INTRODUCTION.

By the Royal Charter granted in 1802, all the privileges of a University were conferred on King's College, which thus became the first University of British origin established in the Dominion.

A Provincial Act incorporating the Governors of King's College received the Royal sanction in 1853. It provides that the Royal Charter of Incorporation shall not be affected by it further than is necessary to give effect to its own enactments.

The Patron of the University is the Archbishop of Canterbury, to whose approval "all Statutes, Rules and Ordinances" of the Board of Governors are subject, but King's College is open to students of all denominations, and imposes no religious test either on entrance or on graduation in any Faculty, with the exception of Divinity.

In 1871 a Curriculum was issued for a course of Civil Engineering, and the University has subsequently granted Degrees and Diplomas in that science, as well as in Arts, Law and Divinity.

During the past Academical Year many improvements have been made in the Meteorological Observatory. The Philosophical Apparatus, for purposes of general instruction, has also been improved, and largely increased, so that the College now possesses all that may be required for illustration in the most advanced course of Physical Science.

A system of Local Examinations has been instituted for those who are not members of the University.

Candidates for Matriculation may now be examined at distant centres, under special regulations, which will be found in the Calendar.

The vacancy caused by the resignation of Professor Oram, to whose zeal and efficiency as Professor of Mathematics and Engineering for eight years the College owes so much, has been filled by the appointment of W. R. Butler, Esq., B. E.

The Examiners for the past Academical Year, outside the Faculty, were as follows:—

- The Rev. Canon Maynard, D. D.
- The Rev. John Ambrose, M. A.
- Professor Liechti, M. A.
- G. R. Gibson, Esq., B. A., Oxon.
- A. B. Warburton, Esq., B. C. L.
- J. R. Walker, Esq., Naval Instructor H. M. S. "Northampton."

All the information required by candidates for admission may be gathered from the pages of the Calendar.

- 3.—*Elective Students*: who desire to attend during an Academical Year or Term, one, two, or more courses of Lectures.

MATRICULATION.

IN ARTS every Student presenting himself for Matriculation shall be required to pass an examination in the following subjects:—

I.—CLASSICS.

THE GREEK AND LATIN LANGUAGES.

One Greek and two Latin books, to be selected and published by the College Board one year in advance. Latin Prose Composition.

NOTE.—By a "book" shall be meant one division of an author's work. For example, one book of Homer's *Odyssey* shall mean any one book out of the twenty-four into which the poem is divided.

II.—MATHEMATICS.

ARITHMETIC:

The ordinary Rules of Arithmetic: Vulgar and Decimal Fractions.

ALGEBRA:

Addition, Subtraction, Multiplication and Division of Algebraical quantities.

GEOMETRY:

The first two books of Euclid.

III.—THE ENGLISH LANGUAGE.

Orthography: Writing from Dictation: The Grammatical Structure of the Language: Outlines of History of England, and General Geography.

IV.—THE FRENCH OR THE GERMAN LANGUAGE.

(At the option of the Candidate.)

One passage from some author for translation into English. The College Board to select the work and publish the name one year in advance.

Candidates shall not be approved of by the Examiners unless they pass in *three* of the above subjects, two of which shall be Classics and Mathematics.

Subjects for 1881-82:—

Homer: *Iliad*. I. or Xenophon, *Anab.* II.

Cicero pro *Lege Manilia*, and Horace *Odes*, I.

Latin Composition:—Arnold's Introduction to Latin Prose, to the end of the Passive Voice; and a translation back again into Latin of a plain English version from the Latin of some easy author.

German:—Adler's Reader, Part I. First part of Otto's German Grammar.

MATRICULATION IN ENGINEERING.

The same as in the School of Arts, with the omission of the *Classical Subjects*.

Matriculated Students are required to attend the Lectures and Examinations in all the Departments in their course, and to procure from the Professors certificates of attendance, without which they will not be allowed to proceed to the Examinations held at the end of every term.

ATTENDANCE AT LECTURES.

Attendance at all Lectures, except those which shall be announced as optional, shall be compulsory upon all Undergraduates.

Professors will note upon the Lectures Attendance List the presence or absence of students immediately before beginning the exercises of the class; any student entering thereafter will be registered as absent, unless a satisfactory explanation be given to the Professor.

