George S. Campbell gave the University the sum of \$25,000 to commemorate their only son, George Henderson Campbell, B. A., '15, who enlisted for overseas service during his senior year, and was killed while on duty at the front.

In the announcement of their noble gift, Mr. and Mrs. Campbell state:—

"We can think of no better way of associating the name of our son with Dalhousie, where he spent the happiest days of his short life, than by helping young men of ambition, but of limited means, to secure the advantages of a liberal education."

Mr. Campbell hopes that the recipients of these Scholarships will in turn do something for other students: in his own words:—

"I would like the boys who win the Scholarships to feel under a moral obligation, if their financial circumstances in after years permitted, to donate the value of the Scholarship back to their Alma Mater. Any sums so returned would go to augment the original fund, and thus enlarge its usefulness. In that way graduates would have the satisfaction of knowing that they were helping others as they themselves had been helped."

R.H. Campbell Memorial Scholarship
The income from these funds is applied as follows:—

Entrance Scholarships.

These Scholarships are eight in number:

3 George H. Campbell Memorial Scholarships, of .	\$200 each.
2 Sir Wm. Young Scholarships, of .	100 each.
2 University Scholarships, of .	100 each.
* Mackenzie Scholarship, of .	100

(In the awarding of this Scholarship, candidates of the name of Mackenzie, Maclean or Fraser will be given the preference).

In order to be eligible a candidate must reach the grade of Distinction (65%) in the examinations named below, and otherwise satisfy all matriculation requirements, and must not have attended as a Matriculant or Undergraduate at a recognized degree-granting College or University, and must intend to enter the Arts and Science Faculty of Dalhousie University, and must not have been a candidate more than once before. In the award of these Scholarships, subject to the above conditions, one shall be assigned, each, to

Halifax County,
Cape Breton Island,
Prince Edward Island,
New Brunswick;

but not more than one shall be awarded to Halifax City and Vicinity when other candidates are eligible.

The locality from which a candidate shall be considered as coming will be determined by the locality of the last High or Preparatory School attended; or, in the event of his having been educated beyond grade X by private tuition, by his usual place of residence.

These Scholarships will be awarded on the results of the regular Matriculation examinations held at Dalhousie University on September 28th to Oct. 1st, 1921, in the following subjects:

1. English. 2. Algebra. 3. Geometry. 4 & 5. Two of Latin, Greek, French, German.

For the requirements in each subject, see p. 12. Application to take the examinations must be made on forms to be obtained from the University.

These Scholarships are tenable for one year in the Arts and Science Faculty, and payable in two equal installments, on October 18th and February 1st, the latter payment being conditional on the Scholar having made a pass in each Christmas Examination and an average of at least 65 per cent. in them all.

The successful candidate for any one of these Scholarships may enter on Advanced Standing the classes of a higher year than the first (see pages 16 and 27), but he will not then be eligible for the First Year Scholarships described below.

First Year Scholarships.

These Scholarships are six in number, as follows:

3 George H. Campbell Memorial Scholarships, of .	\$200 each
2 University Scholarships, of .	100 each
* Mackenzie Scholarship, of .	100.

(In the awarding of this Scholarship, candidates of the name of Mackenzie, Maclean or Fraser will be given the preference).

They are open only to Undergraduates who are just completing the first year of the course in Arts or Science, and are tenable for one year, and payable in two equal instalments, on October 18th and February 1st, the latter payment being conditional on the Scholar having made a pass in each Christmas Examination and an average of at least 65 per cent. in them all.

They are awarded on the results of the Sessional Examination returns in the following classes—English 1, Mathematics 1, Chemistry 1A or Physics 1, or Physics 2, or Physics 3, and any two of the four classes, Latin 1, Greek 1, French 1, German 1.

The Allan Pollock Scholarship.—This scholarship has been instituted by the North British Society of Halifax, in memory of the Rev. Dr. Allan Pollock. It is of the value of \$200 and will be awarded annually without restriction as to sex, age or nationality to the student attaining the highest standing in the five classes which may be considered as constituting a normal second year course in Arts, namely, (a) English 2, (b) Latin 2 or Greek 2, (c) a class in Mathematics or Science, (d) a class in History, Economics, Philosophy or a foreign language, (e) another class. The scholarship can not be held along with the N. B. Centennial Bursary, the Jotham Blanchard Bursary or the Charitable Irish Society Scholarship. It will be tenable in the third year of the Arts course and will be payable in two equal installments in October and February, the second payment being conditional on the Scholar having made satisfactory progress in his classes.

The North British Centennial Bursary.—A Bursary, of the annual value of \$100 founded by the North British Society of Halifax, will be awarded biennially. Candidates must be undergraduates in a course in Arts or Science who are just completing two years of residence, and must be eligible at the proper age for membership in the North British Society. The Bursary will be awarded to the candidate standing highest in the examinations in any five classes selected by himself from the following: (a) English 2, (b) two from Latin 2, Greek 2, French 2, German 2; (c) two other classes. It is tenable for two years, namely, during the third and fourth years of residence, but its tenure during the fourth year is contingent on the Scholar having made satisfactory progress in the classes of his third year. The next award will be made in May, 1922.

The Jotham Blanchard Bursary.—This Bursary, of the annual value of \$50, being the interest of an endowment of \$1,000, founded by the New Glasgow Literary and Historical Society in memory of Jotham Blanchard, an honoured name in the annals of

"For students who have been admitted by certificate to the second year read "one" for "two."

Pictou County, will be awarded biennially on the same academic conditions as the North British Society Bursary. It is payable in four equal instalments, on October 15th and February 1st of each year, the payments being conditional on the bursar having made satisfactory progress in his classes. The next award will be made in May, 1923.

The Charitable Irish Society Scholarship.—A Scholarship of the annual value of \$100 founded by the Charitable Irish Society of Halifax, will be awarded biennially. Candidates must be undergraduates in a course in Arts or Science who are just completing "two years of residence, and must be, in the judgment of the Society, of genuinely Irish descent. The Scholarship shall be awarded to that candidate who shall have been admitted by the Senate of the University, to an Honour Course for the degree of B. A., or, in the event of more than one such candidate being available, to that candidate whose university standing is highest. In the event of no such persons being applicants for this scholarship it shall be awarded to the candidate who shall have stood highest in the examinations of any five classes selected by himself or herself from the following:—(a) English 2; (b) one from Latin 2, Greek 2, French 2, German 2; (c) one in Mathematics, Physics, Biology or Chemistry; (d) one from Philosophy 1, History 1, Economics 1; (e) one other class. It is tenable for two years, namely, during the third and fourth years of residence, but its tenure during the fourth year is conditional on the bursar having made satisfactory progress in the classes of his third year. The next award will be made in May, 1923.

Commercial Club Prize.—The Commercial Club of Halifax has offered a prize of \$200 to be awarded to the student who on completion of the second year of the course has attained the highest standing in the classes of the first two years.

Other Undergraduate Prizes.

The Waverley Prize.—This prize, of the value of \$40, being the interest of an endowment for the purpose, will be awarded annually to the student standing highest in Mathematics 3, his standing in Mathematical classes previously taken in the University being taken into consideration.

The Studley Quoit Club Prize.—This prize, of the value of \$50, is offered by the Studley Quoit Club for the encouragement of the study of Greek and Latin. It will be awarded annually to the student making the highest aggregate in Greek 2 and Latin 2.

The Halifax Overseas Club Essay Prize.—This prize, of the value of \$55, being the interest of a fund of \$1000 founded by the Halifax Overseas Club, will be awarded annually. It will be offered for the best essay on some question, historical or critical, relating to the place of the Overseas Dominions in the British Commonwealth. For further particulars address the President.

*For students who have been admitted by certificates to the second year read "one" for "two".

Graduation Prizes.

To be eligible for a medal a candidate must attain a standard considerably above that required for High Honours.

The Governor-General's Gold Medal, offered by His Excellency the Governor-General of the Dominion of Canada, will be awarded to the student who stands first among those taking High Honours in the department of Classics. In the event of its not being awarded at this department, it may be awarded in the department of Latin and English, or in that of Greek and English, or in some other department.

The Sir William Young Gold Medal, founded by bequest of the late Sir William Young, will be awarded on graduation to the student who stands first among those taking High Honours in Mathematics.

The Eric Dennis Gold Medal, founded by Senator William Dennis and Mrs. Dennis, will be awarded on graduation to the student who stands first among those taking High Honours in Government and Political Science.

University Medals will be awarded on graduation to students who take High Honours in departments in which a gold medal is not available.

The Avery Prize.—This prize, of the value of \$20, being the interest of a sum of money bequeathed for this purpose by the late J. F. Avery, M. D., will be awarded on graduation to the student standing highest among those graduating with Distinction.

The Eric Dennis Foreign Scholarship, of a value not less than \$250, founded by Senator William Dennis and Mrs. Dennis, will be awarded on graduation to the student standing highest in the department of Government and Political Science, provided he attains a sufficiently high standard, who obligates himself to pursue at least one year of post-graduate study in the same department of another university approved by the Senate.

The Rhodes Scholarships.

These scholarships, established by the late Right Hon. Cecil J. Rhodes for male students, are of the annual value of £300, and are tenable for three consecutive academic years. The holders of these scholarships are required to continue their studies at the University of Oxford.

The election of scholars in Canada takes place each year during the month of December. The scholars begin residence at Oxford in October of the year for which they are elected.

In each Province there will be a Committee of Selection, appointed by the Trustees in whose hands the nomination of the scholar for the Province will rest. Applications must be in the hands of the Committee, not later than November 25th.

Faculty of Arts and Science.

The conditions of eligibility for a Canadian Scholarship, according to a memorandum issued by the Trustees, are as follows:—

1. Candidates shall be British subjects, with at least five years' domicile in Canada, and unmarried. They shall have passed their nineteenth, but not have passed their twenty-fifth birthday, on October 1st of the year for which they are elected.
2. Candidates must be at least in their sophomore or second year's work at some recognized degree-granting University or College of Canada.
3. Candidates may elect whether they will apply for the Scholarship of the Province in which they have acquired any considerable part of their educational qualification, or for that of the Province in which they have their ordinary private domicile, home or residence. They must be prepared to appear before the Committee of Selection for the Province they select.

For circulars giving further information, apply to the President.

1851 Exhibition Science Research Scholarship.

Her Majesty's Commissioners for the Exhibition of 1851 have for some years offered Scholarships in certain Universities of the United Kingdom and the Colonies, with the intention of enabling students of science who have indicated high promise of capacity for original research to continue the prosecution of science with the view of aiding in its advance or in its industrial applications. In 1894, and alternate years since, the nomination to one of these Scholarships has been placed at the disposal of this University. It is expected that a similar nomination will be placed at the disposal of the University in 1922.

These Scholarships are of the annual value of £200; are tenable for two years, subject to fulfilment of certain conditions, or, by special resolution of the Commissioners, for three years; and are open to women as well as to men. Copies of the conditions of nomination may be had on application at the President's office.

A candidate must be a British subject.

A candidate, whose age exceeds 30 will only be accepted under very special circumstances.

A candidate must have been for the last full year prior to the time of nomination a student of the institution by which he is nominated, or must have been a student of such institution for a full year ending within twelve months prior to the time of nomination, and since ceasing to be such student, have been engaged solely in scientific study.

A candidate must indicate high promise of capacity for advancing Science or its applications by original research. The most suitable evidence is a satisfactory account of a research already performed.

A scholarship may be held at any University in England or abroad. The principal work of a scholar must be research. He is forbidden to hold any position of emolument.

Prizes and Scholarships.

Students who desire to become candidates for nomination to the above Scholarship must make application to the President of the University on or before the 1st day of February.

Daughters of the Empire Bursary.

(\$250.00 a year for four years).

Founded by the Imperial Order, Daughters of the Empire, as part of its war memorial.

Awarded to the candidate on admission to a University in Nova Scotia who, in the judgment of the Committee best meets the purpose in view in the foundation of the Bursary.

The candidate must be the son or daughter of a killed or permanently disabled soldier, sailor or member of the Air Force.

The Bursary is tenable in any University in Nova Scotia.

(The holder of the Bursary is granted exemption from class fees up to \$25.00 a year).

Daughters of the Empire Post-Graduate Overseas Scholarship.

This Scholarship was founded by the Imperial Order, Daughters of the Empire as part of the war memorial of the Order.

It is of \$1400.00 value, tenable for one year in any British University, the subjects of study being specified as British and Imperial History, the Economics and Government of the Empire and Dominions, or any subject of vital interest to the Empire.

The Scholarship is open to men or women, British subjects, unmarried, graduates of a Canadian University or in the last year of a course leading to a degree.

In awarding the scholarship, the Committee of Selection will take into consideration the war services of the candidate and of the members of his or her family, and, other things being equal, will give preference to a returned man, his sister or his child.

The scholarship will next be awarded to a candidate from Nova Scotia in 1922. Application must be made by October 1921.

COURSES OF INSTRUCTION.

1. Classics.

(McLeod Professorship).

<i>Professor</i>	Howard Murray, B. A., LL.D.
<i>Instructor</i>	E. W. Nichols, Ph. D.
<i>Lecturers</i>	J. W. Falconer, M. A., D. D. J. W. Logan, M. A. G. K. Butler, M. A.

Latin.

Elementary Latin.—*Tuesday, Thursday and Saturday, 11—12 a. m., and another hour to be determined after the class is formed*

This class, which is conducted by the Instructor is intended for beginners in the language, and for those whose work has been insufficient to qualify them for admission to Latin I. Students whose work throughout the session has been satisfactory will be admitted to a Matriculation examination in Latin, held in April.

As it will not be possible to cover in class all of the reading required for Matriculation, students intending to qualify for the above examination must do a considerable part of the reading by private work, and must be prepared to devote much more time to the subject outside of class hours than is required in the ordinary undergraduate class.

The first book to be used will be *Collar & Daniell's First Year Latin*, (Ginn & Co., Boston, \$1.00). Other books will be announced at the beginning of the session.

1. *Tuesday, Thursday and Saturday, 10—11 a. m.*

4. **Solid Geometry and Spherical Trigonometry**. Analytic Geometry of three dimensions.—Tuesday and Thursday, 10-11 a. m.

Pre-requisite.—Mathematics 1 and 2. The latter may be taken at the same time.

Advanced Classes.

