## CONTENTS

## Vol. 11, no. 1

- Cristispira* from oyster styles: complex morphology of large symbiotic spirochetes  
by L. Margulis, L. Nault and J. McN. Sieburth (Amherst, MA and Narragansett, RI) . . . . . 1
- Effects of heat treatment on the symbiotic system of an aphid mycetocyte  
by C. Ohtaka and H. Ishikawa (Tokyo) . . . . . 19
- The enzymatic response of the symbiotic dinoflagellate *Symbiodinium microadriaticum* (Freudenthal) to growth *in vitro* under varied oxygen tensions  
by J.L. Matta and R.K. Trench (Santa Barbara, CA) . . . . . 31
- Lectin from the lichen *Nephroma laevigatum* Ach.  
Localization and function  
by N. Kardish, L. Silberstein, G. Fleminger and M. Galun (Tel Aviv) . . 47
- Morphometric and energy dispersive X-ray analysis of polphosphate distribution in the VAM fungus *Glomus versiforme* associated with leek  
by R.L. Peterson and M.J. Howarth (Ontario) . . . . . 63
- Influence of storage, season, morphology and habitat on haemagglutinin and haemolysin levels in maritime lichens  
by G.A. Ingram (Lancashire) . . . . . 73
- Bellegio Conference and Book; Symbiosis as Source of Evolutionary Innovation . . . . . 93
- Forthcoming events . . . . . 103

## Vol. 11, no. 2-3

- Development of *Peltigera praetextata* lichen thalli in culture  
by I. Yoshimura and Y. Yamamoto (Kochi and Osaka, Japan) . . . . . 109
- Enzyme similarity as an indicator of evolutionary divergence:  
*Stereocaulon saxatile* H. Magn.  
by D. Fahselt (Ontario, Canada) . . . . . 119
- Thallus moisture and microclimatic control of CO<sub>2</sub> exchange of  
*Peltigera aphthosa* (L.) Willd. on Disko Island (West Greenland)  
by B. Schroeter, P. Jacobsen and L. Kappen (Kiel, Germany) . . . . . 131

Comparative stereological study of the photobiont of <i>Lasallia hispanica</i> (Frey) Sancho & Crespo and <i>Umbilicaria spodochoera</i> var. <i>Carpetana</i> Prov. by C. Ascaso and F. Valladares (Madrid, Spain) . . . . .	147
Experimental microbiology of lichens: Mycelia fragmentation, a novel growth chamber, and the origins of thallus differentiation by D. Armaleo (Durham, NC) . . . . .	163
Quantum efficiency and chlorophyll fluorescence in the lichens <i>Hypogymnia pysicsodes</i> and <i>Parmelia sulcata</i> by M. Jensen and G.B. Feige (Essen, Germany) . . . . .	179
Direct analysis of lichens by tandem mass spectrometry by R. Tabacchi, P. Allemand and G. Tsoupras (Neuchâtel, Switzerland)	193
Lichen mineral studies — currently clarified or confused? by D.H. Brown (Bristol, UK) . . . . .	207
New results in the chemistry of lichens by S. Huneck (Weinberg, Germany) . . . . .	225
Molecular biology of lichens: a look to the future by V. Ahmadjian (Worcester, MA) . . . . .	249
Water status and urease secretion from two ecotypes of <i>Xanthoria parietina</i> by M. Rodriguez and C. Vicente (Madrid, Spain) . . . . .	255
Regulation of different arginase forms in <i>Evernia prunastri</i> thallus by M. Estrella Legaz (Madrid, Spain) . . . . .	263
Biochemical and environmental influence on the synthesis and accumulation of lichen phenolics by C. Vicente (Madrid, Spain) . . . . .	279
Chemical control of Cadmium uptake by <i>Peltigera</i> by D.H. Brown and A. Avalos (Bristol, UK) . . . . .	299
Analytical pyrolysis of lichen thalli by C. Saiz-Jimenez, J. Grimalt, J. Garcia-Rowe and J.J. Ortega-Calvo (Sevilla and Barcelona, Spain) . . . . .	313
Chemical evolution in the order Peltigerales: Triterpenoids by D.J. Galloway (London, U.K.) . . . . .	327
Binding studies of evernic acid to purified constitutive Arginase of <i>Evernia Prunastri</i> by SE-HPLC by M.M. Pedrosa and M. Estrella Legaz (Madrid, Spain) . . . . .	345
Book Reviews . . . . .	359
Forthcoming events . . . . .	365
Index to Volume 11 . . . . .	369

## **6th International Symposium on Microbial Ecology (ISME-6)**

Barcelona, September 6-11, 1992

Organized by the International Committee for Microbial Ecology (ICOME), the Spanish Society for Microbiology, and the Catalan Society for Biology.