No student shall be allowed to absent himself from any Lecture, except by special permission obtained from the Professor.

COURSE OF STUDY.

The object aimed at is to secure a good general education for all Matriculated Students, while every facility is afforded for the prosecution of special studies. Accordingly, every Matriculated Student, except under peculiar circumstances to be approved of by the College Board, is required to attend the Lectures of all the Professors until he has passed his Responsions, which is generally done in the sixth Term of residence. After this he is at liberty to select three or more of the subjects lectured on to form the subjects of his B. A. Examination. If the student is desirous of taking Honours at his B. A. Examination, he can do so in any one of the subjects lectured on after passing the ordinary Examinations. The precise Regulations will be found under the head of Examinations.

Students who do not intend to take the degree of B. A. are permitted to attend the lectures of any of the Professors, subject to all the usual Regulations.

The schemes of Responsions and B. A. Examination will afford a general idea of the usual Curriculum, which, within certain limits, is varied as circumstances require.

THE GENERAL WILLIAMS PRIZES.

Three of \$60 each, annually, during His Excellency's life, for the best scholar in—

- 1—Mining and the Sciences of Mineralogy as it bears practically on these operations.
- 2—Mechanics and Civil engineering as they bear on all matters relating to Railroads, motive power for them, and all other modern aids to the human hand.
- 3—Languages of modern Europe—German, but more especially French, as the almost universal medium of communication in Europe.

His Excellency has decreed that should no candidate be found duly qualified, the amount in that case, in any year, shall be applied to the purchase of books in the department for the College Library.

TERMS.

I. The Williams Prize in Mineralogy applied to Mining.—The preparation for each competition shall be, in addition to a brief sketch of Geology, a study of the general principles of Mining, and of specimens of metals and minerals, particularly the natural products of the British North American Provinces, such as ores of gold, copper, iron and other metals; coal, antimony, gypsum, manganese and other useful minerals. The candidates shall be required to produce satisfactory certificates of attendance and

attention at Lectures on chemical physics and inorganic chemistry either in the College or elsewhere, in addition to the like satisfactory certificates of attendance at the special Lectures by the Professor.

II.—The Williams Prize in Engineering.—The course of study preparatory to this competition shall embrace, *first*—that part of Engineering comprehended under the general name of Engineering Geodesy, which depends upon Geometrical principles alone, such as surveying, both with the chain and by angular measurement, levelling, setting out works, copying, enlarging and reducing plans, together with philosophical account of all the instruments used in these operations. *Second*—a summary of the principles of stress, stability and strength. *Third*—the principles according to which structures are combined into extensive works of Engineering, such as roads, railways, natural and artificial water channels, inland navigation, tidal and coast works.

III.—The Williams prize in Modern Languages.—The course of study preparatory to this competition shall embrace at least French and German. French must be known grammatically, and must be correctly pronounced. Some knowledge of the best authors must be displayed. Facility in writing the language must be shown, and a readiness and fluency of conversational expression. Similarly in German, but with excellence in one language, mediocrity in the others will be tolerated. Provided always that no Student shall succeed without passing a really good examination in French.

The system of examination pursued in deciding for the prizes, shall be as uniform as possible throughout them all.

TERMINAL EXAMINATION.

Every Student will be required to undergo an examination at the end of each Term in all the subjects in which he has attended lectures.

Every Undergraduate, previous to presenting himself for any Terminal Examination, will have to obtain from each Professor, whose lectures he has attended during the Term, a certificate of attendance and good conduct.

No Professor will grant such certificate if more than two absences without leave, during the course of the Term, are recorded against the applicant, or if his conduct shall have been in any way reprehensible.

Such certificate will then be handed in by the Undergraduate to the Vice-President previous to the beginning of the Examina-

tion, and no Undergraduate shall be allowed to present himself at any Terminal Examination, unless he shall have complied with these regulations.

The list of candidates who shall have passed the Terminal Examination shall be published in the hall, after the close of the examination. The names shall be arranged in the order of merit. *Any Student whose name does not appear in this list shall forfeit his examination.*

RESPONSIONS.