The courses in these classes are intended for those who wish to take mathematical work in the third or the fourth year in the ordinary course in Arts or Science. They are also intended to serve as courses introductory to the study of higher mathematics for those who may afterwards attend the graduate schools in the larger universities. Candidates for Honours in Mathematics are required to take four of these courses in class. Each class meets weekly throughout the year. Mathematics 3 and 4 are pre-requisite.

5. **Advanced Calculus**. Topics in the treatises of Todhunter, Williamson, Harnack, Lamb and Gibson.

6. **Plane and Solid Analytical Geometry**.—Based on the treatises of Salmon and C. Smith.

7. **Differential Equations**.—Murray's *Differential Equations*, with supplementary lectures.

8. **Algebra**.—Topics in Determinants, Theory of Equations, Quantics, Invariants, with lectures on Series and Functions of a real variable.

9. **Projective Geometry**.

XII. Physics.

(George Muus Professorship).

Professor Howard L. Bronson, Ph.D., F. R. S. C.
Asst. Professor J. H. L. Johnstone, M. B. E., Ph. D.
Lecturer A. Stanley Mackenzie, Ph.D., F. R. S. C.
Instructor Merle P. Colpitt, M. A.

1. **General Physics**.—*Lectures*: Monday, Wednesday and Friday, 10-11 a. m. *Laboratory*: Two hours per week.

Pre-requisite.—Matriculation Mathematics and Physics.

The whole subject of Experimental Physics is taken up, the subjects treated being: Kinematics, Dynamics, Properties of Matter, Sound, Heat, Electricity and Magnetism, Light and other forms of Radiation. The lectures are illustrated by experiments

and special attention is paid to the solution of problems, all students being required to hand in papers for correction and criticism.

Two hours a week are devoted to laboratory work. The laboratory class is divided into three sections which meet on Monday and Wednesday 11 a. m.—1 p. m., and Friday 2.30—5.30 p. m. The experiments selected for the course are designed to acquaint the student with the methods and instruments used in physical measurement. They will also assist him in grasping that part of the subject which is taught in the lectures.

Text Book: Kishbali: *College Physics*.

20. **Licht, Sound and Electricity.**—*Lectures: Monday and Wednesday, 9-10 a. m. Laboratory: Monday 2.30-5.30 p. m.*

Pre-requisite.—Physics 1.

This course is primarily intended for second year students in Medicine and Dentistry and special attention will be given to those parts of the subject of especial interest to them. It may be elected by any students who are properly qualified.

2. **Mechanics, Hydrostatics, Heat, Light and Sound.**—*Lectures: Monday, Wednesday and Friday, 12-1 p. m. Laboratory: Thursday, 2.30—5.30 p. m.*

Pre-requisite.—Mathematics 1; but it may, however, be taken at the same time.

3. **Electricity and Magnetism.**—*Lectures: Tuesday and Thursday, 9-10 a. m. Laboratory: Wednesday, 2.30—5.30 p. m.*

Pre-requisite.—Physics 2 and Mathematics 1.

Physics 2 and 3 are intended primarily for Engineering students, and for students desiring to take Honours in Mathematics or Physics. They are also recommended for students in Arts and Science who are interested in the subject and desire a more thorough grasp of it than can be obtained from Physics 1.

Text Books: Lester: *Mechanics and Hydrostatics*; Kishbali: *College Physics*; Hutchison: *Intermediate Magnetism and Electricity*. Ames and Blair: *Manual of Experiments in Physics*.

4. **Elementary Mathematical—Thermodynamics.**

Pre-requisite.—Mathematics 3, Physics 1 or 2 and 3.

Books Recommended: Maxwell: *Theory of Heat*; Planck: *Thermodynamics*.

5. **Elementary Mathematical—Light.**

Pre-requisite.—Mathematics 3, Physics 1 or 2.

Books Recommended: Preston: *The Theory of Light*; Schuster: *Theory of Optics*; Max and Millikan's *Drude: The Theory of Optics*; Woods: *Physical Optics*.

6. **Elementary Mathematical—Electricity.**

Pre-requisite.—Mathematics 3, Physics 1 or 2.

Books Recommended: Hutchison: *Advanced Text Book of Electricity and Magnetism*; Tamm: *Elements of the Mathematical Theory of Electricity and Magnetism*; Franklin and Williamson: *Alternating Currents*.

7. **Advanced Mathematical.**—*Lectures: Two hours per week.*

In this course an introduction to Mathematical Physics will be given. It is intended for candidates for Honours in Mathematics and Physics, but other students with the necessary qualifications may enter the class.

This course will include the following topics:

Hamilton's Principle; Lagrange Equations; Vector Analysis; Electromagnetic Theory and Electrons.

Books of Reference: Webster: *Dynamics of a particle*; Coffin: *Vector Analysis*; Maxwell: *Electricity and Magnetism*.

8. Experimental Methods.

This course deals with experimental methods and the relations of theory to research, as exemplified by papers of classic interest, or by recent developments of Physics. The course may be conducted by lectures, by private reading, or by laboratory work, or by a combination of them.

This course is intended primarily for candidates for Honours in Physics and in Chemistry; but other students with the necessary qualifications may enter the class.

Note.—Course 4, 5, 6, 7, 8, will be given in alternate years as required, and the hours will be arranged to suit the class as well as possible.

10. **Elementary Practical.**—*Six hours per week.*

Pre-requisite.—Physics 1, or its equivalent.

This course is a continuation of the experimental work of Physics 1, but is somewhat more difficult, and in it more attention is paid to experimental methods. It is intended for Honour students in Chemistry and for those who desire a larger acquaintance with the experimental side of Physics than is to be obtained in Physics 1.

11. **Advanced Practical.**—*Six hours per week.*

Pre-requisite.—Physics 2 and 3.

The work of this class consists of the investigation of physical laws of a more complex kind than in Physics 2 and 3, and a greater degree of precision will be expected in the determinations made.

12. **Research Course.**—*At least ten hours per week.*

The work will consist of new investigations conducted by students who show sufficient ability and are otherwise qualified to undertake it.

XIII. Chemistry.

(McLeod Professorship).

<i>Professor.</i>	C. B. Nickerson, M. A.
<i>Assistant Professor.</i>	R. C. Eason, M. A.
<i>Assistant Professor.</i>	E. W. Todd, B. A.
<i>Instructor.</i>	

The syllabus of the classes, III, Sand 4 is prescribed for students in Medicine or Dentistry will be found below under "Courses of Instruction" in these Faculties. Only persons enrolled as stu-

dents of Medicine or Dentistry are admitted to these classes; but by such students Chemistry 3 and 4 taken together may also be offered for a degree in Arts or Science. The class for students of Pharmacy, Chemistry 1C (p. 74), cannot be offered for an Arts or Science degree.

1. General Chemistry.—Monday, Wednesday and Friday, 9-10 a. m.

Pre-requisite.—Matriculation Algebra and Chemistry.

Phenomena leading to the fundamental laws of combination are first presented, as far as possible in historical order, and thereafter the atomic theory, Avogadro's hypothesis, and the formulation of equations. The chief non-metallic elements are then studied somewhat fully, and a few metals briefly. The elements of Physical Chemistry are also introduced. Written class exercises are held weekly.

Books Recommended: Smith: *General Chemistry for Colleges*, Second Edition. For occasional reading: Aladdin Club Reprints. Larus-Cook: *Chemistry in Daily Life*. Bird: *Modern Science Reader*.

1A. General Chemistry.—Monday, Wednesday and Friday, 9-10 a. m. Laboratory: Monday and Wednesday, 2.30-4.30 p. m.

Pre-requisites.—Matriculation Algebra, English and Chemistry.

The work of this class is that of Chemistry 1, with four to six additional hours a week devoted to laboratory work.

2. Metals and Compounds of Carbon.—Tuesday, Thursday and Saturday, 9-10 a. m. Laboratory: Tuesday and Thursday, 2.30-5 p. m.

Pre-requisite.—Chemistry 1A.

Metals and their compounds; applications of the theory of electrolytic dissociation to analysis.

Compounds of carbon, their purification and analysis; the paraffins and their chief derivatives; ethylene; acetylene; benzene and its chief derivatives.

At least five hours a week must be devoted to laboratory work. This will include qualitative analysis and the preparation of pure laboratory reagents and typical inorganic and organic substances.

Books Recommended: Smith: *General Chemistry for Colleges*. Talbot and Blanchard: *Electrolytic Dissociation Theory*. Baxters and Curtiss: *Qualitative Analysis*. Remond: *Compounds of Carbon*, 5th Edition.

Advanced Classes.

These classes are especially intended for candidates for Honours in Chemistry; but any student who has passed in Chemistry 2 with Distinction may be admitted. The classes are given in alternate years.

5. History of Chemical Theory.—(1922-23). Twice a week.

The development of chemical theory from the time of Boyle.

Books Recommended: Arrhenius: *History of Chemistry*. Remond: *Dalton and the Rise of Modern Chemistry*. Sowerby: *Young Newton*. Thorpe: *History of Chemistry*. Sowerby: *Science and Society*. Lippmann: *Principles of Organic Chemistry*. Stewart: *Recent Advances in Organic Chemistry*. And selected monographs from the Aladdin Club Reprints and Ostwald's Klasse. For reference: Ernst von Meyer: *History of Chemistry*.

6. Physical Chemistry.—(1921-22). Twice a week.

Solutions; thermochimistry; electro-chemistry; and chemical dynamics. Two periods a week are devoted to laboratory work illustrating the principles discussed in the class-room.

Books Recommended: Sloggett: *Theoretical and Physical Chemistry*. Walker: *Practical Physical Chemistry*. Jones: *Elements of Physical Chemistry*. LeBlanc: *Electro-Chemistry*. Ostwald: *Principles of Inorganic Chemistry*. Flory: *Practical Physical Chemistry*. For reference: *Five Books of Physical Chemistry*, edited by Ramsay.

Laboratory Classes.

7. Quantitative Analysis and Inorganic Preparations.—At least ten hours a week.

Pre-requisite.—Chemistry 2.

One hour a week is taken for the discussion of analytical methods, and at least ten hours a week must be devoted to laboratory work. The preparations and analyses prescribed are designed to illustrate typical methods, volumetric as well as gravimetric methods being employed wherever applicable.

Candidates for Distinction are required to undertake additional laboratory work and to show special familiarity with the theory of analytical reactions and processes.

Books Recommended: Remond: *Inorganic Preparations*. John Hopkins: *Practical Inorganic Preparation*. Thorpe: *Practical Qualitative Analysis*. Moore: *Essentials of Quantitative Chemistry*. Blair: *Chemical Analysis of Foods*. Mason: *Examination of Water*. Ostwald: *Foundations of Analytical Chemistry*.

8. Organic Preparations and Analysis.—At least ten hours a week.

Pre-requisite.—Chemistry 2 or 4.

At least ten hours a week must be devoted to laboratory work. A sufficient number of organic compounds is prepared to illustrate the most important reactions and methods of working. Quantitative determinations are carried out of carbon, hydrogen, oxygen and nitrogen; and some molecular weights are determined.

Candidates for Distinction are required to do additional work of the kind outlined above.

Books Recommended: Gatterman: *Practical Methods of Organic Chemistry*. Brauns: *Organic Chemistry*. Conant: *Practical Organic Chemistry for Advanced Students*.

9. Food Analysis.—At least ten hours a week.

Pre-requisite.—Chemistry 7.

One or more hours a week will be devoted to a discussion of the methods employed in determining the character, purity, and nutritive value of food products, also the detection of the common food adulterants. Typical analyses will be made in the laboratory.

10. Research.—The work of this class will consist of original investigation conducted by students who have shown themselves qualified to undertake it.

Pharmaceutical Chemistry.

The following class is designed for students of Pharmacy. The laboratory work is arranged in two parts, the work of the first

part being preliminary to that of the second. The first part of the laboratory work together with the full lecture course in the Qualifying Course in Chemistry prescribed by the N. S. College of Pharmacy for students seeking admission to the examination of the Nova Scotia Pharmaceutical Society. The work of the Qualifying Course together with the second part of the laboratory work constitutes the course in Chemistry required of candidates for the degree of Bachelor of Pharmacy.

IC. Pharmaceutical Chemistry.—*Lectures:* Monday, Wednesday and Friday, 12:1 p. m. *Laboratory:* First part, two hours per week. Second part, at least three additional hours per week.

Lecture Work. *First Term.* Systematic study of the elements and their principal compounds, and the fundamental laws and theories of Chemistry.

Second Term. One lecture a week will be supplementary to the work in the laboratory and will consist of discussions and recitations upon the theories involved. Two hours a week will be spent in the study of Organic Chemistry, special attention being given to those compounds of importance to Pharmacy.

Laboratory Work.—First Part. Exercises in General Chemistry, followed by a course in qualitative analysis.

Second Part. (1) Identification and determination of purity of chemicals of the B. P., such as acids (inorganic and organic), potassium bieitate, hydroxide, bromide and iodide; sodium bicarbonate and salicylate; ammonium chloride, liquor ammonia fortior; magnesium sulphate and carbonate, alum; bismuth subnitrate, hydarg, subchloride; glycerine, alcohol, ether, morphine, quinine, honey, beeswax, etc.

(2) Strength of B. P. preparations, such as: Liquid extracts of belladonna, cinchona, ipecac, nux vomica and opium; liquors—ferri perchlorid, arsenicalia, hydarg, perchlorid, and potass, permangan.; syrup—simplex, ferri iodid; spirits—ether nit., etc.

(3) Testing of food products and water.

(4) Urine analysis.

If desired, students may specialize in any one or more of these subdivisions.

XIV. Geology and Mineralogy.

Assistant Professor..... D. S. McIntosh, M. Sc.

1. General Geology.—*Lectures:* Monday, Wednesday and Friday, 10—11 a. m. *Excursions and Laboratory:* Friday afternoon.

Pre-requisite.—Matriculation Chemistry, or Chemistry I or II.

The lectures will consist of a general survey of the whole field of Geology. A large part of the time will be devoted to Dynamical and Structural Geology. Historical Geology will deal mainly with the North American Continent, tracing its development, and that of life upon it, from early times to the present day.

During the early part of the First Term excursions will be made to points of interest around Halifax on Friday afternoons.

This will be succeeded by laboratory work of three hours on these afternoons during the rest of the session.

This course is elective for candidates in Arts and Science. It is also the course for candidates in engineering who require Geology as one of their subjects.