The scientific program will include a wide range of topics related to microbial ecology. There will be plenary lectures, symposia, workshops, round table discussions and contributed papers (poster and oral). Some of the topics to be covered are (others may be proposed in the pre-registration form):

- Methods of microbial ecology
- Ecology of individuals and populations
- Ecology of interacting populations
- Communities and the environment
- Applied microbial ecology
- Towards a theory of microbial ecology
- Scientific research management

All correspondence should be addressed to:

Prof. Ricardo Guerrero

# INVERTEBRATE REPRODUCTION & DEVELOPMENT

## Editorial Board

K.G. Adiyodi (Kerala), Founding Editor  
B. Baccetti (Siena)  
J.A.M. van de Biggelaar (Utrecht)  
L.W. Bone (Auburn, AL)  
P. Calow (Sheffield)  
J.N. Cather (Ann Arbor, MI)  
F.S. Chia (Edmonton)  
W.H. Clark (Davis, CA)  
R.J. Crowther (Woods Hole, MA)  
M. Dan-Sohkawa (Osaka)  
A. Franzén (Stockholm)  
G. Freeman (Austin, TX)  
L.I. Gilbert (Chapel Hill, NC)  
M. Hoshi (Tokyo)  
H. Ishizaki (Nagoya)  
J. Joosse (Amsterdam)  
J.-A. Lepasant (Paris)  
R.L. Miller (Philadelphia, PA)  
C. Noirot (Dijon)  
P.J.W. Olive (Newcastle upon Tyne)  
J.H. Oliver, Jr. (Statesboro, GA)  
J.S. Pearse (Santa Cruz, CA)  
P.H. Smith (Canberra City)  
B. Stay (Iowa City, IA)  
J.R. Whittaker (Woods Hole, MA)

## Editors

J.R. Collier, Brooklyn, NY, U.S.A  
D.W. Golding, Newcastle upon Tyne, U.K.  
J. Hoffmann, Strasbourg, France

## *Invertebrate Reproduction and Development*

*publishes original papers and reviews with a wide approach to the sexual, reproductive and developmental (embryonic and postembryonic) biology of the Invertebrata. Topics range from physiology, biochemistry, functional morphology and phylogeny to behavioral and regulatory mechanisms including genetic, endocrine and molecular studies. New techniques and perspectives are particularly welcome.*

## ORDER FORM

BALABAN PUBLISHERS   
International Science Services  
POB 2039, Rehovot 76120, Israel  
Fax 972-8-467632

Published in collaboration with  
the International Society of  
Invertebrate Reproduction

## INVERTEBRATE REPRODUCTION & DEVELOPMENT

1992. Vols. 21 and 22 (2 vols. in 6 issues) Dfl. 625.00

- Please enter my subscription  
 Please send me a free sample copy  
 Please send me a proforma invoice

Name (please print) \_\_\_\_\_

Address \_\_\_\_\_  
\_\_\_\_\_

Enclosed is my check for \_\_\_\_\_

Signature \_\_\_\_\_ Date \_\_\_\_\_

## SUBMISSION OF MANUSCRIPTS

Submit manuscripts in triplicate (original and two copies) to Prof. Margalith Galun, Department of Botany, The Dr. George S. Wise Faculty of Life Sciences, Tel Aviv University, Ramat Aviv, Tel Aviv 69978, Tel. 972-3-5459163. Bitnet EEEM@TAUNOS, Fax 972-3-6426211

Manuscripts should be organized and prepared in the style of the journal.

Figures should be printworthy, and if possible, reduced to a size suitable for appearance in the journal. The printed area will be 12 × 19 cm. In photographs use bars to indicate magnifications.

Please give full address of all authors and include telephone and Fax number.

The paper should begin with an abstract.

Keywords describing the article should be supplied as well as a brief running head.

## REFERENCES

References should be listed alphabetically at the end of the manuscript in the following style:

Roberts, G.P., MacNeil, T., MacNeil, D., and Brill, W.J. 1978. Regulation and characterisation of protein products coded by the *nif* (nitrogen fixation) genes of *Klebsiella pneumoniae*. *J. Bacteriol.* 136: 267-279.

Burris, R.H., Arp, D.J., Hageman, R.V., Houchins, J.P., Sweet, W.J., and Tso M-Y. 1981. Mechanism of nitrogenase action. In: *Current Perspectives in Nitrogen Fixation*. A.H. Gibson and W.E. Newton, eds. Australian Academy of Science, Canberra, pp. 56-66.

In the text, authors' names and year should appear within parentheses:  
(Kallio et al. 1975) or Kallio (1975)...

## ELECTRONIC TRANSMISSION

It is possible to submit manuscripts on computer tapes, floppy discs or preferably by electronic transmission by BITNET, ARPANET (code EEEM@TAUNOS). This shortens the time of processing and production. This should be done in addition to (not instead of) sending the manuscript in the traditional manner.

## REFEREES

All manuscripts will be judged by independent referees. Authors may submit a list of names of potential referees or, in case of possible controversy, to suggest who should not referee their paper. It should be understood that editors are not bound by these suggestions.

## COVER PHOTOGRAPHS

Cover photographs will be selected from the current issue. However, the editor would be pleased to receive additional photographs of special interest to symbiotic associations. Photographs in duplicate and with a suitable brief caption and acknowledgement should be submitted to the editor.

## PROOFS

Authors will receive proofs, which they are requested to correct and return as soon as possible. Authors should keep a copy of their manuscript, as proofs will be sent to them without manuscript. Authors making major revisions in proof will be required to bear the cost thereof.

## REPRINTS

Twenty-five reprints will be supplied free of charge to the author(s). Additional reprints can be ordered at prices shown on the reprint order form which will accompany the proofs.

Comprising the Proceedings of the 3rd International Colloquium on Lichen Biology, April 23-27, 1990. Held at the Real Jardín Botánico, Madrid, Spain
