Table S2. Akaike's information criterion (AIC) results for all possible combinations of ≤ 3 factors explaining variation in erosion rate (g d^{-1}) for *Saccharina longicurvis* and *Laminaria digitata*: percentage cover by *Membranipora membranacea* (% M), percentage distal area grazed by snails (% Gzd) and temperature (Temp). Uncorrected AIC, the number of observations (n), second-order bias-corrected AIC (AIC_c), the difference between the minimum AIC_c and the AIC_c for each model (ΔAIC_c), the log likelihood function, the model probability (w_i) and the R^2 value of each model are shown

Species	Model	AIC	n	AIC_c	ΔAIC_c	Log likelihood	w_i	R^2