Text Book: Scott: *An Introduction to Geology*.
Reference Books: Chamberlin and Salisbury: *Geology*; Geikie: *Geology, Physical and Economic*; Scott: *Principles of Geology*; Young and Brock: *Geology and Economic Minerals of Canada*.

2. Physiology.—*Lectures:* Tuesday and Thursday, 10—11 a. m. *Laboratory:* Two hours per week.

Pre-requisite.—Geology 1.

This course deals with the atmosphere, the ocean, climate, and the development of land forms.

Reference Books: Salisbury: *Physiology*; Tarr and Martin: *College Physiography*.

3. Mineralogy and Petrography.—(1921-22). *Lectures:* two hours per week. *Laboratory:* one afternoon per week, chiefly microscopic.

Pre-requisites.—Chemistry 1A and Geology 1 (the latter, however, however, may be taken in the same year).

This course will embrace crystallography, the rock-forming minerals, and the classification and description of rocks.

Reference Books: Williams: *Crystalllography*; Pirsson: *Rocks and Rock Minerals*; Barker: *Petrology for Students*.

4. Mineralogy and Economic Geology.—(1921-22). *Lectures:* two hours per week. *Laboratory:* three hours per week.
Pre-requisites.—As in Geology 3.

The mineralogy of this course will supplement that of Geology 3 by a description and determination of minerals by their physical properties and systematic blow-pipe analysis. The nature, mode of occurrence and distribution of the economic minerals will also be dealt with.

Reference Books: Dana: *A Text Book of Mineralogy*; Brush and Penfield: *Introductory Mineralogy and Blow-pipe Analysis*; Lindgren: *Mineral Deposits*; Keay: *Oil Deposits of the United States and Canada*.

Economic Geography.—Tuesday and Thursday 11-12 a. m. Erosion and the development of land forms; shorelines and harbours; the factors that influence climate; regional vegetation; natural resources; the human factor; transportation; trade routes; density of population.

Advanced Courses.

One at least of these courses will be given each year, if there is sufficient demand.

5. Palaeontology.—*Class and laboratory work one afternoon per week.*

Pre-requisites.—Geology 1; Biology 2 and 3.

Typical fossils of the various formations will be studied.

Reference Books: Zittel: *Text-book of Palaeontology*.

6. **Practical Geology.**—*One lecture per week, with field work during the open season.*

Pre-requisite.—Geology 1.

This course will deal with problems in structural geology, with geological and magnetic surveys.

7. **Geological Chemistry.**—*Lecture, one hour per week. Laboratory, six hours per week.*

Pre-requisites.—Geology 3 and 4, Chemistry 7.

The lectures will embrace the application of Chemistry to geological problems. The laboratory course will deal with mineral and rock analysis.

XV. Biology.

*Assistant Professor..... J. A. Dawson, Ph. D.
Assistant Professor..... Hugh P. Bell, M. Sc.*

1. **General Biology.**—*Lecture: Saturday, 9-10 a. m. Laboratory: four hours. Laboratory open Monday and Wednesday, 11 a. m.—1 p. m., 3.30—5.30, Friday, 2.30—4.30 p. m., Tuesday and Thursday, 9—11.*

Pre-requisite.—Matriculation English.

The aim of this course is to acquaint the student with some of the more important biological facts and theories and results of biological work; also to serve as an introduction to biological methods. It includes a general survey of the plant and animal kingdoms and the discussion of topics of fundamental biological importance, e. g., protoplasm, cell and cell structure, reproduction, inheritance, variation, adaptations, evolution, etc.

Students looking forward to the study of Medicine or Dentistry should take Biology 1B, as Biology 1 will not be accepted in lieu of the requirements in Biology in those Faculties.

- 1C. **Pharmaceutical Botany and Pharmacognosy.**—*2 Lectures, 4 hours Laboratory. A general course in Elementary Botany.*

This course is intended for students of Pharmacy, and cannot be offered for a degree in Arts and Science. The first part of the laboratory work with the full lecture course is the Qualifying Course in Botany prescribed by the Maritime College of Pharmacy for students seeking admission to the examinations of the N. S. Pharmaceutical Society. The work of the Qualifying Course together with the second part of the laboratory work constitutes the course in Botany and Pharmacognosy required of candidates for the degree of Bachelor of Pharmacy.

2. **General Zoology.**—*Lectures: two hours per week. Laboratory: four hours per week.*

Pre-requisite.—Biology 1.

Text Book: Hegner: *College Zoology*.

3. **General Botany.**—*Lectures: Tuesday and Thursday, 10-11 a. m. Laboratory: four hours per week.*

Pre-requisite.—Biology 1.

4. **Comparative Anatomy of the Vertebrates.**—*Lecture: one hour per week. Laboratory: four hours per week.*

Pre-requisite.—Biology 2.

Text Book: Wiedersheim: *Comparative Anatomy of Vertebrates*.

XVI. Physiology.

Professor..... D. Fraser Harris, M. D., D. Sc., F. R. SS. E. and C.

- 1A. **General Physiology.**—*Monday, Wednesday and Friday, 11-12 a. m., and Saturday, 12-1 p. m.*

Some knowledge of Elementary Chemistry, Physics and Biology is pre-supposed; and the student should also, preferably, have some acquaintance with human anatomy.

This course cannot be offered for a degree in Medicine.

The classes in Physiology conducted by the Faculty of Medicine are recognized as qualifying for a degree in Arts or Science, when offered by a student taking the affiliated course in Medicine, or by other students in Arts or Science who may be permitted to enter them.

Undergraduates who have taken these classes as part of their course are required to present certificates of having passed the examinations conducted by the Faculty of Medicine.

XVII. Anatomy.

The classes in Anatomy conducted by the Faculty of Medicine are recognized as qualifying for a degree in Arts or Science, when offered by a student taking the affiliated course in Medicine.

Undergraduates who have taken these classes as part of their course are required to present certificates of having passed the examinations conducted by the Faculty of Medicine.

XVIII. Theory and History of Music.

The classes in the Theory of Music and History of Music conducted in the Halifax Conservatory of Music are recognized as qualifying for the degree of Bachelor of Music. In the Theory, the course extends over three years; in the History, over two. Information as to details of subjects studied in the classes, fees, text-books, etc., may be obtained on application to the Director of the Conservatory, Mr. Harry Dean.

XIX. Mechanics.

Professor..... W. P. Copp, B. A., B. Sc.

2. **Advanced.**—*Monday, Wednesday and Friday, 9-10 a. m. Winter Term.*

Pre-requisites.—Physics 2; Mathematics 1, 2 and 3 (the latter, however, may be taken simultaneously).

This course is intended for Engineering students, but can be offered for a degree in Arts and Science. It deals with statics and dynamics of a particle and of a rigid body, the application of the calculus in considering the motion of a particle under varying

force, simple harmonic motion, oscillation of springs and pendulums, etc. The course is illustrated by practical problems.

Text Book: Poenske: *Applied Mechanics. Modern Mechanics for Engineers.*

Engineering Courses.

3. Graphical Statics.—Monday, Wednesday and Friday, 9—10 a. m. Fall Term. Thursday, 2.30—5.30 p. m.

Pre-requisites.—Drawing I and Physics 2.

The work includes the composition of forces, use of funicular and force polygons, determination of reactions, centres of gravity, bending moments and moments of resistance, stresses in cranes, braced towers, roof trusses, and bridge trusses.

Text Book: Malcolm: *Graphical Statics.*

4. Mechanics of Machines.—Tuesday, 11—12 a. m., Monday, Wednesday and Friday, 12 a. m.—1 p. m.

Pre-requisites.—Drawing I, Physics 2, Mathematics 1, 2 and 3, (the latter, however, may be taken simultaneously).

Kinematics: The work includes constrained motion, kinematic pairing, velocity and acceleration in mechanism, analysis of simple mechanisms, including the quadric crank chain, slider crank chain, and various wheel trains, and the design of involute and cycloidal gear-teeth.

Dynamics: A brief discussion of work and power; the power and turning effort of prime movers; the inertia and kinetic energy of revolving and reciprocating parts of machines.

Text Book: Durley: *Kinematics of Machines.*

5. Materials of Construction.—Thursday, 11—12 a. m.

The work includes the manufacture and properties of cast iron, wrought iron, crucible, bessemer, and open hearth steel; principal alloys; manufacture and properties of Portland and natural cements; limes; concrete; stone and brick masonry; timber; preservation of timber; standard specifications.

Text Book: Moon: *Materials of Engineering.*

XX. Surveying.

Professor:

Lectures: Monday and Wednesday, 10-11 a. m. **Field Work:** First Term, Mapping. Second Term, Monday and Wednesday, 2.30—5.30 p. m.

Pre-requisites.—Drawing I and Mathematics 1 and 2.

Instruction is given in the use and adjustment of the various surveying instruments, also in plane land surveying by chain, compass, transit and level. The work includes theory, practice in field work and plotting, and conventional representation of topographical features.

Text Book: Reed and Hosmer: *Plane Surveying.*

XXI. Drawing.

Professor:

1. Mechanical Drawing.—Tuesday and Friday, 2.30—5.30 p. m.

This course is required of all Engineering students and of all students proceeding to the degree of B. Sc. It deals with freehand

lettering and object drawing; geometrical exercises; detail and assembly drawings and tracings of simple machines.

Text Book: Fresh: *Mechanical Drawing.*

2. Descriptive Geometry.—Saturday, 9 a. m.—1 p. m.

Pre-requisite.—Drawing I (or taken simultaneously) and Matriculation Mathematics.

The work includes the projection of lines, plane figures and solids, problems on the relations of straight lines and planes in space, intersections and developments, surfaces of revolution. The course aims not only to develop the power to visualize magnitudes involving three dimensions, but also to point out practical applications to engineering work.

Text Book: Asmussen: *Descriptive Geometry.*

3. Advanced Mechanical Drawing.—Friday, 2.30—5.30 p. m.

This course is required of all engineering students and consists of preparing detail drawings and tracings of more difficult machine parts. Lectures are given during the course dealing with drafting room methods and explanation of designs.

XXII. Commerce.

(W. A. Black Professorship).

Professor:

Bishop C. Hunt, B. B. A.

Accounting I (Elementary).—3 hours a week.

Fundamental principles, theory and practice, of debit and credit; the account functions and classifications; columnar books of original record; supporting information; proprietorship; controlling accounts; entries to open, adjust and close; preparation of financial statement; single or double entry; elementary accounting problems.

Text Books: Kester: *Accounting Theory and Practice.* Vol. I. Ritterhouse and Clapp: *Accounting Theory and Practice.* Unit I.

Accounting II (Intermediate).—3 hours a week.

Pre-requisites.—Accounting I.

Theory and practice of the technical phases of mercantile accounting: Advanced methods of recording and handling sales, purchases, receipts and disbursements; the voucher system, columnar control, the functions and adjustment of partnership accounts; of corporation accounts; stock and bond issues, bond interest and dividends; surplus and reserves, sinking funds; assets and methods of providing for depreciation; accounts with branch houses and selling agencies; investments; intangible assets. The principles of manufacturing accounting; the elements of cash accounts and methods peculiar thereto. The preparation, analysis and interpretation of the financial statements of mercantile and manufacturing concerns; readings in accounting theory; the solution of a variety of problems.

Business Correspondence (1922-3).—1 hour a week.

A study of the various types of business letters, their forms and methods of expression; buying, collection, circular, adjust-

ment sales and application letters; the preparation of reports and outlines; mailing lists; handling correspondence; the language of advertising.

Marketing and Distribution.—2 hours a week.

A study of the processes and channels of market distribution; the chief agencies; marketing functions; the economics of retailing; the credit system; financing; sales organization; sources of market information; the analysis of sales territories; problems and policies.

Text Book: Cherington: *Elements of Marketing*. Nystrom: *Economics of Retailing*. Assigned Readings.

Business Organization and Management.—2 hours a week.

Pre-requisites.—Economics I.

The evolution of industry based on methods of production; from the standpoint of ownership. Principles and forms of business organization for purposes of control. Theory of industrial and plant location; equipment and development. Scientific management; the Taylor System, Emerson's Principles, Hoxies' Refutation. Problems of management, the human factor in industry, including selection, training and placing of men; execution, control, coordination and supervision.

Assigned Readings.

Faculty of Law.

Preliminary Statement.

The Faculty of Law was organized in 1883. A curriculum was prescribed extending over three years and leading to the degree of Bachelor of Laws.

The chair of Constitutional and International Law was endowed by George Munro, of New York, as one of his many generous benefactions to the University. R. C. Weldon, Ph. D., was appointed to this professorship in 1883, and was made Dean of the Faculty, and held this position until his retirement from teaching in 1914. The professorship of Contracts, has been held continuously from the beginning by Dr. Benjamin Russell, now of the Supreme Bench of Nova Scotia. An additional full-time professorship was established in 1920. The other members of the teaching staff up to the present have been voluntary lecturers from the Bench and Bar of the Province.

The Law School occupies the first two floors of the north wing of the Forrest Building, the office of the Dean being on the first floor, and the Law Library, containing 8,000 volumes, on the second floor.

Affiliated Courses.

A Bachelor of Arts of this University who has taken as part of his course for that degree the subjects of Constitutional History, Contracts, Torts and Crimes, may complete a subsequent Law course in the University in two years.

A Bachelor of Arts of the University of King's, Acadia, St. Francis Xavier, Mount Allison, or New Brunswick, who has taken as part of his course for that degree the subjects of Constitutional History, Contracts, Torts, and either Crimes or International Law (according to the arrangement with the different universities), may similarly complete a subsequent Law course in this University in two years.

Arrangements with the N. S. Barristers' Society.

Arrangements have been made with the Nova Scotia Barristers' Society whereby the University, when the

Society desires it, will appoint two co-examiners for any subject of examination, one of them to be nominated by the Society. The Society in return will exempt from its Intermediate and Final Examinations the holder of the degree of Bachelor of Laws from Dalhousie University, but expressly stipulates that the examinations passed by the student must have included one by co-examiners on Procedure and Practice.

As students are expected to familiarize themselves with the subject-matter of the subjects of examination, whether covered by the lecturer or not, they are advised to consult not only the reference books recommended by the lecturer, but also those in the printed syllabus of the Intermediate and Final Examinations of the Nova Scotia Barristers' Society.

The following information abstracted from the regulations of the Society is given for the benefit of those seeking admission to the Bar in this Province.

An applicant for admission to the Bar must pass three examinations, Preliminary, Intermediate and Final.

