

Errata

Vol. 5 (1988).

p. 1 Abbreviations: PVB should read PUB

p. 2 Para 3. line 7: $(\alpha\beta)6_\gamma$ should read $(\alpha\beta)6\gamma$

p. 26 This is Figure 1. The legends for (c) and (d) should be reversed.

CBE Works for You

The Council of Biology Editors, Inc. serves writers, editors, and publishers in the biological sciences through its outstanding membership services and publications, including:

- *CBE Views*, a bimonthly publication, keeping you informed of the latest developments in scientific communication and publishing.
- publications providing valuable assistance for editors and writers, including the *CBE Style Manual*, the standard reference in the biological sciences
- an annual meeting stressing continuing education and networking among participants

NEW!

Illustrating Science: *Standards for Publication*

Announcing CBE's newest book—the result of eight years of work by editors, illustrators, photographers, publishers, and printers.

Illustrating Science presents specific standards and guidelines for publication of illustrated scientific material. You'll use it as a definitive reference when creating, publishing or printing scientific illustrations. It will help you achieve the finest, most effective illustrations possible.

With more than 120 illustrations, including 32 in full color, this important new book covers scientific illustrations with an unmatched thoroughness.

CONTENTS: Prepress: Getting an Illustration Ready to Print • Aspects of the Publishing Process Affecting Illustrations • Preparation of Artwork • Graphs and Maps • Computer Graphics • Camera-ready Copy • Continuous Tone Photographs and Halftone Printing • Color Printing • Materials and Handling • Standards, Illustrations, and Quality Criteria • Legal and Ethical Considerations • Glossary of Terms in Scientific Illustration • Annotated Bibliography • Index

Illustrating Science is a valuable reference addition to your professional bookshelf. Order your copy today!

It's easy to order *Illustrating Science: Standards for Publication*. Just indicate the number of copies you want and multiply by the appropriate price. Mail your order today!

International Journal of INVERTEBRATE REPRODUCTION & DEVELOPMENT

Published in collaboration with the International Society of Invertebrate Reproduction
Sponsored by the Centre National de la Recherche Scientifique

This journal is devoted to the rapid publication of complete papers and short communications in the following fields of sexual, reproductive and developmental (embryonic and postembryonic) biology of the Invertebrata: physiology-biochemistry-biophysics-functional morphology, histochemistry and ultrastructure-behaviour-regulatory mechanisms (genetic, neural, neuroendocrine and endocrine, environmental, social)-pharmacology-immunology-theoretical and experimental phylogeny-propagational energetics and strategies.

Editorial Policy

The journal has a strong preference for papers which address contemporary questions on reproductive and developmental biology of invertebrates. The journal will be reluctant to publish (1) simply repetitive work on reproductive cycles, or on descriptive morphology and (2) communications of original methodological research, unless such manuscripts contain significant results obtained with the new techniques. The journal intends from time to time to publish penetrating and provocative reviews and minireviews, announcements and reports of meetings and other events, news and views and notices and reviews of books received.

Managing Editors

Dr. D.W. Golding, Dove Marine Laboratory, Cullercoats North Shields, NE30 4PZ Tyne and Wear, U.K.

Dr. J.R. Collier, Department of Biology, Brooklyn College, Brooklyn, N.Y. 11210, U.S.A.

Prof. J. Hoffmann, Laboratoire de Biologie Générale de l'Université Louis Pasteur et Equipe de Recherche Associée CNRS No. 118, 'Biologie Humorale des Insectes', 12, rue de l'Université, 67000 Strasbourg, France

Founder Editor: Professor K.G. Adiyodi

SUBMISSION OF MANUSCRIPTS

Submit manuscripts in triplicate (original and two copies) to Prof. Margalith Galun, Department of Botany, The Dr. George S. Wise Faculty of Life Sciences, Tel Aviv University, Ramat Aviv, Tel Aviv 69978, Tel. 972-3-5459163. Telex 342171 VERSY IL, BITNET EEEM@TAUNOS, FAX 972-3-419513.

Manuscripts should be organized and prepared in the style of the journal.

Figures should be printworthy, and if possible, reduced to a size suitable for appearance in the journal. The printed area will be 12 × 19 cm. In photographs use bars to indicate magnifications.

Please give full address of all authors and include telephone and telex numbers.

The paper should begin with an abstract.

Keywords describing the article should be supplied as well as a brief running head.

REFERENCES

References should be listed alphabetically at the end of the manuscript in the following style:

Roberts, G.P., MacNeil, T., MacNeil, D., and Brill, W.J. 1978. Regulation and characterisation of protein products coded by the *nif* (nitrogen fixation) genes of *Klebsiella pneumoniae*. *J. Bacteriol.* **136**: 267-279.

Burris, R.H., Arp, D.J., Hageman, R.V., Houchins, J.P., Sweet, W.J., and Tso M-Y. 1981. Mechanism of nitrogenase action. In: *Current Perspectives in Nitrogen Fixation*. A.H. Gibson and W.E. Newton, eds. Australian Academy of Science, Canberra, pp. 56-66.

In the text, authors' names and year should appear within parentheses: (Kallio et al. 1975) or Kallio (1975)...

ELECTRONIC TRANSMISSION

It is possible to submit manuscripts on computer tapes, floppy discs or preferably by electronic transmission by BITNET, ARPANET (code EEEM@TAUNOS). This shortens the time of processing and production. This should be done in addition to (not instead of) sending the manuscript in the traditional manner.

REFEREES

All manuscripts will be judged by independent referees. Authors may submit a list of names of potential referees or, in case of possible controversy, to suggest who should not referee their paper. It should be understood that editors are not bound by these suggestions.

COVER PHOTOGRAPHS

Cover photographs will be selected from the current issue. However, the editor would be pleased to receive additional photographs of special interest to symbiotic associations. Photographs in duplicate and with a suitable brief caption and acknowledgement should be submitted to the editor.

PROOFS

Authors will receive proofs, which they are requested to correct and return as soon as possible. Authors should keep a copy of their manuscript, as proofs will be sent to them without manuscript. Authors making major revisions in proof will be required to bear the cost thereof.

REPRINTS

Twenty-five reprints will be supplied free of charge to the author(s). Additional reprints can be ordered at prices shown on the reprint order form which will accompany the proofs.