Every Matriculated Student is required to pass a public examination called Responsions, for which he cannot offer himself until he has completed his fourth Term, and no Term after the sixth can be reckoned until it has been passed. This Examination is held at the beginning of the Easter Term. The subjects are ordinarily as follows:

Students shall not be permitted to offer themselves for this before their ninth Term, except those who intend to offer themselves for Honours, who may be examined in the ordinary Degree subjects in their seventh Term, between the Responsions and this Examination. In such case, the Student must pass an examination in the Honour subjects chosen by him before being admitted to a Degree.

The University Library.

The foundation of the Library is due to the efforts of the first Bishop of Nova Scotia, and may be placed in the year 1789. Several contributions in money had previously been received, but it was not until that year that efforts were made to obtain books.

The original fund at the disposal of the Governors was not more than £250 sterling, and was intrusted to Mr. John Inglis, (afterwards Bishop,) son of the Bishop, and a graduate of the University, who repaired to England in 1800, for the purpose of purchasing books. The names of Dr. Moore, Archbishop of

Canterbury, Dr. Porteous, Bishop of Rochester, William Wilberforce, Sir S. Bernard Morland, John Eardley-Wilmot, M. P., and others, thus became connected with the early history of the Library.

Munificent gifts from the University of Oxford continued to increase the value of the collection, which was further enriched by gifts from various English gentlemen, and from others settled in Nova Scotia.

The room in the College building set apart for many years for a Library Hall, was completed in 1810 at the expense of Sir Thomas Strange and the Archbishop of Canterbury.

Subsequently valuable works were presented by Drs. Bayard and McCulloch, and by the Society for promoting Christian Knowledge.

Among later benefactors may be mentioned Dr. Greswell, of Worcester College, Oxford; The Smithsonian Institute; The British and Foreign Bible Society; The Dean and Chapter of Westminster; T. B. Akins, Esq., D. C. L.; The Society of Incorporated Alumni of King's College; E. Binney, Esq.; C. Cogswell, Esq., M. D.; The Dominion Government; The Secretary of the Interior, United States; The Institution of Civil Engineers; The Society of Engineers; The Royal Society; The Rev. G. McCawley, D. D.; Rev. Canon Hensley, D. D.; General Sir W. F. Williams, K. C. B.; the present Bishop of Nova Scotia; and Her Majesty the Queen.

This large collection of books, now numbering over 6000 volumes, contained till the year 1870 in a single room in the College building, was then removed to the new Hall specially built for the purpose and presented to the University by the Incorporated Alumni. It contains a large number of standard works of reference in Theology, which is by far the richest department in the Library, and a fair selection of the great Greek and Latin classics.

In Modern History and Belles-Lettres it is very poorly supplied.

In Science some recent standard books have from time to time been added, and, next to Theology and Classics, this is the

largest department. The languages of Modern Europe are not so well represented.

In spite of many blanks, the Library is one of the largest in the Province, and contains all the elements requisite for making it a thoroughly well appointed and efficient Reference Library.

There is no special Library fund except the fee from Students, and the collection can only be increased by grants of money from the Governors, the occasional lapsing of the General Williams and Welsford prize moneys, and the benefactions of friends of the University.

NATURAL HISTORY.

GEOLOGY AND MINERALOGY.

The Geological specimens, many of which are very fine, illustrate the most prominent features of general geology, but the majority have been collected in Nova Scotia and are especially adapted to shew the characters of the Fossil Flora and Fauna of the Province. There are several collections, which may be discriminated as follows:—

1. The W. B. Almon Collection, presented about forty years ago by Mrs. W. B. Almon, of Halifax, contains, with many minerals and a few shells, a considerable number of rock specimens and a few fossils, chiefly from Scotland, collected by the late W. B. Almon, M. D.

2. The Governors' Collection consists of coal fossils obtained in 1860, at the expense of the Governors of the College; these were collected by Professor How with the valuable assistance of a party headed by Richard Brown, Sr., Esq., then Agent at the Sydney Mines, who from long study was familiar with the district. Many of the specimens are exceedingly fine, and some are of large size.

3. The Alumni collection consists of Silurian and Devonian Fossils, chiefly from Arisaig, N. S., collected, named and arranged stratigraphically by Dr. Honeyman; purchased and presented in 1861, by the Alumni of King's College.

4. The Australian Collection consists of specimens obtained through Col. Nelson, in 1863, from Sir William Denison, then Governor of New South Wales, in exchange for Nova Scotian specimens from the College Cabinet, sent by Professor How. It contains some beautiful fossils, and is arranged stratigraphically; its value is increased by an accompanying large detailed colored section made by the Government Examiner of Coal Fields under instructions from Sir W. Denison.