Preliminary Requirements of the Society.

The Preliminary requirements must be satisfied before a candidate can be admitted as an articled clerk. In lieu of the examination certain certificates may be accepted. The subjects of examination are:-

1. English.
2. Geography and History.
3. Mathematics
4. Latin.
5. Greek, or French, or German.

The grade of difficulty and comprehensiveness of the examinations is that of the corresponding examinations of the first year of a course in Arts of a recognized University. For the syllabus of the subjects see the printed regulations of the Society.

Candidates may be exempted from the Preliminary examinations, in whole or in part, as follows:-

(a) a candidate who presents to the Secretary satisfactory certificates of having completed Matriculation into any College or University approved by the Council of the Society for the purpose, and also of having attended and passed at some College or University approved by the Council of the Society for the purpose, at least five regular classes of the course for the degree of Bachelor of Arts, of which English, Latin and another foreign language shall be three; and of having passed or of having been exempted from one year's class in Mathematics.

(b) a candidate who presents to the Secretary a satisfactory certificate that he is the holder of the diploma of Bachelor of Arts from any College or University approved by the Council for the purpose.

Intermediate and Final Examinations of the Society.

"No candidate who does not hold the degree of Bachelor of Arts from a College approved for the purpose shall be admitted to an Intermediate examination unless he has served as a duly articled clerk for at least two years. Any candidate holding such degree may be admitted to the Intermediate examination after he has served as a duly articled clerk for one year."

"No candidate shall be admitted to a Final examination until the expiration of at least twelve months from his having passed the Intermediate examination, or such examination or examinations as are accepted in lieu thereof.

The time during which a student must serve under articles of clerkship is three years, if, (1), during this time he is a Bachelor of Arts, or, (2), at the time of application for admission to the Bar he is a Bachelor of Laws, of a recognized university. The time for all other students is four years.

A student during his term of service shall not engage in any employment, other than attendance at an institution of education in law, which will have the effect of interfering with such services.

General University Regulations.

University regulations applicable to the students of all Faculties and relating to registration, residence church attendance, discipline, etc., will be found in the University Calendar, pp. 16-20.

Degree.

The only degree conferred in the Faculty of Law is that of Bachelor of Laws (L.L. B.).

Academic Year.

The Academic Year consists of one session of about thirty-two weeks duration. The session of 1921-22 will begin on Wednesday, Sept. 28th, 1921, and end on Thursday, May 8th, 1922. The last day on which students can register for the work of this session is Saturday, October, 8th.

Admission.

Students are admitted to classes either as Special students without formal examination, or as Undergraduates in Arts taking the Affiliated subjects in Law for the degree of Bachelor of Arts, or as regular Undergraduates in Law.

Subject to the University regulations for the admission of students (p. 10), a Special student may be admitted to classes in this Faculty; but his attendance is not recognized as qualifying for a degree.

An undergraduate in Arts looking forward to the study of Law may take Constitutional History, Contracts, Torts and Crimes in this Faculty in place of three of the eight electives required for the degree of Bachelor of Arts (p. 24).

A Bachelor of Arts of this university and of certain other universities (See p. 81), who has taken as part of his course for that degree certain specified subjects may be admitted to this Faculty and may complete the course for the Law degree in two years.

All other candidates for admission must have completed Matriculation, and must also present a satisfactory certificate of having attended and passed at some degree-granting College or University, recognized by the Senate for the purpose, at least five regular classes of the course for the degree of Bachelor of Arts, of which English, Mathematics, Latin and another foreign language shall be four.

Students presenting themselves for the first time to register in the Faculty of Law must submit to the Committee on Admission their Diplomas or Certificates to establish their qualifications, and *these must prove acceptable before the student can be registered. Students are consequently advised to mail such Certificates to the Registrar for appraisal, as far in advance as possible.*

Undergraduates of other approved Law Schools may, on producing satisfactory certificates, be admitted to advanced standing in this Law School. (p. 17).

	Rules of Interpretation

Detailed information regarding the classes included in these courses will be found under Courses of Instruction, p. 88 *et seq.*

No student shall be allowed to take a class belonging to a year in advance of his own year without special permission from the Faculty.

No student shall be allowed to take classes in other faculties of the University, without special permission from the Faculty of Law.

The Faculty urgently recommends that students devote their whole time during sessions to the work of the School, experience having proved that students who undertake office work in addition to the work of their classes receive comparatively little advantage from the lectures.

Round Table.

Students of the second and third years will be required to attend and take part in weekly meetings, presided over by the Dean or another member of the staff, at which important current decisions of British and Canadian Courts will be discussed.

Attendance.

In order to be permitted to write an examination, a student must have credit for attendance on 90 per cent. of the lectures or other meetings of the class in question.

Faculty of Law.**Examinations.****Christmas Examinations.**

Christmas Examinations will be held immediately before the Christmas vacation. The subjects in which such examinations are to be held will be announced ten days in advance.

Sessional Examinations.

Sessional Examinations in all classes will be held after the close of lectures in the spring.

Supplementary Examinations.

If a student fail to pass in not more than two subjects of his first year, or in not more than four subjects of his second or third year, at the Sessional examinations, he may be allowed a Supplementary examination in such subject or subjects at the specified times for such examinations. In case of more serious failure he must repeat his year.

If a student fail in more than one subject of his year, he must pass in at least all but one of them at a subsequent Supplementary examination before he can enter upon the studies of the next higher year.

Supplementary examinations are held at the beginning and end of the Session, on the dates to be found in the Almanac, but at no other times.

Students who wish to present themselves at a Supplementary examination must make written application to the Dean on or before the date set in the University Almanac for receiving applications, and the fee must in all cases accompany the application for examination.

Medal.

University Medal in Law.—This medal will be awarded on graduation to the student standing highest among those taking the full regular third year curriculum, provided he reaches a very high standard of excellence, and obtains First Class Distinction in at least all but three of the subjects of examination.

Fees.

All fees and deposits are payable in advance, and unless these are paid the student will neither receive credit for attendance upon any class, nor be admitted to any examination. On account of the annual deficit and in order to provide additional staff the University is compelled to make a slight increase in fees.

For Registration.

Payable by students taking only one class in the University.....	\$ 3 00
Payable by students taking more than one class.....	5 00
Additional, for registration after the beginning of lectures.	2 00

The Registration Fee entitles a student to the use of the University Library, the Law Library, the Athletic Field and Student Building.

For Tuition, Examinations and Diplomas.

For each class attended, when taken singly.....	\$ 30 00
Payable by those taking the regular prescribed curriculum, each year.....	150 00
Payable by a B. A. who has taken the Affiliated subjects as a part of the work for that degree, and is allowed to complete the Law course in two years, each year.....	200 00
Students departing from the prescribed curriculum will be charged for each class singly; but the maximum charge for three years shall be.....	600 00
For each Supplementary examination.....	5 00

Faculty of Medicine.

Preliminary Statement.

In accordance with an agreement entered into in 1911 between the Governors of Dalhousie University and the Corporation of the Halifax Medical College, the work of the latter institution was forthwith discontinued, and instruction in all subjects of the medical curriculum was undertaken by the University.

By an arrangement between Dalhousie University and the Provincial Medical Board of Nova Scotia, the Professional examinations are conducted conjointly by the University and the Board, and hence candidates may qualify at the same time for the academic degree and the license of the Board.

Important Notice.

Students who look forward to practising in some other province are reminded that they must conform to the regulations prescribed by the Medical Board or Council of that province. Official information relative to the regulations for license to practise in the various provinces may be obtained from the Registrars of the Provincial Medical Boards or Councils. The names and addresses of the Registrars of the Medical Boards for the Maritime Provinces and Newfoundland are as follows:

Nova Scotia: Dr. W. H. Hattie, Halifax.

New Brunswick: Dr. Stewart Skinner, St. John.

Prince Edward Island: Dr. S. R. Jenkins, Charlottetown.

Newfoundland: Dr. H. Rendell, St. John's.

Privileges.

The General Medical Council of the United Kingdom admits graduates in Medicine of Dalhousie University who are at the same time duly registered in the Medical Register of Nova Scotia, to the privilege of registration in the Colonial List of the British Medical Register. Such graduates thereby become entitled to the same privileges as persons registered in the regular Home

(94)

Register. These privileges include the right to practise in Britain and in certain British colonies and other countries; also admission to the army and other medical services. Graduates of Dalhousie University are accordingly eligible for nomination under the following Militia Order:

"The Imperial Army Council has intimated that two commissions in the Royal Army Medical Corps will be granted annually to candidates who have qualified in the Medical Schools of Canada."

For information relative to registration in the Colonial List of the British Register application should be made to the Medical Registrar of Nova Scotia. Information with regard to the Army Commissions will be furnished on application to the Militia Headquarters of the nearest Command or District.

Equipment.

The University laboratories of Physics and Chemistry are in the new Science Building on the Studley site. The University laboratory of Biology, the equipment of which has been largely increased through the generosity of Sir James H. Dunn, of London, is in the Forrest Building. In this building are also the Medical laboratories of Anatomy, Pharmacy, Histology and Physiology. The laboratory of Pathology and Bacteriology, which has been erected and equipped by the Hospital Commission in connection with the Victoria General Hospital, is available for the use of medical students and affords superior facilities for both elementary and advanced study of these subjects.

As a result of a very satisfactory Anatomy Act, there is an ample supply of material for dissection and for Operative Surgery. In addition to mounted skeletons, there is a large supply of disarticulate bones, which are loaned to students free of charge for study at home.

The clinical advantages enjoyed by students in Halifax are exceptionally good, owing to arrangements by which students are admitted for purposes of clinical instruction to the wards of the Victoria General Hospital, the Children's Hospital, the Lying-in and Hospital wards of the City Home, and the Nova Scotia

Hospital for mental diseases. The three first-named institutions adjoin the University grounds. The University has recently given a site to the Salvation Army for the erection of a Maternity Hospital with 60 beds to cost \$150,000. In return the University is to have the privilege of using all the free beds for clinical teaching.

The Victoria General Hospital, which accommodates 170 patients, affords admirable opportunities for the observation and study of the more acute and serious forms of disease. In its special wards, diseases of women and children, skin diseases and diseases of the eye, ear, throat and nose, are clinically studied. In the Hospital wards of the City Home, near by, are found the more chronic and incurable forms of disease; while in the Lying-in wards of the same institution, students are afforded facilities for acquiring experience in Practical Obstetrics.

In the Nova Scotia Hospital, accommodating 430 patients, students are able to study clinically the various forms of mental and nervous diseases.

Besides the above institutions, the Visiting Dispensary, which is open daily, provides the opportunities for observation and study commonly afforded by the outpatient department of hospitals. Clinical instruction is also given here in the diseases of the eye and ear.

Public Health Nursing.

In March, 1920, the University initiated a Course in Public Health Nursing for graduate nurses. It is intended to continue it from year to year. A circular, giving details of the Course can be had on application to the University Office.

General University Regulations.

University regulations applicable to the students of all Faculties and relating to registration, residence, church attendance, discipline, etc., will be found in the University Calendar, pp. 17-20.

Academic Year.

The Academic Year consists of one session of eight months' duration. The session of 1921-22 will begin on Wednesday, Sept. 28th, 1921, and end on Saturday,

Matriculation.

May 27th, 1922, except for students of the fifth year, in whose case the session will begin on Sept. 14th and end on May 11th. No student will be admitted after Saturday, Oct. 8th.

Degrees.

Two medical degrees are conferred, viz., Doctor of Medicine (M. D.) and Master of Surgery (C. M.); but neither degree is conferred on any person who does not at the same time obtain the other.

Admission and Grading.

1. All Undergraduates in Medicine are admitted to the full work of the *first year*. So, also, are Matriculants in Medicine, that is, those who are admitted to the study of Medicine deficient in some subject of Matriculation; *but they are required to complete their Matriculation before being admitted to the second year of the course.*

2. For admission to any class of the *second year*, a student must have passed in the classes preliminary or pre-requisite to such class, as indicated in the syllabus under "Courses of Instruction," (pp. 106, *et seq.*)

3. For admission to the classes of the *third* or any higher year, an undergraduate must have passed the examinations required in all the subjects of the preceding years.

4. Subject to the University regulations for the admission of students (see University Calendar, page 10), a Special student may be admitted to classes in this Faculty, but his attendance is not recognized as qualifying for a degree.

Women are admitted to classes under the same conditions as men.

No person under sixteen years of age is admitted to any class.

Matriculation.

Full details of the requirements for Matriculation will be found in the University Calendar, pp. 11-16, and in Chap. I of the Annual Announcement of the Provincial Medical Board.

Curriculum.†

The course for the degrees of Doctor of Medicine and Master of Surgery extends over five years. Beginning with the Session of 1921-22, the Course will be lengthened to six years. Detailed information regarding the classes included in it will be found under "Courses of Instruction," (pp. 106 *et seq.*). The course is as follows:

Second Year. (Five year course).

- Chemistry 3 and 4.
- Anatomy 1.
- Human Embryology

Third Year. (Five year course).

- Practical Anatomy.
- Physiology 4.
- Pathology 1 and 2.
- Bacteriology 1 and 2.

Economics or French or German.

Regulations for Degrees.

In addition to the Matriculation or Preliminary examination, candidates for degrees are required to pass five Professional examinations. The requirements in each subject are covered by the work of the class or classes in that subject specified under "Courses of Instruction" (pp. 106, *et seq.*). The examinations in the various subjects will be held on the dates set in the University Almanac, or posted on the Notice Boards, and are arranged as follows:

Second Professional Examination. (Five year course).

One paper and a laboratory examination in Chemistry; one paper and an oral examination in Anatomy, including Embryology; one paper and an oral and practical examination in Physiology, including Histology.

Third Professional Examination. (Five year course).

An oral examination in Anatomy; one paper and an oral examination in (a) Pathology, (b) Bacteriology, and (c) Materia Medica; one paper in each of the following: (a) Physiology, (b) Surgery, (c) Medicine; and a practical examination in Clinical Microscopy and Clinical Chemistry.

Fourth Professional Examination. (Five year course).

One paper in each of the following subjects: (a) Surgery, (b) Medicine, (c) Paediatrics, (d) Obstetrics and Gynaecology, (e) Medical Jurisprudence, (f) Therapeutics, (g) Hygiene.

*Candidates are entitled certain modifications of the above order so far as regards the first and second Professional examinations, subject to the regulations under "Admission to Examinations." (See p. 97).

