

The Proceedings and Transactions of the Nova Scotian Institute of Science
Volume 17 Part 3

Proceedings	X-XXXII
The heats of solution of certain alkali halides and the specific heat of their solutions – <i>H. Ritchie Chipman</i>	149-167
The effect of velocity on diffusion rates – <i>A. E. Murray</i>	168-171
An attempt to measure the range of the alpha particle of thorium – <i>J. L. Nickerson</i>	172-174
Some measurements of the heat capacity of fish muscle - <i>H. Ritchie Chipman</i>	175-184
IchthyophonusHoferi, Plehn and Mulsow, a flounder parasite new to North American waters: Studies from the department of zoology, Dalhousie University, and the Atlantic Biological Station, St. Andrews, N.B. – <i>Marjorie F. Ellis</i>	185-192
Reduction of metanitrobenzaldehyde with sodium arsenite – <i>H. E. Bigelow and Jean H. Philip</i>	193-196
An adiabatic calorimeter for low temperature measurements – <i>D. LeB. Cooper and D. McIntosh</i>	197-198
Intestinal reaction to drugs in different fishes – <i>N. B. Dreyer</i>	199-205
On the rate of freezing in fish muscle – <i>G. O. Langstroth</i>	206-212
Appendix	I-III