5. A collection of British Fossils, chiefly Silurian and Devonian, obtained through Dr. McCawley in exchange for Nova Scotian specimens sent by Professor How from the College Cabinet, in 1860, to Captain, now Sir James Anderson.

6. A collection from Europe, illustrating chiefly the nature of crystalline and sedimentary rocks, purchased by the Governors.

7. Several collections, some of which are unnamed, and single specimens, given and obtained by exchange at various times; of these it will suffice to name: Reptilian Tracks of great geological interest, presented by the widow of their discoverer, the late Dr. Harding; valuable fossils, chiefly carboniferous, presented by H. Poole, Esq.; Silurian Fossils from Arisaig, presented by H. Hill, Esq., Sheriff of Antigonish; Coal Plants from Cumberland County, presented by Rev. Mr. Townshend, Rector of Amherst; Cretaceous Fossils from England, presented by C. B. Bowman, Esq., and Dr. Honeyman; Silurian and Carboniferous Fossils of Nova Scotia from Professor How; Devonian Corals of Ontario and Canadian Rocks from Professor Spencer.

The mineralogical specimens represent the most important species of minerals—some of them are of great beauty. They consist of those in the Almon collection, of Zeolites collected at the expense of the Governors, and of various others obtained by gifts and exchange, as mentioned with regard to the geological department. Sir Rupert George, Rev. Dr. Robertson, Rector of

Wilmot, H. Brown, Esq., Director of the Geological Survey of Victoria, formerly a distinguished student in science at this College, Rev. Mr. Ambrose, Rev. J. C. Cochran, C. B. Bowman, Esq., J. Bowman, Esq., Rev. D. W. Picket, Hon. W. Odell, and Professor How, have presented interesting specimens.

ZOOLOGY.

The Willis collection consists of specimens fully illustrating Nova Scotia Mollusca, named, arranged, and presented by J. R. Willis, Esq.

The department is further illustrated by a collection of foreign shells, some interesting skulls and skins, and a limited number of preserved animals.

BOTANY.

The Cogswell Herbarium, bound in five Imperial folio volumes, contains a fine systematically arranged collection of Phænogamous and Cryptogamous Plants of Great Britain, presented by Dr. Cogswell.

The Gossip Herbarium consists of a small number of Scottish Plants, presented by Dr. Gossip.

The Willis Herbarium consists of Nova Scotia Algae and Terrestrial Plants, presented by J. R. Willis, Esq.

The Strange Herbarium consists of a considerable number of East Indian Plants, presented, in 1805, by Sir T. Strange.

The Ball Herbarium of Nova Scotia, consisting of about 250 species, presented by Rev. E. H. Ball.

There are also a few woods, barks, leaves, and fruits—from various sources—presented by C. B. Bowman, Esq., W. J. Almon, Esq., M. D., and other benefactors.

THE GENERAL COLLECTION.

The General Collection consists of various curiosities from different parts of the world, and a small but choice cabinet of coins. Other interesting curiosities are the beautiful Indian Pipe

from Queen Charlotte's Island, the models of the Leaning Tower and the Baptistery at Pisa, and the memorials of Gens. Williams and Inglis, which include the sword worn by the former throughout the siege of Kars, and that used by the latter during the defence of Lucknow. There is also a model of the Cawnpore Memorial Cross, formed of wood from the house, in the court-yard of which the women and children were massacred.

The College possesses also a number of autographs of royal and distinguished personages; one of Thomas Moore, the poet, inscribed in a copy of Lucian, presented by him on the occasion of his visit.

The Coins illustrate the Numismatics of Rome, and most of the countries of the modern world.

The different departments of the Museum are arranged in twenty-four flat cases, supported by the balustrade surrounding the gallery, and five large table cases, all glazed and provided with lock and key. The large specimens which could not be conveniently placed in cases are arranged on shelves, or distributed in different parts of the Hall.

The friends of Science in Nova Scotia and elsewhere are respectfully requested to contribute specimens to the Museum of King's College. The steps which have been lately taken by the Governors to provide suitable cases for the arrangement and display of the contents of the Museum in the fine Hall erected at the expense of the Alumni, offer a guarantee that the liberality of donors will be carefully recognized and faithfully recorded.