Fifth or Final Professional Examination. (Five year course).

One paper and an oral examination in each of the following subjects: (a) Surgery in all departments and including Surgical Anatomy, (b) Medicine in all departments, and Therapeutics, (c) Obstetrics and Diseases of Women and Children, (d) Mental Diseases. Also a practical clinical examination in (f) Surgery and in (g) Medicine.

First Professional Examination. (Six year course).

One paper in each of the following subjects, Chemistry, Physics, Biology, English and an elective.

Second Professional Examination. (Six year course).

One paper in each of the following subjects: Physics, Histology, Embryology, an elective; one paper and a examination in Chemistry; an oral examination in Anatomy.

Pass and Distinction Lists.

The names of candidates successful in the examinations are arranged in the published lists in two divisions, the Pass and the Distinction divisions. To pass, a candidate must obtain a minimum mark of 40 per cent, in English and electives, Physics, Chemistry and Biology, and a minimum mark of 50 per cent, in all other subjects. To win Distinction in any subject he must obtain a mark of 75 per cent, or over in that subject. The names in the "pass" division of the list are arranged in alphabetical order; the "distinctions" are in order of merit.

Admission to Examinations.

Candidates for admission to Degree examinations must conform to the following requirements:

1. They must have satisfied the Matriculation or Preliminary requirements (see under "Admission and Grading" sec. 1, p. 97).
2. They must have attended the prescribed classes regularly and punctually. Certificates indicating less than 90 per cent, of attendance upon any class will not in ordinary circumstances be accepted.

Admission to Examinations.

3. They must have prepared such exercises, reports, etc., as may be prescribed, and, in the case of classes involving laboratory or practical work, they must have completed such work satisfactorily.

4. For admission to the examinations of the second or any higher year they must have passed the examinations indicated in sec. 2 or 3, as the case may be, under "Admission and Grading" (page 97).

5. Candidates for the Final Professional examination will be required to subscribe to the following declaration with regard to their age:

Halifax..... 19..

I, the undersigned, being desirous of obtaining the Degrees of Doctor of Medicine and Master of Surgery, do hereby declare that I have attained the age of twenty-one years (or, if the case be otherwise, that I shall have attained the age of twenty-one before the next graduation day).

(Signed)

They must also present satisfactory certificates of having fulfilled the following requirements:-

i. Attended during two periods of at least 6 months each the practice of the V. G. Hospital.

ii. Attended during at least 6 months additional the practice of the Halifax Dispensary.

iii. Served at least 6 months as a Clinical Clerk in the Medical Wards of the V. G. Hospital, and having taken complete histories of at least 15 Medical Cases.

iv. Served for a similar period as Dresser in the Surgical Wards, and having taken complete histories of at least 15 Surgical Cases.

v. Attended a course in Operative Surgery, and having performed operations on the dead body to the satisfaction of the Teacher.

vi. Attended at least 6 Maternity Cases under a recognized practitioner.

vii. Received instruction and attained proficiency in the administration of Anaesthetics.

viii. Received instruction and attained proficiency in the practice of Vaccination.

ix. Attended the Post Mortem Examinations at the V. G. Hospital during at least 6 months, and having

received practical instruction in the methods of making such examinations and in framing Reports.

Supplementary Examinations.

1. A candidate who has failed to pass in one or more subjects of the first or second year may be admitted to a Supplementary examination in such subjects, provided he has attained a sufficient standing in each of such subjects. In case of serious failure in his classes he may be required to repeat his year.

2. A candidate who has failed to pass in not more than two subjects of the Degree examinations of the third or any higher year, shall be entitled to a Supplementary examination in such subjects.

3. A candidate who has failed to pass in more than two subjects of the third or any higher year examination, may be required to repeat his attendance and class work in these subjects, or in all the subjects of his year, before being admitted to re-examination.

4. Supplementary examinations are held in the Autumn on the dates specified in the University Almanac, and during the regular Professional examinations in May, but at no other times.

5. Application for admission to a Supplementary examination must be made on or before the date set in the University Almanac for receiving applications, on a form to be obtained from the Secretary of the Faculty of Medicine, and must be accompanied by the proper fee. (p. 104).

Exemptions.

Candidates may be exempted from attendance on one or more subjects of the first four years of the medical curriculum on presenting certificates,

- (a) of having passed the Matriculation, or an equivalent, examination* after the completion of their sixteenth year, and before entering upon their medical course; and
- (b) of having attended and performed the required class-work at any medical school or college recognized by the Senate.†

*All information in reference to requirements for the Preliminary examination of the Provincial Medical Board, exemptions, etc., may be obtained on application to the Registrar of the Board, Dr. W. H. Hattie, Provincial Health Officer, Halifax.

†In regard to *Practical Materia Medica* a certificate of having had three months practice in the dispensing of drugs with a registered druggist or dispensing medical practitioner may be accepted.

Candidates may be exempted from examination in one or more subjects of the first four Professional examinations on presenting in addition to the certificates specified under (a) and (b) above, certificates of having passed equivalent examinations at any medical school or college recognized by the Senate for the purpose.

Certificates exempting from attendance and examination may be accepted in Physics, Chemistry, and Biology, if when these classes were attended the candidate was qualified to offer them for an Arts or Science degree.

Sponsio Academica.

Before admission to his degree, a candidate shall be required to sign the following oath or affirmation:

In facultate Medicinae Universitatis Dalhousianae.

Ego, Doctoratus in Arte Medica titulo juri dosandus, sancto coram Deo cordium scrutatore, spondeo/ me in omni grati animi officio erga Universitatem Dalhousianam ad extreum vitæ fulgur, perseverantur. Practical Anatomy, each year, Biology 1B,.....	\$40 00
Anatomy 1, Physiology 2 and 3, Pathology 2, each.....	35 00
All other classes, each.....	30 00
Admission to Victoria General Hospital, Hospital Laboratory, Children's Hospital, General Hospital, Dispensary, each.....	5 00

The fees payable for attendance upon classes a second time shall be in accordance with the above schedule, but the total tuition fee for such classes shall in no case exceed one hundred and twenty-five dollars, exclusive of fees for admission to hospitals, etc.

The amount payable by a candidate for a degree who may be completing his course by attendance of only one year at Dalhousie University shall be in accordance with the above schedule, provided that the amount so payable be in no case less than one hundred and twenty-five dollars.

Inclusive Fee Payable by Students taking the Regular Classes of any Year of the Curriculum.

For each year..... \$200 00

This includes registration, tuition, hospitals, laboratories and the regular sessional examinations. Students taking the affiliated course in Arts or Science and Medicine will pay the fees for courses as in Arts during the first three years and the full rate of \$200.00 for the fourth year. That is, all students affiliated in Arts or Science and Medicine will pay the full medical fees for five years of their course.

*Students who register only for the purpose of taking examinations are exempt from the payment of this fee.

COURSES OF INSTRUCTION.

I.—Physics.

(George Munro Professorship).

Professor	Howard L. Bronson, Ph.D., F. R. S. C.
Assistant Professor	J. H. L. Johnston, M. B. E., Ph. D.
Demonstrator	Meredith P. Colpitt, M. A.

- 1. General Physics.**—*Lectures: Monday, Wednesday and Friday, 10-11 a. m.*

Pre-requisite.—Matriculation Mathematics and Physics.

The whole subject of Experimental Physics is taken up, the subjects treated being: Kinematics, Dynamics, Properties of Matter, Sound, Heat, Electricity and Magnetism, Light and other forms of Radiation. The lectures are illustrated by experiments, and special attention is paid to the solution of problems, all students being required to hand in papers for correction, and criticism.

Two hours a week are devoted to laboratory work. The laboratory class is divided into three sections which meet on Monday and Wednesday 11 a. m.—1 p. m., and Friday 2.30—5.30 p. m. The experiments selected for the course are designed to acquaint the student with the methods and instruments used in physical measurement. They will also assist him in grasping that part of the subject which is taught in the lectures.

Text Book: *Kinshella: College Physics*.

- 20. Light, Sound, and Electricity.**—*Lectures: Monday and Wednesday, 9-10 a. m. Laboratory: Monday, 2.30-5.30.*

Pre-requisite.—Physics I.

This course is primarily intended for second year students in Medicine and Dentistry and special attention will be given to those parts of the subject of especial interest to them. It may be elected by any students who are properly qualified.

II.—Chemistry.

(McLeod Professorship).

Professor	C. B. Nickerson, A. M.
Assistant Professor	R. C. Eason, M. A.
Assistant Professor	E. W. Todd, B. A.

- 1B. General Chemistry.**—*Lectures: Monday, Wednesday and Friday, 9-10 a. m. Laboratory: Tuesday and Thursday, 2.30-5.30 p. m.*

Courses of Instruction.

Lectures on General Chemistry covering the same ground as in Chemistry 1 in the Faculty of Arts and Science (University Calendar, p. 68). At least six hours a week must be devoted to laboratory work.

Text Book: *Smith's General Chemistry for Colleges*.

- 3. Metals and Qualitative Analysis.**—*Lectures: Saturday, 9-10 a. m. Laboratory: Tuesday and Thursday, 10-12 a. m.*
Pre-requisite.—Chemistry 1B.

Class Work.—Metals and their compounds, with special reference to those having medicinal or dental uses or toxic properties; elements of Physical Chemistry.

Laboratory Work.—Qualitative analysis, including the detection of the more commonly occurring poisons.

Text Book: *Smith's General Chemistry for Colleges*. F. M. Perkins (Qualitative Chemical Analysis).

- 4. Organic Chemistry.**—*Lectures: Tuesday and Thursday, 9-10 a. m.*

Pre-requisite.—Chemistry 1B.

Purification and analysis of carbon compounds. The paraffins, ethylene, acetylene, benzene, and their chief derivatives, especially those met with in Physiology and Therapeutics. In the laboratory a few typical carbon compounds are prepared and studied.

Text Book: *Rensom: Compounds of Carbon*, 5th edition.

III.—Biology.

Assistant Professor..... J. A. Dawson, Ph. D.

Assistant Professor..... Hugh P. Bell, M. A., M. Sc.

- 1B. General Biology.**—*Lectures: three hours per week. Laboratory: six hours per week.*

The aim of this course is to acquaint the student with some of the more important biological facts and theories and results of biological work; also to serve as an introduction to biological methods. It includes a general survey of the plant and animal kingdoms with particular emphasis on the study of vertebrate types as well as the discussion of topics of fundamental biological importance, e. g. protoplasm, cell and cell structure, reproduction, inheritance, variation, adaptions, evolution, etc.

IV.—Anatomy.

(Dr. D. G. J. Campbell Memorial Professorship).

Professor	John Cameron, M. D., D. Sc., F. R. SS., E. & C. S.
Demonstrators	[W. Alex Curry, M. D., C. M., F. R. C. S. Florence J. Murray, M. D., C. M.]

Demonstrators	H. B. Atlee, M. C., M. D., C. M. G. W. Grant, M. C., B.A., M.B., Ch.B.
----------------------------	---

Lectures.

- 1. General Anatomy.**—*Monday, Wednesday and Friday, 12-1 p. m., and Tuesday and Thursday, 2.30-5.30 p. m.*

This course is intended for second year students. Osteology and Arthrology will first be dealt with. The entire skeleton will be carefully studied, all the bones and joints being examined in detail. All the ordinary bones of the skeleton are supplied to students, both in the Practical Anatomy Room, and for study at home, on their making a deposit of the proper fee; but students are expected to provide themselves with the bones of the head.

The latter part of the course will be devoted to the consideration of the Regional Anatomy of the body. Lectures will be illustrated by fresh dissections, plates, diagrams and models.

Text Books: Cameron: *Regional Anatomy*.

2. Human Embryology.—Friday, 9-10 a. m.

A course of lectures and demonstrations to students of the second year, devoted to an elementary study of the development of the form, organs and tissues of the human body.

Text Book: Paterson: *Manual of Embryology*.

3. Surgical Anatomy.—Friday, 3.30—4.30 p. m.

This course, to be taken by students of the fifth year, will consist of additional lectures and demonstrations on those portions of anatomy which are essential for the understanding of practical medicine and surgery and is therefore intended for students who are engaged in clinical work.

Practical Anatomy.

Special attention will be given to this branch. The Dissecting Room will be open daily, except Saturday, and will be under the direct supervision of the Professor of Anatomy, assisted by the Demonstrators, one or other of whom, in addition to the Professor, will be present during the hours while the class is in session every day, so that each student will be frequently examined and assisted during the progress of his dissections.

The course extends over three years, during which the student is required to have dissected each "part" twice.

Text Books: Cameron: *Regional Anatomy*.

V.—Physiology.

Professor . . . D. Fraser Harris, M. D., D. Sc., F. R. SS. E. & C.
Demonstrators . . . [H. W. Schwartz, M. D., C. M.
 Margaret Low.

The courses in Physiology and Practical Physiology include the study of the minute structure of the tissues and organs of man and the mammalia, and the composition and functions of the tissues, organs and systems of the human body.

Lecture Courses.

1. General Physiology.—Monday, Wednesday and Friday, 11-12 a. m., Saturday, 12-1 p. m.

Pre-requisites.—First year Medical classes.

This course consists of 160 lectures and is designed to give the students of the third year a knowledge of the elements of

Human Physiology, especially in its relations to practical medicine. The lectures will include the physiology of the sense organs, the nervous system and reproduction.

4. Advanced Physiology.—Monday and Wednesday, 3-4 p. m. Pre-requisite.—Physiology I.

This course is intended for students of the third year, and will treat of such subjects as have not been dealt with in Physiology I.

Text Books: Bowes: *Text Book of Physiology*. Fraser Harris: *Nerves* (Bones University Library).

Practical Physiology.

2. Histology.—Tuesday and Thursday, 9-11 a. m.

This course, which consists of at least 60 meetings of two hours each, is intended for students of the second year. It is designed to give the student a knowledge of the minute structure of the blood and all the tissues and organs of the human body.

The student will also be instructed in the methods of fixing, staining and examining tissues, as well as in the use of the microtome for cutting sections in paraffin and in gum.

Text Books: Schäfer: *Essentials of Histology*. (Latest edition). Jordon-Ferguson: *Text Book of Histology*.

3. (a) Experimental Physiology.—First Term, Friday, 2.30—4.30 p. m.

