

N<sup>o</sup> 9 Chapel Row Bath Jan. 13<sup>th</sup> 1789

Dear Sir

Since my arrival here I have been in hopes of the pleasure of hearing from you with the result of the Question concerning the Transit of Mercury which you was so obliging to undertake & likewise to know whether my Ideas on the artificial Horizon met with the Gentleman (whose name I forget) that made the Compasse which I saw in your room. -

It will be the end of the month before I leave this place when I hope the frosty weather will be over & the journey to London more pleasant than what it is at present, Our friends

Friend W. J. Bell I understand left London  
some time ago He will find it very cold  
in the North to what it is here, Should  
you see his Brothers they you will  
remember me to them & remain

Dear Sir

Yours sincerely

J. J. Frost