It is particularly requested that donors will send their contributions of Books, Coins and Curiosities addressed to the LIBRARIAN, and of Natural History specimens to the NATURAL HISTORY CURATOR, King's College Museum, Windsor, N. S., in order that the receipt may be duly acknowledged, and the donations recorded in the yearly Calendars as heretofore.

A superb collection of Loyalist China, over 300 pieces, arranged in three cases, was presented by Judge and Mrs. Weidon, on the 97th anniversary of the landing of the Loyalists in New Brunswick.

Additions to the Library, 1880-81.

REPORT.

THE Executive Committee of the Associated Alumni of King's College, Windsor, on this their Thirty-fourth Anniversary, are happy to be able to announce that the expectations of last year have been more than realized in the increased number of students in attendance on lectures during the academical year just ended ; though, while we are thus able to congratulate the University on its extended usefulness, we regret to have to call your attention to the withdrawal of the Government Grant by the action of the Upper House during the last Session of the Provincial Legislature, which, by reducing the revenues of the University, threatens seriously to retard its progress by lessening its ability to meet the general requirements of the day.

Some immediate action on the part of the Alumni, as well as of all persons particularly interested in the welfare of King's College, is therefore called for.

A Special General Meeting to consider the financial condition of the College was called as soon as possible after the decision of the Legislature was made known, but, we regret to report, without result, as the number necessary for a quorum did not attend. Your Committee, with this end in view, have therefore, at the request of several of the Alumni, called a special meeting at the College Hall at two o'clock this afternoon, at which Churchmen and others are invited to be present, so as the more freely and fully to discuss the situation, and advise as to the best course of procedure under the circumstances.

The Board of Governors have appointed a Committee to consider a scheme for raising an additional endowment fund, and requested that a Committee from the Alumni should be appointed to confer with their Committee.

Failing any action at the special general meeting, your Committee appointed a Committee from their own body, composed of Dr. Cowie, Rev. Mr. Abbott, and Messrs. Silver and Sutherland, to confer with the Committee from the Board of Governors, with the hope of arriving at some definite conclusion before this meeting. * Their report will be duly submitted.

* Vide resolutions, page 75.

Before an endowment scheme can be instituted or carried into effect there is a necessity for increasing the collegiate revenue so as to meet the obligations for the ensuing year. To aid this in part your Committee recommend in addition to the usual vote towards the salary of Professor of Modern Languages, that the Sum of Two hundred Dollars be placed at the disposal of the Board of Governors.

As year by year the Committee have the melancholy duty to place before you the lessening names on our roll, so this year, in view of the large number who have been called away, there seems the greater need of activity to those who remain, in order that the prestige of the College may be maintained, and the love of *Alma Mater* fully proved.

At this time we regret to have to announce the decease of several who evinced a very warm interest in the College, and in their several vocations did all they could to promote her welfare :—

Sir Robert Hodgson, formerly Chief Justice, and first Lieut.-Governor of P. E. Island under Confederation.

Rev. Henry Pryor Almon, D. C. L.

Mr. Jabesh Snow.

Mr. Joseph Wier.

Rev. George S. Jarvis, D. D., Rector of Shediac, N. B., and a Member of the Board of Governors.

Rev. John Storrs, formerly Rector of Cornwallis.

John Spry Morris, Esq., formerly Surveyor-General of this Province.

Mr. Edgar Dodson, and

Mrs. Harry King.

The Treasurer's Account for the past year is herewith submitted.

In addition to the unfinished business of last year there is required. The election of two Governors in the place of the Rev. Canon Dart, D. C. L., and the Rev. Stanley Boyd, M. A., whose term of office has expired, and of a third in the place of the late Rev. Geo. S. Jarvis, D. D., deceased.

The election of a President in the place of Andrew J. Cowie, Esq., M. D., and three members of the Executive Committee in the place of Mr. William C. Silver, Hon. S. L. Shannon, D. C. L., and Mr. Charles H. Carman, who in the order of their election go out of office but are eligible for re-election, and of a fourth in the place of the late Rev. H. P. Almon, D. C. L., deceased.

By order,

CHARLES H. CARMAN, *Secretary.*

Halifax, N. S., June 29th, 1881.