This course is intended for students of the third year. It is designed to give the students a practical acquaintance with the methods of the graphic recording of physiological phenomena.

(b) Bio-Chemistry.—Second Term, Friday, 2.30—4.30 p. m.

This course is intended for students of the third year. It is designed to give students a practical acquaintance with the chemical nature of the secretions, excretions and fluids of the body, as well as that of the food-stuffs.

Text Books: Schäfer: *Experimental Physiology*. Hallerton: *Essentials of Chemical Physiology* (Latest edition); or, Russel and Head: *Laboratory Course in Chemistry for Medical Students*; or, Young-Pearson: *Organic Chemistry for Medical Students*.

VI.—Pathology, Bacteriology and Parasitology.

Professor . . . Albert G. Nicholls, M. A., M. D., D. Sc., F. R. S. C.,
Lecturer . . . Donald J. MacKenzie, M. D., C. M.
Demonstrators in Bacteriology . . . [F. G. Mack, B. A., M. B.,

[J. N. Lyons, M. D., C. M.,
Demonstrators in Pathology . . . F. R. C. S.,
 [Gerald W. Graat, M. B., Ch.B., M. C.

Pathology.

1. Lectures. General Pathology.—Tuesday, Thursday and Friday, 9-10 a. m.

A course of lectures to third year students during the First term, dealing with the general principles of Pathology, in which

the following subjects will be considered; the morphology, physiology, and chemistry of the cell; the causes of disease; the morbid processes; the tissue changes; reaction and adaptation. The oral examination will be held on the completion of the course, the written in the spring.

2. Laboratory Work. Morbid Histology.—Monday and Wednesday, 9-11 a. m.

A course during the First Term given to students of the third year. The lesions affecting the various organs will be taken up systematically, and instruction will be given in the cutting, staining, and mounting of histological preparations. A representative series of microscopical preparations will be loaned to each student for purposes of study, after the mechanical technique shall have been mastered. The student will be expected to make drawings of his sections. A practical examination will be held in the spring.

3. Morbid Anatomy and Post Mortem Examinations.

Demonstrations to students of the third year will be given at suitable times on Morbid Anatomy. Systematic instruction will be given on this important subject to students of the fourth year two hours weekly.

The students of the third, fourth and fifth years are required to attend and assist at all autopsies, and will receive instruction in the proper conduct of the same, and will be expected to prepare and mount all tissues removed at autopsy for purposes of diagnosis, and report upon them.

Bacteriology.

1. Lectures.—Tuesday, Thursday and Friday, 9-10 a. m.

A course of lectures to third year students during the Second Term. The nature of bacteria, their morphology, staining reactions, and mode of growth will be discussed, as well as regular instruction given on their relationship to infective processes. A written and an oral examination will be held in the spring.

2. Laboratory Work.—Monday and Wednesday, 9-11 a. m.

A course during the Second Term for students of the third year, in which will be considered the various culture media, methods of laboratory technique, the mode of growth and specific reactions of the more important bacteria. Particular attention will be given to methods of bacteriological diagnosis as applied to clinical medicine. Students will have an opportunity of making permanent preparations of the various organisms considered for purposes of future study.

Note—For students in the Six Year Course, Bacteriology will be taken up in their third year, and Pathology in their fourth.

Parasitology.

About ten lectures and demonstrations are given during the Second Term, at the close of the regular course in Bacteriology, to students of the third year. This course is elementary and only intended to be a basis for a clearer understanding of the more important diseases due to protozoan and metazoon parasites.

Text Books: Brattain and Dines: *General and Special Pathology*. Stumpf & Piers: *Text Book of Pathology*. Maffey: *Pathological Histology*. Fair and Johnson: *Practical Manual of Bacteriology*. Fagan: *Manual of Laboratory Diagnosis*. Compton: *Practical Bacteriology*.

VII.—Materia Medica.

Professor.....	A. F. Buckley, Pharm. L.	M. D., C. M.
Demonstrator.....	G. A. Berbridge.	

Materia Medica.

This course consists of seventy-five lectures and demonstrations, given in the third year. The official drugs of the British Pharmacopoeia will be considered, also such non-official remedies as are considered advisable. As the principal drugs are discussed attention will be drawn to such points relating to their source, appearance, preparation, action, dosage, etc., as are important for students to know in view of their being prescribed. The drugs and their preparations are illustrated as far as is necessary. Great attention will be given to prescription writing and the student will be carefully exercised in this important feature of the work, so as to enable him to produce intelligent and elegant prescriptions.

Text Books: Hale, White, Bruce, Wood, White.

Practical Materia Medica.

This course, given in the second year, consists of twenty-five meetings of two hours each for practical work in the Maristine College of Pharmacy laboratory. Students will be instructed in the processes of Pharmacy, and in the Dispensing and Incompatibility of drugs.

VIII.—Surgery.

Professors.....	E. V. Hogan, M. D., C. M.
	John Stewart, M. B., C. M., LL. D.
Lecturers.....	Philip Weatherbe, M. B., Ch. B.
	J. G. McDougall, M. D., C. M.

Lecture Courses.

1. A course of about fifty lectures on the general principles of Surgery, to be given during the third year.

2. A course of about fifty lectures on Regional Surgery, to be given during the fourth year.

Text Books: Rose and Cawles, Thomson and Miles, *American System*, Wharton and Cartis.

Operative Surgery.

3. This course, conducted by Dr. Weatherbe, will be given in the fifth year. While descriptive instruction will be given by the teacher, students themselves, under supervision, will be required to perform operations on the cadaver.

Text Books: Treves, Waring, MacGrath.

IX.—Clinical Surgery.

Professors.....	M., Chisholm, M., D., C. M., E. V. Hogan, M., D., C. M., H. K. MacDonald, M., D., C. M.
Lecturers.....	J. G. McDougall, M., D., C. M., G. H. Murphy, M., D., C. M., L. Thomas, M., D., C. M.
Demonstratory.....	J. F. Lessel, M., D., C. M.

Clinical Surgery.—In addition to lectures on cases at the hospitals, students of the fourth and fifth years will be individually trained at the bedside in diagnosis and treatment by the lecturers.

All students before graduation will be required to produce evidence of having served for at least six months as dresser in the Surgical Wards and to submit complete histories of at least fifteen surgical cases.

Practical Surgery.—The application of bandages, splints, and other surgical appliances, the use of instruments and the treatment of emergencies and cases of minor surgery will be taught by Dr. Thomas in the third year. A course of instruction in the administration of anaesthetics will be given by Dr. Lessel.

X.—Medicine.

Professor.....	L. M. Silver, M. B., C. M.
Lecturers.....	[K. A. MacKensee, M. D., C. M.; G. A. MacIntosh, M. D., C. M.]

1. A course of about fifty lectures and recitations in which diseases of the digestive, circulatory, respiratory and genito-urinary systems, blood and ductless glands will be discussed, in the third year.

2. A course of about fifty lectures and recitations in which infectious and constitutional diseases and those affecting the nervous system will be taken up, in the fourth year.

Test Books: For class work: Oster, Anders. For reference: Roberts, Gibson. *Other Modes Medicinae*; Church and Peterson. *Nervous and Mental Diseases*.

XI.—Clinical Medicine.

Professors.....	L. M. Silver, M. B., C. M., M. A. B. Smith, M. D., C. M., G. M. Campbell, M. D., C. M., M. J. Carson, M. D., C. M., Frank G. Mack, B. A., M. B.
Lecturers.....	

Clinical Medicine.—Clinical lectures and instruction will be given to the students of the fourth and fifth years at the Victoria General Hospital every three days a week throughout the session. Students will be called upon in rotation to examine cases.

All students before graduation will be required to produce evidence of having served for at least six months as clinical clerk in the Medical Wards and to submit complete histories of at least fifteen medical cases.

Practical Medicine.—Practical instruction will be given by Dr. Smith and Dr. Carney in Physical Diagnosis, Urinalysis and in the use of the various instruments required for clinical examinations.

Clinical Microscopy and Clinical Chemistry.—The course of instruction in these subjects, consisting of one laboratory period weekly of two hours will be given by Dr. F. G. Mack, during the year. The examination of urine, faeces, stomach contents, sputum, blood and pathological fluids and exudates will be considered practically and their diagnostic importance emphasized.

Test Books: Butler: *Diagnosis of Internal Medicine*. Page: *Physical Diagnosis*. Party: *Urinalysis*. Jacobs: *Abridged Clinical Medicine*. Miner: *Medical Diagnosis*. Hutchinson and Bailey: *Clinical Methods*. Cahill: *Medical Diagnosis*. Du Cane: *Physical Diagnosis*.

XII.—Obstetrics and Gynaecology.

Clinical Professor.....	
Associate Professor.....	
Lecturer.....	C. S. Morton, M. B.

Lecture Courses.

These courses will be given to fourth year students.

1. A course of about fifty lectures on the Principles and Practice of Midwifery, illustrated by diagrams, preserved specimens and the manual.

2. A course of about fifty lectures on Practical and Operative Midwifery, and on Diseases of Women.

Clinical.

Clinics on Diseases of Women will be given at the Victoria General Hospital every week, at which students of the fifth year will be called on in rotation to make gynaecological examinations. Clinics in Obstetrics will be given in the Lying-in Wards of Maternity institutions.

Practical Obstetrics.

Students of the fourth and fifth years will attend cases of labour in Maternity institutions, where they will receive practical instruction in the management and after treatment of labour. Each student before graduation must have attended at least six maternity cases.

Test Books: Obstetrics—Polak, Hess, Edgar, Williams. Gynaecology—Davis, Short.

XIII.—Medical Jurisprudence.

Lecturer.....	B. Franklin Royer, M. D., D. Sc.
---------------	----------------------------------

This course, of about thirty lectures, will embrace the subjects enumerated below, and as far as possible will be supplemented by visits with the medical examiners of the City of Halifax and Town of Dartmouth in official investigations to determine the cause of death.

I. Examination of persons found dead, with reference to: Identification, Time of Death, Cause of Death.

II. Violent causes of Death—Drowning, Strangulation,

- III. Poisons and Poisoning.—(1) Symptoms and post mortem appearances in cases of poisoning by the following agents: Inorganic Mineral Acids, Solutions of Alkalies, Copper, Lead, Mercury, Antimony, Arsenic, Phosphorus, Organic—Oxalic Acid, Carbolic Acid, Opium, Strychnine, Belladonna, Aconite, Chloroform, Chloal Hydrate, Cyanides, Chlorine, Carbon Monoxide, Mustard, etc. (2) Duties of Medical men in cases of Poisoning as regards—Observation, Treatment and Preservation of parts for Analysis. (3) Preliminary Tests of Poisons Substances for clinical use before reference to an Analyst.
- IV. Medico-legal points in connection with—Pregnancy, Delivery, Rape, Criminal Abortion, Infanticide, Assaults and Homicide, Wounds and other external injuries, Malpractice, and Neglect of Duty.
- V. Mental capacity in relation to Criminal Responsibility, Contracts and Wills. The Lunacy Laws in so far as they affect the Medical Practitioner when signing Certificates of Lunacy.

Text Books: Rose, Glaister, Taylor, Draper.

XIV.—Therapeutics.

Lecturer J. R. Corston, M. D., C. M.

Therapeutics.—In this course, which will consist of fifty lectures to be given in the fourth year, the subject of General Therapeutics, including the therapeutic action of drugs and other remedial measures, will be dealt with.

In addition to the above systematic course a series of about thirty lectures is given by special lecturers on electro-therapy, hydro-therapy, climatology, radiology, massage and clinical dietetics.

Text Books: Hare: *Practical Therapeutics*. Whibley: *Therapeutics*. Cushing: *Therapeutics*.

XV.—Hygiene.

Lecturer W. H. Hattie, M. D., C. M.
[Col. H. M. Jacques, M. D., D. P. H., D. S. O.]

Hygiene.—This course, given by Dr. Hattie, will consist of fifty lectures and demonstrations in which the following matters will be dealt with as far as possible.

I. Public Health Administration. The duties of the physician relative to notification of communicable diseases, etc.

II. Epidemiology. The public health aspects of the communicable diseases.

III. Quarantine, disinfection, etc.

IV. Water in its relation to Health and Disease:—The character and classification of Drinking Water. Causes and Sources of the Impurities found in Water and Methods of Purification. The Diseases conveyed by water, and the Methods of dealing with Epidemics of such Diseases.

- V. Air, in relation to Health and Disease—The Causes and Sources of the Impurities found in the Air. The Diseases conveyed through the Air. The quantity of Air necessary for Health.
- VI. Ventilation, Heating, Lighting, etc.
- VII. Housing, Building Sites, Soil.
- VIII. Removal of Refuse, Disposal of Excreta and Sewage.
- IX. Food, in relation to Health and Disease—Dietetics. The Common Adulterations of the Chief Articles of Diet. Diseases connected with Deficiency or Impurity of Food Supply.

Text Book: Parkes and Kenwood: *Hygiene and Public Health*.

Military Hygiene.

A special course of about ten lectures on this important subject will be given towards the end of the second term by Colonel Jacques. Such subjects as the following will be considered:—Military Medical Organization in time of War; the duties of Sanitary Squads; Water Parties, Regimental Medical Officers, Sanitary Officers on lines of communication, District Sanitary Officers; the Care of Troops on the march; Field Conservancy; Purification of Water; Limitation of Infectious Disease; Selection of bivouacs, camps, billets and barracks; Sanitary Inspection of huts, barracks, camps, camps, billets, fortifications and hospitals.

Text Book: Lejean: *Seminaries in War*.

XVI.—Skin Diseases.

Lecturer Frank G. Mack, B. A., M. B.

This course will consist of not less than twenty-five lectures, chiefly clinical, to be given in the wards of the Victoria General Hospital to fifth year students.

Patients will be brought before the class and their condition examined into and demonstrated, and the appropriate treatment prescribed and illustrated.

Text Books: Walley: *Introduction to Dermatology*. Schamberg: *Diseases of the Skin and the Respiratory System*. Maxwell: *Diseases of the Skin*. Seaman: *Diseases of the Skin*.

XVII.—Eye, Ear, Nose and Throat Diseases.

Lecturer R. Evatt Mathers, M. D.

Didactic and Clinical instruction in these subjects will be given to students of the fifth year each week during the session, on Wednesdays, at 3 p. m., at the Victoria General Hospital, and at the Children's Hospital.

Text Books: Disease of the Eye—Jacobs, May, Tex.: *Diseases of the Eye*. British—Parker, Beck, Denby: *Diseases of the Nose and Throat*—Cawley: *Diseases of the Ear, Nose and Throat*—Gleeson. Nose, Throat and Ear—Porter.

XVIII.—Mental Diseases.

Professor W. H. Hattie, M. D., C. M.
Clinical Instructor F. E. Lawlor, M. D., C. M.

A course of twenty didactic lectures on the various forms of mental disease will be given to fifth year students, supplemented by clinical instruction by Dr. Lawlor at the Nova Scotia Hospital.

Text Book: *Sudman, Craig.*

XIX.—Paediatrics.

Author..... M. J. Carney, B. A., M. D., C. M.

This course will consist of twenty-five didactic lectures to students of the fourth year. In addition a course of clinical lectures illustrative of Disease in Children will be given on Saturdays throughout the session by members of the staffs of the Victoria General Hospital, the Children's Hospital, the Infectious Diseases Hospital, and of the Infants' Home.

Text Book: *Dugawall-Fordyce: Diseases of Children. Stell: Common Diseases and Disorders of Children. Holt: Diseases of Infancy and Childhood. Morse and Talbot: Diseases of Nutrition and Infant Feeding.*

XX.—Vaccination.

Students will receive instruction in this subject at the Dispensary, Infants' Home, and other institutions. They will be required to perform the operation and note results so as to obtain a certificate of proficiency.

XXI.—Medical Ethics.

A short course of lectures on this important subject was inaugurated in 1916. These lectures are for fifth year students only.

Faculty of Dentistry.

Preliminary Statement.

An agreement was consummated in 1911 between the Board of Governors of Dalhousie University and the Provincial Dental Board of Nova Scotia, whereby the Maritime Dental College was merged into the Faculty of Dentistry of the University.

The instruction in the purely scientific subjects and in the professional subjects common to Dentistry and Medicine is taken by Dental students in common with the students of the Faculties of Arts and Science and of Medicine. Instruction in the Dental subjects is given in the Dental Apartments, in the south wing of the Forrest Building; these include the Infirmary and the Dental Laboratories. Abundant Dental Infirmary practice is available. The Victoria General Hospital is near by, and affords an ample surgical clinic. Students will also attend the dental clinic of the Halifax Dispensary. The laboratory of Pathology and Bacteriology, which has been erected and equipped by the Hospital Commission in connection with the Victoria General Hospital, affords superior facilities for both elementary and advanced study of these subjects.

By an arrangement between the University and the Provincial Dental Board of Nova Scotia the Professional examinations are conducted by the examiners of the Faculty of Dentistry of the University, so that candidates may qualify at the same time for the degree of D. D. S., and for the license to practise in Nova Scotia.

Important Notice.

Students are reminded that the Dental degree does not necessarily qualify for admission to practise in any province, each province having its own regulations for admission, to which a candidate must conform. Particulars regarding these regulations in each of the Maritime Provinces and in Newfoundland may be obtained from the respective Registrars, who are as follows:

For Nova Scotia: Dr. G. K. Thomson, Halifax, N. S.
 For New Brunswick: Dr. F. A. Godsoe, St. John, N. B.
 For Prince Edward Island: Dr. J. S. Bagnall, Charlottetown, P. E. I.

For Newfoundland: Dr. T. P. Smith, St. John's, Newfoundland.

Dominion Dental Council.

The Dominion Dental Council of Canada is a central organization under the control of the dental profession of Canada. Its object is to erect and maintain a standard of education and ethics for the dental profession, and to conduct professional examinations and issue Certificates of Qualification which will be accepted without further examination by the provinces.* These certificates are now accepted in all the provinces except Quebec.

Dental students who comply with the Council's Matriculation or Preliminary education requirements and term of studentship, and who graduate from an accepted Canadian dental college, and pass the examination of the Council, may be registered in any province in Canada without further examination (British Columbia and Quebec excepted). This privilege is enjoyed by the graduates in Dentistry of this University, as its Matriculation regulations meet the requirements of the Council, and the Faculty of Dentistry is on the accepted list of Canadian colleges.

General University Regulations.

University regulations applicable to the students of all Faculties and relating to residence, church attendance, discipline, etc., will be found in the University Calendar, pp. 17-20.

Academic Year.

The Academic Year consists of one session of eight months' duration. The session of 1921-22 will begin on Wednesday, Sept. 28th, 1921, and end on Thursday, May 27th, 1922, except for students of the fourth year, in whose case the session will begin on Sept. 14th and end on May 11th. No student will be admitted after October 8th.

*For information address Dr. W. D. Crossan, Secretary of the Dominion Dental Council, Regina, Sask.

Degree.

The only degree conferred in the Faculty of Dentistry is that of Doctor of Dental Surgery (D. D. S.).

Admission of Students.

Candidates for admission to the course in Dentistry must have complete Matriculation.

A student will not be admitted to the classes of the second or any higher year, unless he has passed in all the subjects of the previous year.

Students intending to practise in Nova Scotia must register with the Provincial Dental Board before beginning their course of study.

Students intending to practise in another province of the Dominion or in another country are reminded that they must conform to all the regulations of that province or country.

Women are admitted to classes under the same conditions as men.

No person under sixteen years of age is admitted to any class.

Matriculation.

Full details of the requirements for Matriculation will be found in the University Calendar (pp. 11-16).

Curriculum.*

The course for the degree of Doctor of Dental Surgery extends over four years. Beginning with the Session of 1922-23, the course will be lengthened to five years. The first or pre-dental year will consist of Chemistry, Physics, Biology, English and an elective taken in a recognized degree conferring institution and students who enter with credit for these classes will be admitted to the second year of the five year course. The course is as follows:

First Year.

Lectures — Physics 1, Chemistry 1B, Biology 1, Histology, Prosthetic Dentistry, Dental and Comparative Dental Anatomy.

*It is to be distinctly understood that the regulations regarding courses of study, examinations, fees, etc., contained in this Calendar are intended for the current year only, and that the Faculty does not hold itself bound to adhere absolutely to the curriculum and conditions now laid down.

Laboratory—Physics, Chemistry, Biology, Anatomy, Histology, Elementary Bacteriology, Prosthetic and Dental Anatomy Technic.

Second Year.

Lectures—Chemistry 3 and 4, Anatomy 1, Embryology, Physiology 1, Operative and Prosthetic Dentistry.
Laboratory—Chemistry, Anatomy, Physiology 3b, Operative and Prosthetic Technic.

Third Year.

Lectures—Prosthetic Dentistry, Crown and Bridge Work and Ceramics, Operative Dentistry, Orthodontia, Materia Medica, General Pathology and Bacteriology, Dental Pathology and Therapeutics, Surgery, Exodontia and Anaesthetics.

Laboratory—Prosthetic and Operative Dentistry, Dental Infirmary, Crown and Bridge Work and Pathology, Pathology and Bacteriology, Orthodontia.

Fourth Year.

Lectures—General and Oral Surgery and Anaesthesia, Operative and Prosthetic Dentistry, Orthodontia, History, Ethics and Jurisprudence, Crown and Bridge Work, Ceramics and Hygiene, Radiology, Metallurgy.

Laboratory—Prosthetic Laboratory, Dental Infirmary, Hospital, Crown and Bridge Work and Ceramics, Orthodontia.

Regulations for Degrees.

In addition to the Matriculation or Preliminary examination, candidates for degrees are required to pass four Professional examinations, one at the end of each year of the course, on the dates set in the University Almanac. The examinations are arranged as follows:

First Professional Examination.

One paper in each of the following subjects: Physics, Chemistry, Biology, Histology, Prosthetic Dentistry, Dental and Comparative Dental Anatomy, and an oral examination in Anatomy.

Second Professional Examination.

One paper and a laboratory examination in Chemistry; one paper and an oral examination in Anatomy including Embryology; one paper and an oral and practical examination in Physiology including Histology, and one paper in each of the following, Operative Dentistry and Prosthetic Dentistry.

Third Professional Examination.

One paper in each of the following: Prosthetic Dentistry, Crown and Bridge Work and Ceramics, Operative Dentistry, Orthodontia, Materia Medica, Dental Pathology and Therapeutics, Surgery, Exodontia and Anaesthetics, and one paper and an oral examination in General Pathology and in Bacteriology.

Fourth Professional Examination.

One paper in History, Ethics and Jurisprudence, and one in Metallurgy; one paper and an oral examination in each of the following: (a) Surgery and Anaesthetics, (b) Operative Dentistry, (c) Prosthetic Dentistry, (d) Orthodontia, (e) Crown and Bridge Work and Ceramics and Hygiene, and an oral examination in Radiology.

Pass and Distinction Lists.

The names of successful candidates are arranged in the published lists in two divisions, the Pass and the Distinction division. To pass, a candidate must obtain a minimum mark of 40 per cent. in the pure sciences, Physics, Chemistry and Biology and a minimum mark of 50 per cent. in all other subjects. For Distinction in any given subject he must obtain a mark of 75 per cent. or over. The names for Distinction are arranged according to merit, the Pass list in alphabetical order.

Admission to Examinations.

Candidates must conform to the following requirements in order to qualify for admission to the Professional examinations:

1. They must attend the prescribed classes of the curriculum regularly and punctually. Certificates indicating less than 90 per cent. of attendance upon any class will not in ordinary circumstances be accepted.
2. They must prepare such exercises, reports, etc., as may be prescribed, and in the case of classes involving laboratory or practical work they must complete such work satisfactorily.
3. Candidates for the Final Professional examination will be required to subscribe to the following declaration with regard to their age:

Halifax, N. S., 19 ..

I, the undersigned, being desirous of obtaining the Degree of Doctor of Dental Surgery, do hereby declare that I have attained the age of twenty-one years (or, if the case be otherwise, that I shall have attained the age of twenty-one years before the next graduation day).

(Signed)

Supplementary Examinations.

A candidate who has failed to pass in not more than two subjects of the Professional examination of any year shall be entitled to Supplementary examinations in such subjects, provided he is qualified in attendance and classwork for admission to examination.

A candidate who has failed to pass in more than two subjects of any Professional examination shall be required to repeat his attendance and class work in all the subjects of the year.

Supplementary examinations are held on the dates specified in the University Almanac, in September and during the regular Professional examinations in May, but at no other times.

Application for admission to a Supplementary examination must be made on or before the date set in the University Almanac for receiving applications, on a form to be obtained from the Dean of the Faculty, and must be accompanied by the proper fee. (See p. 124).

Exemptions.

Candidates may be exempted from examination in one or more subjects of the first three Professional examinations on presenting certificates of having taken equivalent classes and passed equivalent examinations at any dental college recognized by the Senate for the purpose, and complying with the regulations of the University.

Instruments and Appliances.

All the heavier appliances are supplied by the University. The student must provide all other instruments, tools and material for his technic work in both Laboratory and Infirmary. Intending students should communicate as early as possible with the Dean for information concerning the list of instruments and books required. The borrowing of instruments is absolutely forbidden.

Medals and Prizes.

University Medal in Dentistry.—This medal will be awarded on graduation to the student who stands highest in the fourth professional examination, provided he shall obtain Distinction in at least four of the five major subjects of that examination, and shall have reached an exceptionally high standing on the whole four years of his course.

The Maritime Dental Supply Company Prizes.—This firm offers two sets of prizes—Books to the value of \$25 to be divided between the two students who make the best two general averages in all subjects of the First Professional examination; and also in the case of the Second Professional examination.

The Nova Scotia Dental Association Prizes.—Books to the value of \$25 to be divided between the two students who make the best two general averages in all subjects of the Third Professional examination.

Fees.

All fees and deposits are payable in advance, and until these are paid the student will not receive credit for attendance upon any class.

For Registration.*

Payable by students taking only one class in the University.....	\$ 5.00
Payable by students taking more than one class.....	5.00
Additional, for registration after the beginning of lectures.....	2.00

The Registration Fee entitles a student to the use of the University Library, Dental Library, Athletic Field and Student Building.

For Tuition.

Students taking individual classes will be charged according to the schedule shown on Page 104, if those classes are common to the Medical curriculum. The charge for purely Dental classes may be had on application.

Inclusive Fee Payable by Students taking the Regular Classes of any Year of the Curriculum.	
For each year.....	\$209.00

This includes registration, tuition, hospital, laboratories and the regular sessional examinations.

For Examinations.

<i>An application for Examination must be accompanied by the proper fee.</i>	
Matriculation examination at an outside centre.....	\$ 5.00
Special Matriculation examination.....	4.00
Individual subjects of dental examination, each subject.....	5.00
Supplementary examination, each subject.....	10.00

For Certificates and Diplomas.

<i>An application for a Certificate or Diploma must be accompanied by the proper fee.</i>	
Certificate under the University seal.....	\$ 1.00
Diploma, payable by those attending less than 8 years.....	20.00

Diploma, extra when conferred de absentia.....	5.00

Caution Deposit.**Laboratory Deposits.****Fee for Support of Student Organizations.****Students Loan Fund.**

*Students who register only for the purpose of taking examinations are exempt from the payment of this fee.

†A Matriculation examination taken by a student after his second Autumn term of attendance at the University will be charged for as a Special examination (\$4.00) if taken in January, or as a Supplementary (\$2.00) if taken in September.

COURSES OF INSTRUCTION.**Physics.***(Munro Professorship).*

<i>Professor</i>	Howard L. Brown, Ph.D., F. R. S.	C
<i>Assistant Professor</i>	J. H. L. Johnston, B. B. D., Ph.D.	
<i>Instructor</i>	Merle P. Colpitt, M. A.	

- I. General Physics.**—*Lectures: Monday, Wednesday and Friday, 10-11 a.m.*
Pre-requisite.—Matriculation Mathematics and Physics.

The whole subject of Experimental Physics is taken up, the subjects treated being: Kinematics, Dynamics, Properties of Matter, Sound, Heat, Electricity and Magnetism, Light and other form of Radiation. The lectures are illustrated by experiments, and special attention is paid to the solution of problems, all students being required to hand in papers for corrections and criticism.

Two hours a week are devoted to Laboratory work. The Laboratory class is divided into three sections, which meet on Monday and Wednesday, 11 a. m.—1 p. m., and Friday, 2.30—5.30 p. m. The experiments selected for the course are designed to acquaint the student with the methods and instruments used in physical measurements. They will also assist him in grasping that part of the subject which is taught in the lectures.

Text Books: *Kinetic College Physics.*

- 20. Light, Sound, and Electricity.**—*Lectures: Monday and Wednesday, 9-10 a. m. Laboratory: Monday 2.30-5.30.*

Pre-requisite.—Physics I.

This course is primarily intended for second year students in Medicine and Dentistry and special attention will be given to those parts of the subject of especial interest to them. It may be elected by any students who are properly qualified.

Chemistry.*(McLeod Professorship).*

<i>Professor</i>	C. H. Nickerson, A. M.
<i>Assistant Professor</i>	B. C. Fasson, M. A.
<i>Assistant Professor</i>	E. W. Todd, B. A.

- 1B. General Chemistry.**—*Lectures: Monday, Wednesday and Friday, 9-10 a. m. Laboratory: Tuesday, 11-12 a. m. and Saturday, 11 a. m.—1 p. m.*

Lectures in General Chemistry covering the same ground as Chemistry I in the Faculty of Arts and Science. At least three hours a week must be devoted to laboratory work.

Text Book: *Smith: General Chemistry for Colleges.*

- 3. Metals and Qualitative Analysis.**—*Lectures:* Saturday, 9–10 a. m. *Laboratory:* Tuesday, 10–11 a. m., and Thursday, 10–12 a. m.

Pre-requisite.—Chemistry 1B.

Class Work.—Metals and their compounds, with special reference to those having medicinal or dental uses or toxic properties elements of Physical Chemistry.

Laboratory Work.—Qualitative analysis, including the detection of the more commonly occurring poisons.

Test Books: Smith: *General Chemistry for Colleges*. F. M. Perkins: *Qualitative Analysis*.

- 4. Organic Chemistry.**—*Lectures:* Tuesday and Thursday, 9–10 a. m.

Pre-requisite.—Chemistry 1B.

Purification and analysis of carbon compounds. The paraffins, ethylene, acetylene, benzene and their chief derivatives, especially those met with in Physiology and Therapeutics. In the laboratory a few typical carbon compounds are prepared and studied.

Test Book: Remond: *Compounds of Carbon*, 5th edition.

Biology.

Assistant Professor J. A. Dawson, Ph. D.
Assistant Professor Hugh P. Bell, M. A., M. Sc.

- 1B. General Biology.**—*Lectures:* Three hours per week. *Laboratory:* Six hours per week.

For Biology 1, see under Arts courses.

The aim of this course is to acquaint the student with some of the more important biological facts and theories and results of biological work; also to serve as an introduction to biological methods. It includes a general survey of the plant and animal kingdoms with particular emphasis on the study of vertebrate types as well as the discussions of topics of fundamental biological importance, e.g., protoplasm, cell and cell structure, reproduction, inheritance, variation, adaptation, evolution, etc.

Anatomy.

(Dr. D. G. J. Campbell Memorial Professorship).

Demonstrators [D. St. C. Campbell, M. D., C. M., W. Alan Curry, M.D., C.M., F.R.C.S.
 Florence J. Murray, M.D., C.M., H. E. Atlee, M.C., M.D., C.M., G. W. Grinn, M.C., B.A., M.B., Ch.B.

Lectures.

- 1. General Anatomy.**—Monday, Wednesday and Friday, 12–1 p. m., and Tuesday and Thursday, 2.30–3.30 p. m.

This course is intended for students of the second year. Osteology and Arthrology will first be dealt with. The entire skeleton will be carefully studied, all the bones and joints being

examined in detail. A large supply of bones is kept on hand, and these are freely supplied to students both in the Practical Anatomy rooms and for study at home, on their making a deposit of the proper fee; but students are expected to provide themselves with the bones of the head.

The latter part of the course will be devoted to the consideration of the Regional Anatomy of the body. Lectures will be illustrated by fresh dissections, plates, diagrams and models. Test Book: *Cameron's Regional Anatomy*.

- 2. Human Embryology.**—Monday, 10–11 a. m.

A course of lectures and demonstrations to students of the second year, devoted to an elementary study of the development of the form, organs and tissues of the human body.

Practical Anatomy.

Special attention will be given to this branch. The dissecting room will be open daily except Friday and Saturday, and will be under the direct supervision of the Professor of Anatomy, assisted by the Demonstrators, one or other of whom, in addition to the Professor, will be present every day so that each student will be frequently examined and assisted during the progress of his dissections. The course extends over two years. Dental students must dissect the head and neck and one other part is each year.

Test Book: *Cameron's Regional Anatomy*.

Physiology and Histology.

Professor D. Fraser Harris, M. D., D. Sc., F. R. S. S., E.A.C.
Demonstrators [H. W. Schwartz, M. D., C. M.
 (Miss Margaret Low.

Lectures.

- 1. General Physiology.**—Monday, Wednesday and Friday, 11–12 a. m., and Saturday, 12–1 p. m.

This course consists of one hundred lectures, and is designed to give the students of the third year a knowledge of the elements of Human Physiology. Special attention will be paid to the physiology of the mouth and of digestion.

Test Book: Howell: *Test Book of Physiology*. Fraser Harris: *Moses* (Home University Library).

Practical Physiology.

- 2. Histology.**—Tuesday and Thursday, 9–11 a. m.

This course, which consists of at least fifty meetings of two hours each, is intended for students of the second year. It is designed to give the student a knowledge of the minute structure of the blood and all the tissues and organs of the human body. Special attention will be paid to the microscopic structure of the teeth and gums. Demonstrations will be made of dried preparations, and sections of decalcified teeth &c &c will be given out.

The student will be instructed in the methods of fixing, staining and examining tissues, as well as in the use of microtomes for cutting sections in paraffin and in gum.

Text Books: Schaffer: *Essentials of Histology* (classroom edition). Jordan-Pengson: *Text Book of Histology*.

3.b. Bio-Chemistry.—Second Term, Friday, 2:30—4:30 p. m.

This course is designed to give students a practical acquaintance with the chemical nature of the secretions, excretions and fluids of the body, as well as that of the food-stuffs.

Text Books: Halliburton: *Essentials of Chemical Physiology*. Rattan and Hardinge: *Laboratory courses in Chemistry for Medical Students*. Baugh-Pleasance: *Chemistry for Medical Students*.

Pathology, Bacteriology and Parasitology.

Professor	Albert G. Nichols, M. A., M. D., Sc., F. R. S. C.
Lecturer	Donald J. MacKenzie, M. D., C. M.
Demonstrators in Bacteriology	J. F. G. Mack, B. A., M. B. J. N. Lyons, M. D., C. M.
	W. Alan Curry, B. A., M. D., C. M., F. R. C. S. E.
Demonstrators in Pathology	Gerald W. Grant, M. B., Ch. B., M. C.

Pathology.

1. Lectures. General Pathology.—Tuesday, Thursday and Friday, 9-10 a. m.

A course of lectures to third year students during the First Term, dealing with the general principles of Pathology, in which the following subjects will be considered: the morphology, physiology, and chemistry of the cell; the causes of disease; the morbid processes; the tissue changes; reaction and adaptation. In the latter portion of the course the relationship of the grosser animal parasites to the animal economy will be discussed. The oral examination will be held on the completion of the course, the written in the spring.

2. Laboratory Work. Morbid Histology.—Monday and Wednesday, 9-11 a. m.

A course during the First Term given to students of the third year. The lesions affecting the various organs will be taken up systematically, and instruction will be given in the cutting, staining, and mounting of histological preparations. A representative series of microscopical preparations will be left to each student for purposes of study, after the mechanical technique shall have been mastered. The student will be expected to make drawings of his sections. A practical examination will be held in the spring.

Bacteriology.

1. Lectures.—Tuesday, Thursday and Friday, 9-10 a. m.

A course of lectures to third year students during the Second Term. The nature of bacteria, their morphology, staining reactions, and mode of growth will be discussed, as well as regular instruction given on their relationship to infective processes. A written and an oral examination will be held in the spring.

2. Laboratory Work.—Monday and Wednesday, 9-11 a. m.

A course during the Second Term for students of the third year, in which will be considered the various culture media, methods of laboratory technique, the mode of growth and specific reactions of the more important bacteria. Particular attention will be given to methods of bacteriological diagnosis as applied to clinical medicine. Students will have an opportunity of making permanent preparations of the various organisms considered for purposes of future study.

Parasitology.

About ten lectures and demonstrations are given during the Second Term, at the close of the regular course in Bacteriology to students of the third year. This course is elementary and only intended to be a basis for a clearer understanding of the more important diseases due to protozoan and metazoan parasites.

Text Books: Baetzke and Dixon: *General and Special Pathology*. Stenøil & Fox: *Text Book of Pathology*. Mallory: *Pathological Histology*. Meltz and Ritchie: *Manual of Bacteriology*. Baugh: *Essentials of Laboratory Diagnosis*. Casals: *Practical Bacteriology*.

Prosthetic Dentistry.

Professor	F. Woodbury, D.D.S., LL.D.
Lecturer	(G. H. Flack, D. D. S.)
	(R. H. Woodbury, D. D. S.)
	(A. W. Faulkner, D. D. S.)
	(J. S. Bagshaw, D. D. S.)

This course continues throughout the four years. The instruction is didactic and practical. The teaching and Laboratory Technic are designed to impart a working knowledge of all that appertains to Dental Prosthesis. Technic will be carried along as proper sequence, and at the earliest moment students will be required to construct dental appliances of various kinds for patients in the Infirmary.

Text Books: Wilson, Fetherston, Turner.

Dental Anatomy and Comparative Dental Anatomy.

Professor	S. G. Ritchie, B. A., D.M.D.
------------------	------------------------------

Dental Anatomy.—This course includes a study of the contents of the buccal cavity from a dental standpoint.—The forms of the teeth, the process of calcification, eruption and absorption; a minute study of the teeth, dental pulp and surrounding tissues.

A practical course in tooth modelling, and dissection of the natural teeth will be carried on in the laboratory.

Text Book: Black.

Comparative Dental Anatomy.—The lectures and demonstrations in this course are designed to be a study in the classification of dental types and theories of evolution of the dental organs from simple to complex forms.

Text Book: Tomes.

Operative Dentistry.

<i>Professor</i>	F. W. Ryan, D. D. S.
<i>Lecturer</i>	W. H. H. Beckwith, D. D. S.

The instruction in this subject begins in the second year. It will proceed through the processes involved in Operative Technic to a study of the whole subject of Operative Dentistry. The course will be thoroughly illustrated and demonstrated in the Technic Laboratory and Infirmary.

Students in the third and fourth years will be engaged in Infirmary practice daily under the supervision of experienced demonstrators. The work of the fourth year is designed to instruct the student in the details of Operative practice.

Text Books: Johnson, Kirk, Black.

Crown and Bridge Work, Ceramics and Hygiene.

<i>Professor</i>	G. K. Thomson, D. D. S.
<i>Lecturer</i>	W. C. Oxner, D. D. S.

This subject will be presented by lectures, demonstrations and laboratory experiments. It will continue throughout the third and fourth years, with Infirmary practice.

Gold and Porcelain Crowns, Bridges and Inlay Construction, including casting methods, will receive proper attention. The latest types of electric furnaces and casting machines are provided for the use of the students. Students who may desire to use their own electrical furnaces will be supplied with electric connections.

Oral Hygiene will receive the consideration which its great importance demands. The student will be taught the most approved manipulative and therapeutic methods for effecting, as far as may be, a condition of immunity in the oral tissues.

Text Books: Giesler, Ryman.

Orthodontia.

<i>Professor</i>	W. W. Woodbury, B. Sc., D. D. S.
------------------------	----------------------------------

This subject will be presented in a course of lectures and clinical demonstrations during the third and fourth years.

The course of instruction will proceed from a discussion of normal conditions to the various derangements of alignment of the teeth, the abnormalities of the dental arch and consequent deformities of the face, and interference with mastication. The methods and appliances adopted to correct or ameliorate these conditions will be practically applied.

Text Books: Lischer, Angle.

Materia Medica.

<i>Lecturer</i>	K. F. Woodbury, D. D. S.
-----------------------	--------------------------

This course consists of about twenty-five lectures given in the third year. The student is expected to become familiar with the properties, uses and therapeutic effects of the drugs used in dentistry.

Text Books: Buckley, Pritchett.

Dental Pathology and Therapeutics.

<i>Professor</i>	A. W. Cogswell, M. D., C. M., D. D. S.
------------------------	--

The course is designed to provide a proper knowledge of Dental Pathology and Therapeutics. The lectures will be given in the third year, with practical demonstrations in the Infirmary throughout the third and fourth years. The principles of sterilization will be carefully taught.

Text Books: Buckler, Gorham.

General Surgery.

<i>Professor</i>	John Stewart, M. B., C. M., LL.D.
<i>Lecturer</i>	Philip Weatherbe, M. B., Ch. B.

Surgery. 1. A course of about fifty lectures on the general principles of Surgery, to be given during the third year.

Text Book: Rose and Carles.

Oral Surgery and Anaesthetics.

<i>Professor</i>	F. V. Woodbury, M. D., C. M., L. R. C. S.
------------------------	---

Surgery. A course on Oral Surgery, to be given during the fourth year, embracing operations which the dental surgeon should be able to perform.

Text Books: Blair, McCarty.

Anaesthetics.—General Anaesthetics will be taught along with Oral Surgery, ample opportunity being given for practical demonstrations.

Text Book: Luke, Scriven.

History, Ethics and Jurisprudence.

<i>Lecturer</i>	Frank Woodbury, D. D. S., LL.D.
-----------------------	---------------------------------

History.—History and development of Dentistry.

Ethics.—A brief statement of the important principles of morals and obligations of professional men to their patients, other practitioners, and the public.

Jurisprudence.—A discussion of the subject as it affects the qualifications and responsibilities of the Dental Surgeon.

Text Books: Koch, Gabriel, Noyes, Brothers.

Exodontia and Radiology.

<i>Lecturer</i>	G. R. Hennigar, D. D. S.
-----------------------	--------------------------

Exodontia.—A course of lectures weekly during the second term of the third year, including the study of nitrous oxide, oxygen, somnolom, etc., and local anaesthetics.

Radiology.—A course of lectures weekly during the first term of the fourth year, including the study of plates and films from the Infirmary.

Text Books: Whistler, Thomas, Raper.

Metallurgy.

Lecturer..... C. B. Nickerson, M. A.
A course of lectures and demonstrations in Metallurgy will be given during a part of the fourth year.

Text Book: Best.
